Interpretation of entries

It has been necessary to express in code numbers and letters some of the information regarding places and features listed in the gazetteer in order to accommodate it to the machine method of tabulation.

Name.--Standard names and cross-references from variant names appear in the first column. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used. Where part of a name is underlined, the use of the nonunderlined part is optional. Names that include both specific and generic elements (except those of populated places) are alphabetized by specific part; for example, Loi Anglawng is listed as Anglawng, Loi.

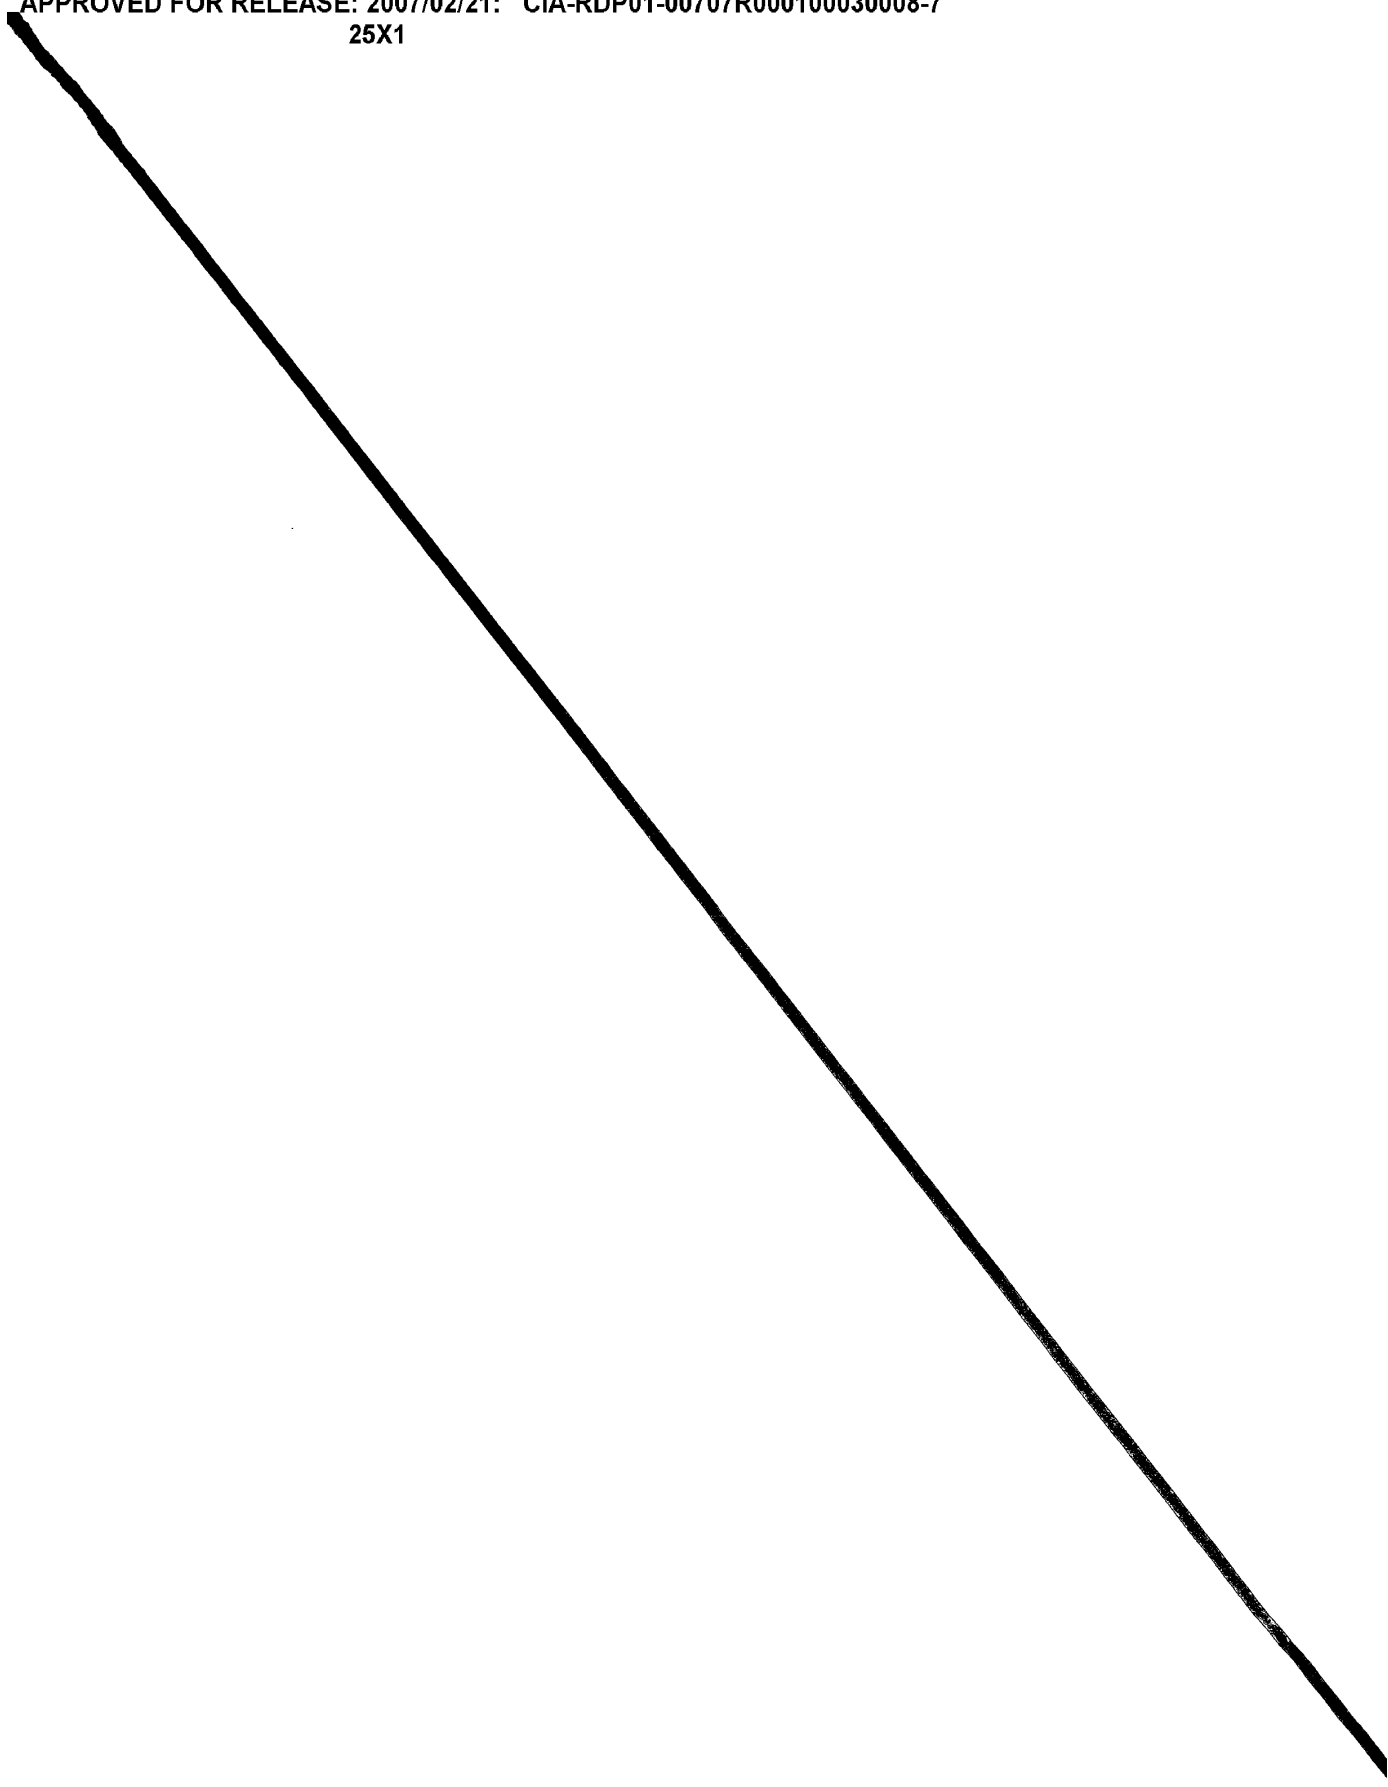

Designation.--Designations in the second column are sometimes abbreviated and represent groups of features, as follows:

ADMD	administrative division	PGDA	pagoda
BANK	sandbank(s)	POPL	populated place
BAY	bay, inlet	PT	point
BLDG	building, rest house	REGN	region
CHAN	channel	REP	republic
CNAL	canal	ROAD	roadstead
CST	coast	ROCK	rock(s)
DIST	district	RSTA	railroad station
HBR	harbor	RSVR	reservoir
HILL	hill(s), hilly region	SHOL	shoal(s)
ISL	island, islet	SND	sound
ISLS	islands, islets	SPRG	spring
MRSH	marsh(es)	STAT	state
MT	mountain, peak	STR	water passage, strait
MTS	mountains, mountain range	STRM	stream
PASS	mountain pass	UPLD	upland, plateau
PEN	peninsula	VAL	valley

Latitude and longitude.--Coordinates (third and fourth columns) are for finding purposes only. They were read to the nearest minute.

Administrative division.--The number in the fifth column, 457, is the code number assigned to Burma.
