Interpretation of entries

It has been necessary to express in code numbers and letters some of the information regarding places and features listed in the gazetteer in order to accommodate it to the machine method of tabulation.

Name.--Standard names and cross-references from variant names appear in the first column. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used. Where part of a name is underlined, the use of the nonunderlined part is optional. Names that include both specific and generic elements (except names of populated places) are alphabetized by specific part; thus Bir Abayat, a well, is listed as Abayat, Bir.

RESTRICTED

Latitude and longitude.--Coordinates, in the third and fourth columns, are for finding purposes only. Where the scale of sources permitted, they were read to the nearest minute. For some of the areas, maps are such that location with accuracy is impossible.

Administrative division.--The number in the fifth column is the code number assigned to the area: 5524, French Cameroons; 553, insular Spanish Guinea; 5534, continental Spanish Guinea; 554, French Equatorial Africa; 5575, Cabinda; 594, São Tomé; 595, Príncipe.

Locational reference.--The code number in the last column indicates a map or chart on which the feature may be located by its standard name or a name recognizable as a variant of its standard name. The numbers refer to the following maps and charts:
