CENTRAL INTELLIGENCE AGENCY

Washington, D. C.

July 1953

This volume of the Preliminary Gazetteer for the Philippine Islands is issued as part of the National Intelligence Survey program and lists official standard names approved by the United States Board on Geographic Names. These names supersede all previous decisions on geographic names in this area. For features lying within adjacent areas, refer to appropriate Gazetteer.

The Preliminary NIS Gazetteer for the Philippine Islands comprises the following 2 volumes:

Volume I A-L

Volume II M-Z

This Gazetteer is issued on a preliminary basis to expedite availability of this work material for use in the preparation of the National Intelligence Surveys. It is contemplated that major additions and revisions will be published in supplemental volumes and that subsequently the material will be consolidated and published as a standard component of the National Intelligence Survey for the Philippine Islands.

Distribution of this publication is made by the Central Intelligence Agency. This document carries a RESTRICTED classification but individual names thereof are unclassified.

FOREWORD

This two-volume gazetteer contains about 51,350 entries for places and features in the Republic of the Philippines. The scale of map coverage is generally about 1:200,000, but many areas are covered at scales up to 1:5,000 and some interior areas are covered at only 1:600,000. The 1948 Philippine Census and charts and maps of the United States Coast and Geodetic Survey were the principal sources used in standardizing the names.

Glossary of generic terms

The following glossary contains non-English generic terms occurring in the standard names listed in the gazetteer.

barrio	minor civil division, village
batasan	channel
bud	mountain, hill
cayos	islands
estero	channel, inlet
isla	island
rio	stream
sapa	stream
sapang	stream
tausan	channel
tetas	hills

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

Name.--In the first column are listed standard names and cross-references from variant names. If two names are approved for a feature, each is identified in parentheses and either or both may be used. Where part of a name is underlined, the use of the nonunderlined part is optional. Names that consist of specific and generic elements are alphabetized by specific part; thus the stream Sapang Asta is listed as Asta, Sapang.

The acute accent (ˊ), the tilde (˜), and the apostrophe (') occur in Philippine names, the accent and tilde in words of Spanish origin and the apostrophe following vowels in a considerable number of native words. The Spanish diacritical marks do not appear in all Spanish names where they would be expected, since they are not consistently used in writing Philippine geographic names. The apostrophe may be medial, as in Gi'tung, but is more often terminal, as in Baunu' Bata'.

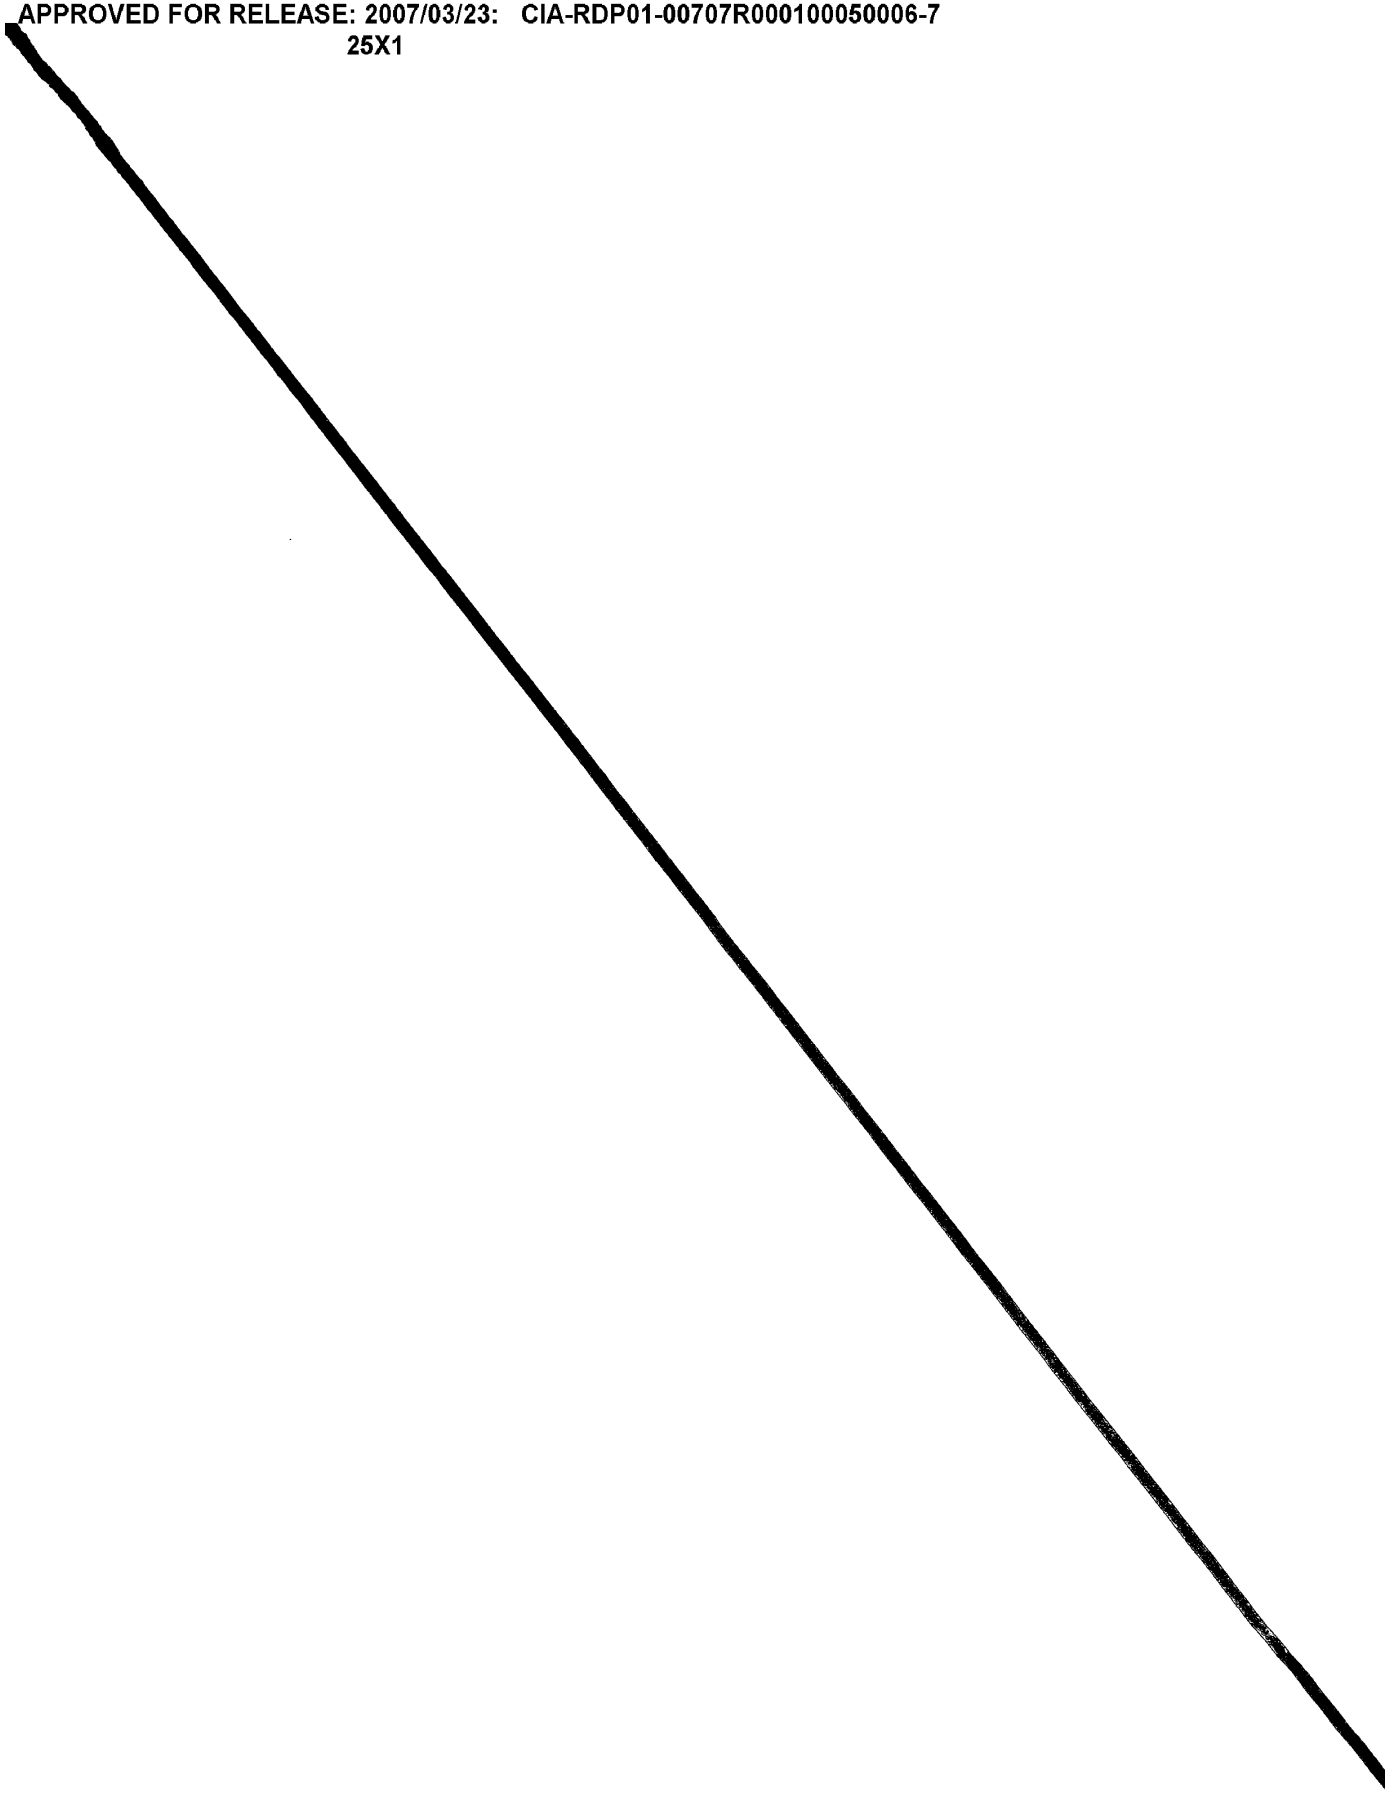

Where it is desired to print Philippine names in capital and lower-case letters, all separate words except articles, prepositions, and conjunctions should begin with capital letters. All diacritical marks are the the same on both capital and lower-case letters.

Designation.--Designations, in the second column, are sometimes abbreviated and represent groups of features, as follows:

ANCH	anchorage, port	CHTD	chartered city
AREA	area, locality, former municipality	CLIF	cliff, bluff
		CNAL	canal
BANK	bank(s), sandbank, submarine ridge	DLTA	delta
		ESTY	estuary
BARR	barrio	FALL	waterfall, rapids
BAY	bay, inlet	FRST	forest, woods
BRKR	breakers	GRGE	gorge, canyon
CAPE	cape, headland	HBR	harbor, basin
CAVE	cave(s)	HILL	hill(s), mesa
CDST	city district	ISL	island, islet
CHAN	channel, tidal channel	ISLS	islands, archipelago
