CENTRAL INTELLIGENCE AGENCY

Washington, D. C.

August 1954

This Gazetteer is issued as a standard component of the National Intelligence Survey for West Africa and lists official standard names approved by the United States Board on Geographic Names. These names supersede all previous decisions on geographic names in this area. This Gazetteer also lists the variants of official standard names for reference purposes. These variants are not approved as standard names.

The NIS Gazetteer for West Africa comprises the following 2 volumes:

Volume I British Cameroons, Gambia, Gold Coast, Nigeria, Portuguese Guinea, Sierra Leone, Spanish Sahara, Togo, and Togoland.

Volume II French West Africa.

This Gazetteer will be adequately maintained by published revision.

Distribution of this publication is made by the Central Intelligence Agency and is for official use only.

FOREWORD

This two-volume gazetteer contains about 66,300 entries for places and features in western Africa. These entries include approved standard names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

This volume contains about 34,400 entries for French West Africa. Volume I contains about 31,900 entries for British Cameroons, Gambia, Gold Coast, Nigeria, Portuguese Guinea, Sierra Leone, Spanish Sahara, Togo, and Togoland.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

Name.--Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to approved names by use of the word "see." Where part of a standard name is underlined, the use of the nonunderlined part is optional. Where two names are approved for a feature, each is identified in parentheses and either or both may be used. Names that consist of specific and other elements are alphabetized by specific part; thus Dune d'Abanhala is listed as Abanhala, Dune d'. Marks that occur on recommended names include the acute accent (as in Abarhé), the grave accent (Rivière), the dieresis (Daïa), the circumflex (Côte), and the cedilla (Française).

Designation.--Designations, in the second column, are sometimes abbreviated and represent groups of features, as follows:

Latitude and longitude.--Coordinates, in the third and fourth columns, are for finding purposes only. Where the scale of sources permitted, they were read to the nearest minute. It is to be noted that for much of western Africa accurate maps are not available and therefore the coordinates given may be subject to revision when more accurate surveys are published.

Administrative division.--The number in the fifth column, 540, is the area number assigned to French West Africa.

Locational reference.--The number in the last column indicates a map or chart where the feature may be located by its standard name or a recognizable variant of its standard name, as follows:

- 01 *Croquis de l'Afrique Française au 1,000,000*, Institut Géographique National or Service Géographique de l'Armée, various dates.
- 02 *Carte des Colonies de l'A.O.F. and Croquis de Reconnaissance des Régions Sabariennes*, Service Géographique de l'A.O.F., Dakar, various dates; scale 1:500,000.
- 03 [French West Africa], most sheets Service Géographique de l'A.O.F., some sheets Institut Géographique National, various dates; scale 1:200,000.

The code 00 is used for cross-references and for the names not to be found on one of these six references.
