Washington, D. C.

June 1956

This Gazetteer is issued as a standard component of the National Intelligence Survey for Iran and lists official standard names approved by the United States Board on Geographic Names. These names supersede all previous decisions on geographic names in this area. This Gazetteer also lists the variants of official standard names for reference purposes. These variants are not approved as standard names.

This Gazetteer will be adequately maintained by published revision:

Distribution of this publication is made by the Central Intelligence Agency and is for official use only.

NIS GAZETTEER

Iran

Official Standard Names Approved by the
U. S. Board on Geographic Names

Prepared in the Office of Geography, Department of the Interior
Published by the Central Intelligence Agency
Washington, D. C. June 1956

APPROVED FOR RELEASE: 2007/03/23: CIA-RDP01-00707R000100080004-6

Geographic names or their spellings do not necessarily
reflect recognition of the political status of an area by the
United States Government.

APPROVED FOR RELEASE: 2007/03/23: CIA-RDP01-00707R000100080004-6

FOREWORD

This gazetteer contains about 46,000 entries for places and features in Iran. The entries include approved standard names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The names in this gazetteer supersede those in all previous Board lists for the area.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

Name.—Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see." Standard names were generally transliterated from Iranian sources in accordance with the system adopted by the United States Board on Geographic Names. Names for which no satisfactory Persian form is available have been standardized on the basis of the best available evidence (Zunābād, Drum Point). Where part of a standard name is underlined, the use of the nonunderlined part is optional. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used. Names that consist of specific and other elements are regularly alphabetized by specific part; thus the pass Gardaneh-ye Āb is listed as Āb, Gardaneh-ye. Diacritical marks include the macron (as in Āb), the acute accent (Mūsá), the cedilla (Heşār, Shatt̃), the underlined z (Ĥowz), the ain (Qal'eh), and the hamzeh (Ra's). The same marks are to be used whether the names are written in all capitals or in capitals and lowercase letters.

Designation.—The second column contains designations or abbreviations of designations, as follows:

ANCH	anchorage	ISL	island, islet
AREA	area	LAKE	lake, salt lake
BANK	bank	LCTY	locality
BAR	bar	MOSQ	mosque

Latitude and longitude.---Coordinates, in the third and fourth columns, are for finding purposes only. They were read to the nearest minute from the most accurate maps available.

Administrative division.---The number in the fifth column, 418, is the area number assigned to Iran.

Locational reference.---The number in the last column indicates a reference in which the feature may be located by its standard name, a recognizable variant of its standard name, or the Persian form of its standard name, as follows:

- 01 *Asia 1:1,000,000*, GSGS 2555, Geographical Section, General Staff, 1938-55, reprinted by AMS 1943-44.
