CENTRAL INTELLIGENCE AGENCY

Washington, D. C.

June 1957

This Gazetteer is issued as a standard component of the National Intelligence Survey for Iraq and lists official standard names approved by the United States Board on Geographic Names. These names supersede all previous decisions on geographic names in this area. This Gazetteer also lists the variants of official standard names for reference purposes. These variants are not approved as standard names.

This Gazetteer will be adequately maintained by published revision.

Distribution of this publication is made by the Central Intelligence Agency and is for official use only.

FOREWORD

This gazetteer contains about 13,200 entries for places and features in Iraq. The entries include approved standard names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The names in this gazetteer supersede those in all previous Board lists for the area.

The scale of map coverage is generally about 1:500,000.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

Name.—Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see." Where part of a name is underlined, the use of the nonunderlined part is optional. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used. Names that include specific and other elements (except names of populated places) are alphabetized by specific part; thus Wādī 'Abbās is listed as 'Abbās, Wādī. Diacritical marks and special letters include the acute accent (as in Sufiá), the 'ayn ('Abd), the hamzah (Ra's), the macron (Āb), and the cedilla (Aḥmad). The same marks are to be used with both capital and lowercase letters.

Designation.—The second column contains designations or abbreviations of designations, as follows:

ADMD administrative division	POPL populated place
AREA area, tribal area	POPS summer camp site
BAR bar	PORT port
BUR grave(s)	POST military post
CHAN channel	PROV province

Latitude and longitude.—Coordinates, in the third and fourth columns, are for finding purposes only. They were read to the nearest minute.

Administrative division.—The number in the fifth column, 417, is the area number assigned to Iraq.

Locational reference.—The number in the last column indicates a map on which the feature may be located by its standard name or a recognizable variant of its standard name, as follows:

- 01 *Asia 1:1,000,000*, GSGS 2555, Geographical Section, General Staff, 1942–44.
- 02 [Iraq 1:253,440], GSGS 3919, Geographical Section, General Staff, ca. 1942.
