August 1963

This Gazetteer is issued as a standard component of the National Intelligence Survey for Cambodia and lists official standard names approved by the United States Board on Geographic Names. These names supersede all previous decisions on geographic names in this area. This Gazetteer also lists the variants of official standard names for reference purposes. These variants are not approved as standard names.

This Gazetteer will be adequately maintained by published revision.

Distribution of this publication is made by the Central Intelligence Agency and is for official use only.

FOREWORD

This gazetteer contains about 14,000 entries for places and features in Cambodia. The entries include standard names approved by the Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The names in this gazetteer supersede those in all previous Board lists for the area.

The name coverage corresponds approximately to that on maps at the scale of 1:250,000, supplemented from maps at the scale of 1:100,000. Named entities include first- and second-order administrative divisions, most towns and villages, the important mountains, hills, and streams, and a variety of other physical and cultural features.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

Name. — Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see." Where part of a name is underlined, the use of the part not underlined is optional. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used. Names that include specific and other elements (except names of populated places) are alphabetized by specific part; thus Tonle Sap is listed as Sap, Tonle.

The acute accent (´), the grave accent (`), the circumflex (^), and the dieresis (¨) occur in French words in

Cambodian names and are used on both capital and lowercase letters. The apostrophe occurs in some Cambodian words.

In writing Cambodian names in capital and lowercase letters, the initial letter of each word except noninitial French articles, prepositions, and conjunctions should be capitalized.

Designation. — The second column contains designations or abbreviations of designations, as listed below. Since practically all geographic terms have varied meanings, the senses in which some of the designator terms are used and the range of features to which they applied in this gazetteer are elaborated in the list to reduce ambiguity. The distinctions that can be made in a given gazetteer will vary with the quality of the maps of the area and with the nature of the entities that are named.

ADMD	administrative division (first-order, <i>khet</i> ; second-order, <i>srok</i> )
BAR	sand bar
BAY	bay
CHNS	stream channel (separately named lesser channel around an island, bar, or shoal in a stream)
ESTA	agricultural estate (plantation)
GULF	gulf
HLL	hill (landform with moderate relief, moderate to low elevation, and small summit area)
HLLS	hills
ISL	island
ISLS	islands
LK	lake
LKS	lakes
LKX	section of lake
MRSH	marsh (wetland with few or no trees)

MT	mountain (landform with conspicuous relief, moderate to high elevation, and small summit area)	STM	stream (river or other running fresh waterbody, perennial in whole or in part)
MTS	mountains, mountain range	STMD	distributary
PASS	pass (way over, through, or between mountains or other elevated land)	STMI	intermittent stream (stream, no part of which is indicated as perennial)
PCLI	independent political entity (kingdom)	STMX	section of stream (separately named part of a continuous stream not necessarily delimited by significant confluences)
PGDA	pagoda	STRT	strait (relatively narrow water passage connecting larger bodies of water)
PK	peak (separately named summit on a larger elevation)	VAL	valley
PLAT	plateau (extensive elevated area of flat to rolling surface; may exhibit considerable local relief due to dissection or the presence of hills rising above the general surface level)		
PND	pond (small inland waterbody)		
PPL	populated place (city, town, village, settlement)		
PPLQ	abandoned village		
PPLX	section of populated place (in Phnom Penh only)		
PT	point (relatively minor projection of land into a waterbody, or its extremity)		
RDGE	ridge (elongated elevation or series of elevations)		
RF	reef (offshore hazard to navigation characterized by submerged rocks)		
RGN	region (area recognized as an entity by reason of the unity of its history, people, landscape, or other condition)		
RKW	rock in water		
RPDS	rapids		
RSTN	railroad station		
RSTP	railroad stop		
RSV	reservoir (small waterbody enclosed by walls or embankments)		
RUIN	ruin(s) (building(s) in a state of ruin and having archaeological interest)		
SHOL	shoal (offshore hazard to navigation, generally composed of unconsolidated material)		
SPUR	spur (sloping ridge extending laterally from a mountain or other elevation)		

Latitude and longitude. — The third and fourth columns indicate geographic coordinates, with longitude based on Greenwich. Coordinates were generally read to the nearest minute and are for finding purposes only. For precise location, large-scale maps should be used.

Coordinates were read at the map symbol for populated places and other entities occupying limited sites, at the mouths or lower ends of streams, at the summits of mountains and hills, at the extremities of points, and near the centers or midpoints of most other features.

Area number. — The number in the fifth column indicates the *khet* (first-order administrative division) in which the place or feature is located as listed below and shown on Cambodian administrative maps dated 1960 and 1962. In addition to the seventeen listed divisions, there are five other entities described as "municipalities" with first-order status. Since the extent of the municipalities is uncertain, they have been combined for reference purposes with the *khet*s in which they are geographically located.\* The sources provide only generalized boundaries for the *khet*s; hence some of the assigned numbers may be inaccurate.

\* The "municipalities" include Phnom Penh which is classified geographically with Kandal (46801) and Bokor, Kep, and Sihanoukville which are classified with Kampot (46803). In addition a fifth municipality, Kirirom, is described as being in Kompong Speu (46804), but it may also include a part of Koh Kong (46805), the *khet* in which the town of Kirirom, said to be the administrative center of the municipality, is located.

Additional name list

The following publications contain names not included in this gazetteer and may be helpful as finding lists, though the additional names in them are not necessarily those that would be approved by the Board as standard names:

1. *Gazetteer of Indochina*, Director of Survey (India), 1945.
2. *French Indochina and South China Sea*, publication 892, Hydrographic Office, Department of the Navy, Washington, D. C., 1944.
3. *Indochina Place Names List*, U. S. National Security Agency, Washington, D. C., 1957.

Reporting of errors

It is requested that all who use this gazetteer aid in its correction for future printings by reporting errors to the Board on Geographic Names, Department of the Interior, Washington 25, D. C. A statement of the source of the correct information will be helpful.

Geographic names or their spellings do not necessarily reflect recognition of the political status of an area by the United States Government.
