August 1966

This Gazetteer is issued as a standard component of the National Intelligence Survey for Mauritania and lists official standard names approved by the United States Board on Geographic Names. These names supersede all previous decisions on geographic names in this area. This Gazetteer also lists the variants of official standard names for reference purposes. These variants are not approved as standard names.

This Gazetteer will be adequately maintained by published revision.

Distribution of this publication is made by the Central Intelligence Agency and is for official use only.

FOREWORD

This gazetteer contains about 10,000 entries for places and features in the Islamic Republic of Mauritania. The entries include standard names approved by the Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the Gazetteer should always refer to main entries for approved names.*

The basic name coverage corresponds to that of maps at the scale of 1:200,000 in the southern and western parts of the country and at 1:500,000 in the rest of the country. Entries include the names of first-order administrative divisions, populated places of all sizes, various other cultural entities, and a variety of physical features.

Through collaboration with the Institut Géographique National, the *Principes de Transcription des Toponymes Africains* (IGNF, Paris, July 1963) have been complied with, so far as practicable, in standardizing the names.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

Name.— Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see." Where part of a name is underlined, the use of the part not underlined is optional. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used. Names containing generic elements preceding the specific term (except names of populated places) are alphabetized by the specific part; thus Oued Affer, the name of a wadi, is listed as Affer, Oued.

The diacritical marks used in approved names of Mauritania are the acute (´), grave (`), and circumflex (^) accents, the cedilla (¸) and the dieresis (¨). These marks are to be used whether the names are written in capital or lowercase letters.

In addition, the apostrophe is used to indicate contraction in French name elements and to represent the consonant 'ayn in Arabic and Berber words. The hyphen is used to connect compound name elements in Berber and French names.

In writing names of Mauritania in capital and lowercase letters, the forms of the Arabic definite articles *el, ech, ed, ej, en, er, es, et, ez*, the Berber particles *e, i, te, ti, tou, oua, oui, -n- -m-, -en-*, the Arabic conjunction *oua*, and all French articles, prepositions, and conjunctions are written in lowercase except when in initial position.

Designation.— The second column contains designations or abbreviations of designations, as listed below. Since practically all geographic terms have varied meanings, the senses in which the designator terms are used and the range of features to which they are applied in *this gazetteer* are stated in the list to reduce ambiguity. The distinctions that can be made in a given gazetteer will vary with the quality of the maps of the area and with the nature of the entities that are named. In Mauritania some of the features do not fit precisely into the categories used to designate them and others could be designated in two or more ways.

ADMD	first-order administrative division ( <i>cercle</i> )
AIRF	landing ground
AIRQ	abandoned airfield
AREA	area (named tract of land, the identifying characteristics of which cannot be determined from available maps)
BAY	bay (coastal indentation of a size intermediate between a gulf and a cove)
BCH	beach (deposit of sand or other unconsolidated material along a shore)
BUTE	butte(s) (small, isolated, usually flat-topped hill with steep sides)
CAPE	cape (seaward end of a projection of land of such position and size as to affect the course of ships)

CHNM	marine channel (channel between coastal islands, reefs, or shoals; between an offshore feature and the mainland; or through a shallow marine waterbody)	MESA	mesa(s) (flat or nearly flat landform less extensive than a plateau and separated from lower surrounding land by abrupt slopes)
CLF	cliff (high, steep rock face overlooking a lower area, such as a waterbody, coastal lowland, or valley)	MN	mine (iron ore; includes associated ore-processing and other facilities)
CMP	nomadic campsite	MRSH	marsh (wetland characterized by grasses or bush vegetation and few or no trees; usually seasonal)
COVE	cove	MT	mountain (landform of conspicuous relief, moderate to high elevation, and small summit area)
DAM	dam (barrier constructed across a stream to impound water)	MTS	mountains
DPR	depression (lower area wholly or largely surrounded by higher land; ordinarily has interior drainage and does not conform to the valley of a single stream; includes inconspicuous, shallow basins into which surrounding surface drainage flows)	OAS	oasis (watered area in a desert, usually with cultivation dependent on irrigation or a shallow ground water table)
DSRT	desert	PASS	pass (way over or between mountains or other elevations, including dunes and dune ridges)
DUNE	dune(s) (hill or ridge of sand formed by the action of wind; includes a large variety of dune types locally differentiated by numerous generic terms) (see glossary)	PCLI	independent political entity (republic)
ERG	erg (desert area of shifting sand)	PEN	peninsula
FLT	salt flat	PLAT	plateau (extensive elevated area of flat to rolling surface; may exhibit considerable local relief due to dissection or the presence of hills or mountains rising above the general surface level)
FRST	forest	PLN	plain (landform of low relief, slope, and elevation)
FT	military post	PND	pond (small standing waterbody)
GRGE	gorge(s) (relatively narrow, steep-sided segment of a streamcourse)	PNDI	intermittent pond
HLL	hill (landform of moderate relief, moderate elevation, and small summit area)	PNDG	ponds
HLLS	hills	PPL	populated place (city, town, village, settlement)
HMDA	hamada (stony plain or upland in a desert)	PPLQ	abandoned settlement
ISL	island	PROM	promontory (piece of an area of high, generally flat land jutting into surrounding lower land; similar to a headland except for its inland location)
ISLS	islands	PT	point (relatively minor projection of land into a waterbody, or its extremity)
LCTY	locality (minor area or place of unspecified or mixed character)	RDGE	ridge(s) (elongated, relatively narrow relief feature with a more or less continuous crest; cuesta (a symmetrical ridge or series of hills formed on tilted strata of hard rock overlying softer rock)
LK	lake		
LKI	intermittent lake (usually seasonal)		
LKSI	intermittent lakes		

REG	reg (desert area with a surface of loose stones or pebbles)	TRGD	interdune trough(s) (elongated corridor between parallel dunes or areas of dunes)
RESF	forest reserve ( <i>forêt classée</i> : forested area under public management and controlled use; <i>périmètre de reboisement</i> : reforestation area)	WAD	wadi (watercourse or drainageway that carries only occasional flows of water)
RCN	region (large area recognized as an entity by reason of the unity of its history, people, landscape, or other condition or a combination of conditions)	WADS	wadies
RKL	rock on land (includes exposed rock on hill summits)	WLL	well (dug or drilled source of water; some associated with nomadic campsites)
RKSL	rocks on land (includes rocky elevations)	WLLS	wells
RSTN	railroad station	WRCK	wreck (beached ship used as a place of habitation)
RUIN	ruin	WTRH	waterhole (place, usually in the bed of a watercourse, where water stands or can be obtained by shallow digging during the dry season; some have associated nomadic campsites)
RVN	ravine (short, steep, V-shaped watercourse)	WTCD	deltaic watercourse (minor watercourse connecting distributaries or other drainage features on a delta)
SBKH	sabkha (area of salt-impregnated ground without vegetation, intermittently wet from rainfall or seepage; slippery when wet, salt-encrusted when dry; occurs in depressions and other low-lying parts of deserts)		
SCRP	escarpment (more or less continuous line of cliffs or steep slopes facing in one direction, caused by differential erosion or faulting or both)		
SHOL	shoal (offshore hazard to navigation composed of unconsolidated material and having a least depth of ten fathoms or less)		
SPIT	spit (projecting tongue of beach material deposited by a coastal current)		
SPNG	spring		
STM	stream (river or other running fresh waterbody, perennial in all or a part of its course)		
STMA	anabranh (stream that leaves the main stream and rejoins it after a separate course for a considerable distance)		
STMI	intermittent stream (stream, no part of which is indicated as perennial)		
SVN	savanna (grassland with scattered trees; generally a plain)		
TMB	tomb		
TNLR	railroad tunnel		

Latitude and longitude. — The third and fourth columns indicate geographic coordinates, with longitude based on Greenwich. Coordinates were generally read to the nearest minute and are for finding purposes only.

Coordinates were read at the map symbol for populated places and other entities occupying limited sites, at the mouths or lower ends of streams, at the summits of mountains and hills, at the extremities of capes and points and near the centers or midpoints of other features.

Area number. — The number in the fifth column indicates the first-order administrative division (*cercle*) of Mauritania in which the place or feature is located, as listed below:

53900	Mauritania (general)	53907	Tagant
53901	Tiris-Zemmour	53908	Gorgol
53902	Baie du Lévrier	53909	Guidimaka
53903	Inchiri	53910	Assaba
53904	Adrar	53911	Hodh Occidental
53905	Trarza	53912	Hodh Oriental
53906	Brakna		

The general number (53900) is used for international features and for features in two or more *cercles*.

Locational reference.—A number other than 00 in the last column indicates a map on which the feature may be located by its standard name or a recognizable variant of its standard name, as follows:

- 01 West Africa 1:200,000 series, Service Géographique de l'Afrique Occidentale Française, 1955-58, and Institut Géographique National, Annexe de Dakar, 1959-64.
- 02 West Africa 1:500,000 series, Service Géographique de l'Afrique Occidentale Française and Institut Géographique National, Annexe de Dakar, 1937-61.
- 03 *Ouest Mauritanien: Coupure Spéciale*, Ministère des Travaux Publics et des Transports de la République Française. Institut Géographique National, Paris, and Service Géographique, Dakar, 1961; scale 1:500,000.
- 04 *Kédite Ijil*, Institut Géographique National, Paris, 1953; scale 1:20,000.
- 05 *Port Étienne*, Service Géographique de l'Afrique Occidentale Française, Paris, 1957; scale 1:20,000.
- 06 *Er Richat*, Institut Géographique National, Paris, 1952; scale 1:80,000.
- 07 *Cap Blanc*, Institut Géographique National, Paris, 1954; scale 1:100,000.
- 08 French hydrographic charts, Service Hydrographique de la Marine, Paris; various dates and scales.

The code 00 is used for cross-references and for standard names found only on references other than those listed above.

Glossary of generic terms

The following terms occur as the generic parts of standard names listed in the gazetteer. The meanings given include those supported by application to features named in the gazetteer, whether or not these meanings are given in dictionaries. The parenthetical items B, Fr, Fula designate Berber, French, and Fula words, respectively. The undesignated entries are Arabic.
