APPROVED FOR RELEASE: 2007/02/09: CIA-RDP01-00707R000100150010-1

FOREWORD

This gazetteer contains about 45,200 entries for places and features in Algeria. The entries include standard names approved by the Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The names in this gazetteer supersede those in all previous Board lists for the area.

The basic name coverage corresponds to that of maps at the scale of 1:200,000 for the northern part of the country and at 1:500,000 or 1:1,000,000 for the southern third of Algeria.

Entries include the names of first-, second-, and substantially all third-order administrative divisions, populated places of all sizes, various other cultural entities, and a variety of physical features.

Most of the entities can be identified and located by the approved name or a recognizable variant of the approved name on one or more of the following sources:

1. *Carte d'Algérie 1:200,000 Type 1960*, Institut Géographique National, Paris, 1960 to date.
2. *Carte des Régions Sahariennes 1:200,000*, Institut Géographique National, Paris, 1922 to date.
3. *Carte d'Afrique 1:500,000*, Institut Géographique National, Paris, 1961 to date.
4. *Carte Internationale du Monde 1:1,000,000 (OACI)* or *Carte de l'Afrique 1:1,000,000*, Institut Géographique National, Paris, 1961-69.

Evaluation

This gazetteer was prepared from maps ranging in scale from 1:25,000 to 1:1,000,000. Coverage for the country is fragmentary and varies widely as to date. Uniform coverage exists only at the smallest scale.

Northern Algeria, in general, exhibits coverage at the large and medium scales; i.e., 1:25,000, 1:50,000 and 1:200,000, all of which are based largely on aerial photography and field checking. A small proportion of these map sheets use the latest Institut Géographique National (IGN) orthography for Arabic and Berber toponymy.

The central and southeastern sections have coverage between the 1:200,000 and 1:1,000,000 scales. About 85 percent of the coverage is based upon aerial photography of the 1956-58 period. Only a few of the recently published maps employ the latest IGN spelling rules.

For much of the southern third of the country one must rely on 1:1,000,000 coverage of the period 1961-69. About 25 percent of the sheets of the period 1967-69 use the latest IGN spelling forms.

The quality of the names in this gazetteer and the accuracy of the explanatory and locational data vary from area to area according to the quality of the mapping. Those spellings which most closely conform to the latest IGN spelling rules have been given precedence in selection of names for approval.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to machine tabulation.

Name.—Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "sec." Names containing generic elements preceding the specific term (except names of populated places) are alphabetized by the specific part; thus *Guelb Aaou*, the name of a hill, is listed as *Aaou, Guelb*. Where part of a name is underlined, the use of the part not underlined is optional. If two or more names are

approved for a feature, each is identified in parentheses and any or all may be used.

Language labels are used to identify alternate local names of noninternational features. Local names of international features are identified by major-political-entity labels. Where only one country is identified parenthetically, no name is available for the feature in the other country.

The diacritical marks used in approved names of Algeria are the grave (`), acute (^), and circumflex (~) accents, the cedilla (`) and the dieresis ("). These marks are to be used whether the names are written in capital or lowercase letters. In addition, the apostrophe is used to indicate contraction in French name elements and to represent the consonant 'ayn in Arabic and Berber words.

In writing Algerian names in capital and lowercase letters, the Arabic articles *el*, *ech*, *ed*, *edj*, *en*, *er*, *es*, *et*, *ez*, the Berber particles, *a-n*, *a-m*, *i-n*, *-n*, *oua*, *oua-n*, *oui*, *ta*, *ta-n*, *ti*, *ti-n*, *ti-m*, and all French articles, prepositions, and conjunctions are written in lowercase except when in initial position in a name.

Names in this gazetteer are given in a French orthographic form because of the paucity of source materials in Arabic script. The manifold transcription systems utilized in the source materials precluded the rendering of recurring elements of names in a single standardized form.

Designation.—The second column contains designations or abbreviations of designations of the entities to which the names apply, as listed below. Because practically all geographic terms have varied meanings, the senses in which many of the designations are applied in *this gazetteer* are stated in the list to reduce ambiguity. It should be noted also that the differentiations of terms that can be made in any gazetteer will vary with the quality of the maps of the area and with the nature of the entities that are named. In Algeria some of the features do not fit precisely into the categories used to designate them and others could be designated in two or more ways.

ADM_D first-order administrative division (*wilaya*); second-order administrative division (*daira*); third-order administrative division (*commune*)

AREA	area (tract of land identified by a name, but without homogeneous character or established boundaries; may be identified and named for characteristics which no longer pertain to it; not considered to be a tribal area)
BAY	bay (coastal indentation of a size intermediate between a gulf and a cove)
BCH	beach (deposit of sand or other unconsolidated material along a shore)
BDG	bridge
BLDG	buildings(s)
BNKM	marine bank (an elevation of the sea floor located on a shelf and over which the depth of water is relatively shallow but sufficient for safe surface navigation)
BSN	basin (more or less saucer-shaped region delimited by a drainage system, physical relief, and/or geologic structure)
BUTE	butte(s) (isolated flat-topped hill with steep sides)
CAPE	cape (seaward end of a projection of land of such position and size as to cause offshore coastwise shipping to change course)
CAVE	cave(s) (underground cavity, usually in soluble rock)
CH	church
CHAT	chateau
CHN	channel
CLF	cliff(s) (high, steep rock face overlooking a lower area, such as a waterbody, coastal lowland, or valley)
CMP	camp
CMPM	military camp
CMTY	cemetery
CNLD	drainage canal
CNLI	irrigation canal
COVE	cove (small bay)
CRTR	craters (generally circular central depressions in volcanic cones)
CTR _R	religious center
CUET	cuesta (asymmetrical ridge or series of hills formed on tilted strata of hard rock overlying softer rock)

CVSY	caravansary	HLLS	hills
DAM	dam (barrier constructed across a stream to impound water)	HMDA	hamada (stony plain or upland in a desert)
DCKB	docking basin (part of a harbor where ships dock)	HSEF	forester's house (forester's houses)
DPR	depression(s) (lower area wholly or largely surrounded by higher land; ordinarily has interior drainage and does not conform to the valley of a single stream; includes small depressions (<i>dayas</i>) characterized by uncertain water supply but conducive to a plant community suitable for grazing)	INDS	industrial area
DSRT	desert (region characterized by arid climate, barren soil, and sparse xerophytic vegetation)	INLT	inlet (small, narrow indentation in a coast)
DUNE	dune(s) (hill or ridge of sand formed by the action of wind)	INN	inn
ERG	erg (desert area of shifting sand)	ISL	island (includes elevated areas in sabkhas)
EST	estate (commercialized, usually one-crop agricultural landholding with associated dwellings and other facilities, having unified ownership and management but requiring more than a single-family labor force)	ISLP	land-tied island (island-like feature connected to a larger land area by a narrow isthmus)
FORD	ford (place where a stream may be safely crossed without a bridge or boat)	ISLS	islands
FRM	farm (small agricultural unit consisting of a farmstead and associated land, usually identified by the term <i>azib, ferme, or mechta</i>)	LBED	lakebed (dried-up or drained area of a former lake, marsh or other standing waterbody)
FRMS	farms	LCTY	locality (minor area or place of unspecified or mixed character and indefinite boundaries)
FRST	forest; woods	LK	lake
FT	fort (defensive structure or works, generally of little or no present military significance; may be in a state of ruin)	LKI	intermittent lake (seasonal waterbody which becomes a lake during periods of rain but which dries up or becomes a marsh or waterhole during the dry season)
GASF	gasfield (area containing a subterranean store of natural gas of economic value)	LKN	salt lake
GRGE	gorge(s) (relatively narrow, steep-sided segment of a streamcourse)	LT	lighthouse
GULF	gulf (large, broad waterbody indenting a coast)	MESA	mesa (flat or nearly flat landform less extensive than a plateau with abrupt or steeply sloping side or sides)
HBR	harbor (body of water providing shelter for ships)	MFG	factory
HDLD	headland (conspicuously high piece of land jutting out into or fronting the sea)	MKT	market place
HLL	hill (landform of moderate relief, moderate elevation, and small summit area)	ML	mill
		MN	mine
		MNMT	monument
		MNQ	abandoned mine
		MNS	mines
		MRSH	marsh (wetland characterized by grasses or bush vegetation and few or no trees)
		MSQE	mosque
		MSSF	massif (elevated, generally mountainous block of the earth's crust)
		MT	mountain (landform of conspicuous relief, moderate to high elevation, and small summit area)
		MTS	mountains; mountain range; mountain system

NVB	naval base	PS	power station
OAS	oasis (watered area in desert, usually with cultivation dependent on irrigation or a shallow ground water table)	PT	point (minor projection of land into a waterbody, or its extremity)
OILF	oilfield (district containing a subterranean store of petroleum of economic value)	RDGE	ridge (enlongated, relatively narrow relief feature with a more or less continuous crest)
PASS	pass (way over, through, or between mountains or other high land); gap (low place in the relatively even crestline of a ridge or other elongated relief feature, apparently not used as a pass)	RDST	roadstead (area of navigable water, less protected than a harbor, suitable for the passage and anchorage of ships)
PCLI	independent political entity (republic)	REG	reg (desert area with a surface of loose stones or pebbles)
PEN	peninsula (area of land projecting into and largely, but not entirely, surrounded by water)	RES	reserve (land set aside for unknown, multiple or unspecified purposes)
PK	peak (separately named summit on a more extensive elevation)	RF	reef (offshore consolidated rock hazard to navigation with a least depth of twenty meters [or ten fathoms] or less)
PKS	peaks	RGN	region (large area recognized as an entity by reason of the unity of its history, people, landscape, or other condition or a combination of conditions)
PLAT	plateau (extensive elevated area of flat to rolling surface; may exhibit considerable local relief due to dissection or the presence of hills or mountains rising above the general surface level)	RKL	rock on land (boulder, pinnacle, crag, or other rock or rock outcrop situated on land)
PLN	plain (landform of low relief, slope, and elevation)	RKSL	rocks on land
PMPO	oil pumping station	RKSW	rocks in water (rocks of such character and importance as to be identified by name, situated either above or below the surface of a body of water; often associated with reefs but separately named)
PMPW	water pumping station	RKW	rock in water; stack
PND	pond (small standing waterbody)	RSTN	railroad station (building used for the transaction of railroad business, located beside a railroad track at a point where trains regularly stop to take on and discharge passengers or freight)
POOL	pool (small body of water in the bed of an intermittent stream or wadi)	RSTP	railroad stop
PPL	populated place (city, town, village, settlement)	RSTQ	abandoned railroad station, abandoned railroad stop
PPLL	populated locality (named place or area similar to a locality but with a small group of dwellings or other buildings)	RUIN	ruin(s) (structure in a state of ruin, but not necessarily of great antiquity or archeological interest)
PPLQ	abandoned populated place	RVN	ravine(s) (short, steep, V-shaped watercourse)
PPLX	section of populated place (part of a city or suburb contiguous thereto)	SALT	salina (salt-evaporation field, usually diked and ditched)
PRK	park (city park)		
PROM	promontory (piece of an area of high, generally flat land jutting into surrounding lower land; similar to a headland except for its inland location)		
PRT	port (place where water-borne cargo is transferred to and from ships, including facilities for berthing ships and handling cargo)		

SBKH	sabkha (area of salt-impregnated ground without vegetation, intermittently wet from rainfall or seepage; slippery when wet, salt-encrusted when dry; occurs in depressions; includes salt marshes)	WETI	intermittent wetland (seasonally wet area with unspecified vegetation)
SCH	school	WLL	well (dug or drilled source of water)
SCRP	escarpment (more or less continuous line of cliffs or steep slopes facing in one direction, caused by differential erosion or faulting or both)	WLSS	wells
SEA	sea	WTQ	abandoned watercourse (former course of a stream)
SHRN	shrine	WTRH	waterhole (place, usually in the bed of a watercourse, where water stands or can be obtained by shallow digging during the dry season)
SITE	archeological site	<p><u>Latitude and Longitude.</u>—The third and fourth columns indicate geographic coordinates, with longitude based on Greenwich. Coordinates were generally read to the nearest minute and are for finding purposes only.</p>	
SLP	slope (gradient on the side or end of a mountain or other relief feature, less steep than a cliff)		
SPA	spa (health resort, usually associated with mineral or thermal springs)		
SPNG	spring(s)		
SPUR	spur (sloping ridge extending laterally from a mountain or other elevation; extremity of a dune)		
STM	stream (may include intermittent as well as perennial streams)		
STMC	canalized stream (stream that has been canalized, ditched, diked or straightened for any purpose, yet retains in part the characteristics of the original stream)		
STMM	stream mouth		
STMX	section of stream (separately named part of a continuous stream not necessarily delimited by significant confluences)		
SWMP	swamp (wetland, generally with trees)		
TMB	tomb		
TOWR	tower		
TRB	tribal area		
TRGD	interdune trough (elongated corridor between parallel dunes or areas of dunes)		
VAL	valley (area drained by a stream, or a named segment of such an area)		
WAD	wadi (watercourse or drainageway that carries only occasional flows of water)		
WADS	wadies

Glossary of generic terms

The following terms occur as the generic parts of standard names in the gazetteer. The English term or terms which correspond to each local term were applied after objective study of cartographic and other source materials, and do not necessarily

reflect dictionary or other normalized usages. The parenthetical abbreviations (B) and (Fr) designate Berber and French words, respectively; the remainder are Arabic.

9 FEB 1973

Created in 1849, the Department of the Interior—America's Department of Natural Resources—is concerned with the management, conservation, and development of the Nation's water, wildlife, mineral, forest, and park and recreational resources. It also has major responsibilities for Indian and Territorial affairs and for standardization of Federal usage of both domestic and foreign geographic names.

As the Nation's principal conservation agency, the Department works to assure that nonrenewable resources are developed and used wisely, that park and recreational resources are conserved for the future, and that renewable resources make their full contribution to the progress, prosperity, and security of the United States—now and in the future.
