British Solomon Islands Protectorate and Gilbert and Ellice Islands Colony

OFFICIAL STANDARD NAMES

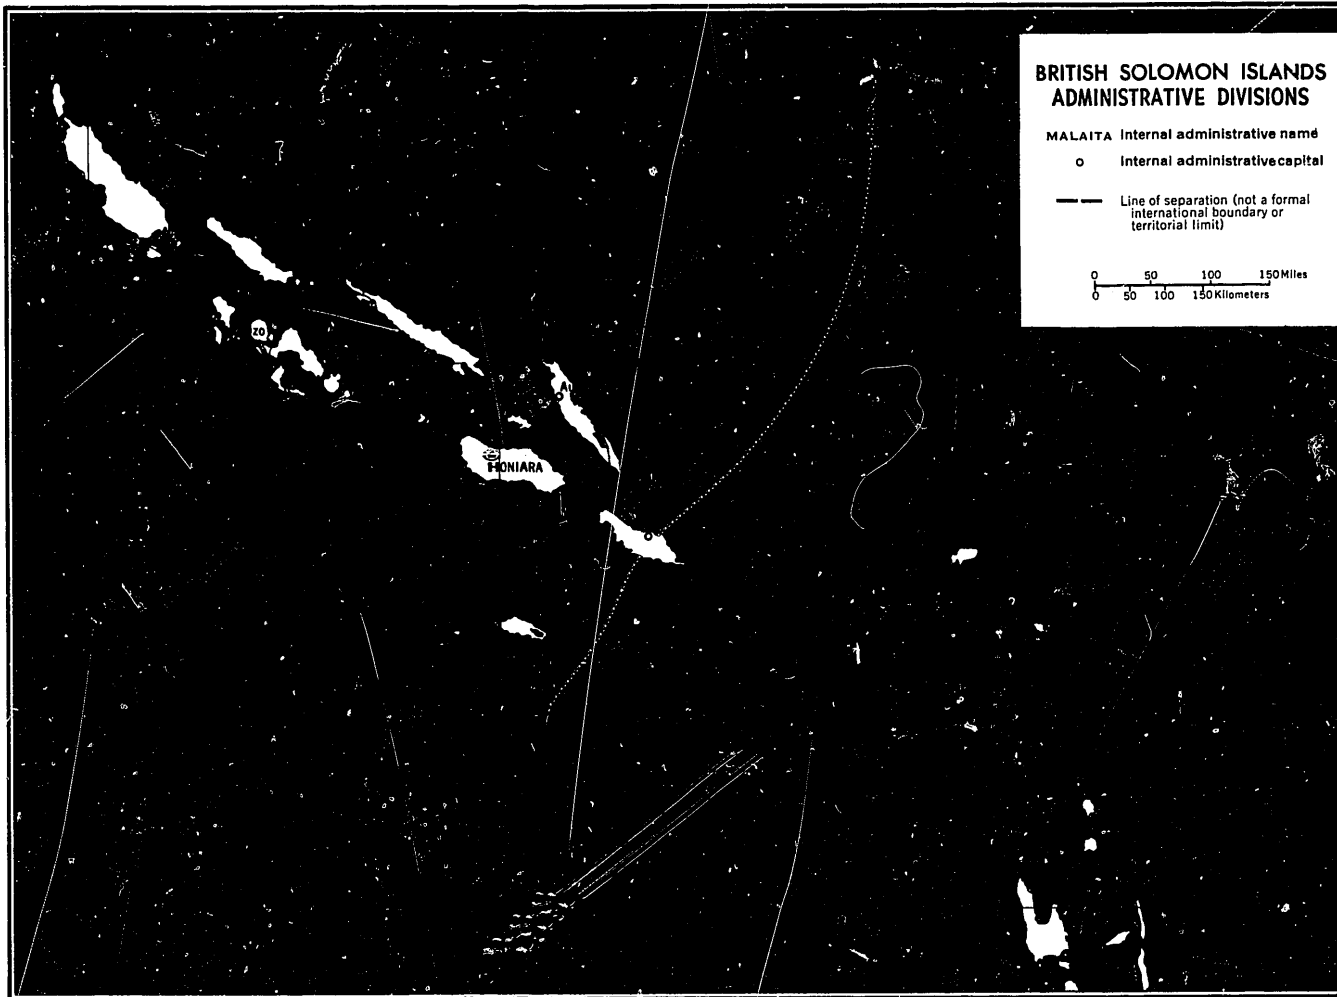

approved by the

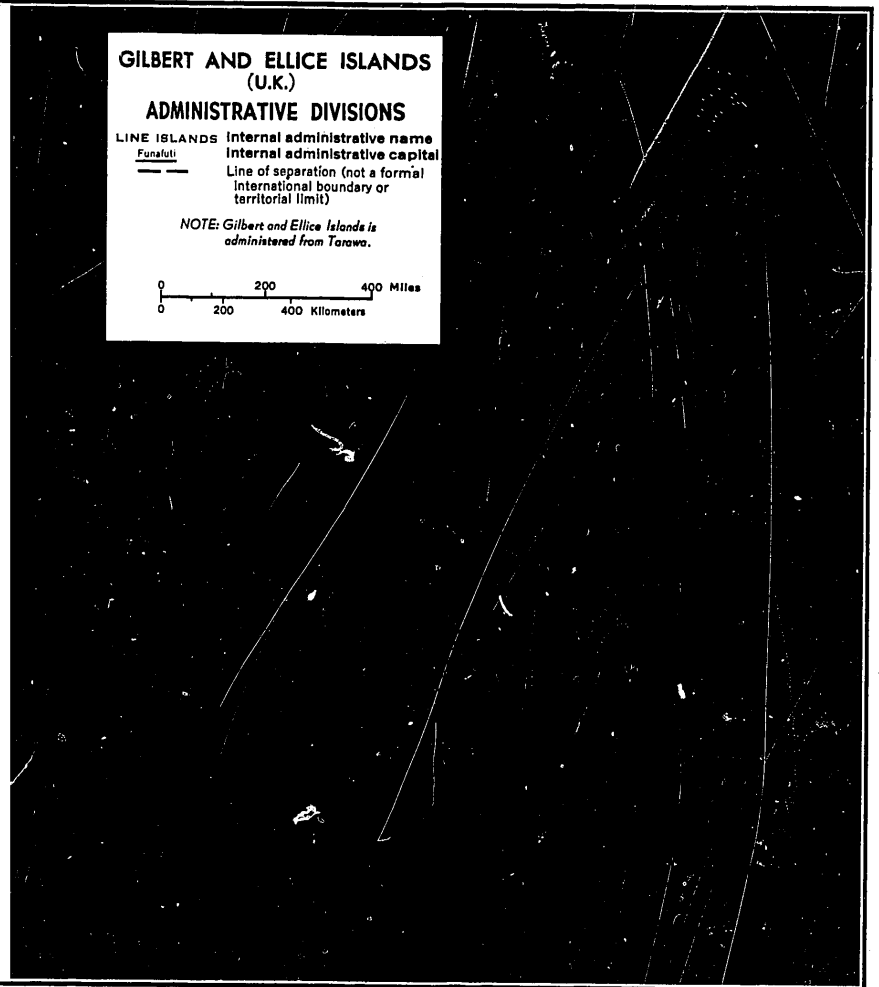

UNITED STATES BOARD ON GEOGRAPHIC NAMES

Prepared by the

Defense Mapping Agency Topographic Center

Washington, D. C. 20315, May 1974

FOREWORD

This gazetteer contains about 12,450 entries for places and features in the British Solomon Islands Protectorate (11,600) and the Gilbert and Ellice Islands Colony (850); both located in the southwestern part of the Pacific Ocean.

The locational maps (opposite) delineate the area covered by this gazetteer. The British Solomon Islands Protectorate lies within the area 5° to 12° South latitude and 155°30' to 169°45' East longitude. The Protectorate includes the main islands of Guadalcanal, Malaita, San Cristobal, New Georgia, Santa Isabel, and Choiseul; the smaller Florida Islands and Russell Islands; Alu, Mono, Vella Lavella, Kolombangara, Ranongga, Gizo, and Rendova islands; to the east, Nendö and Tikopia islands, Reff Islands, and Duff Islands; Rennell and Bellona islands in the south; Ontong Java to the north; and numerous smaller islands.

The Gilbert and Ellice Islands Colony comprises the outlying Ocean Island and four groups of atolls: the Gilbert, Ellice, Phoenix, and Line Islands.

The U.S. Possessions, Jarvis Island, Palmyra Island, and Kingman Reef in the Line Islands group, are not included in this publication.

The United States claims Nukufetau Atoll, Funafuti Atoll, Nukulailai Atoll and Nurakita (Ellice Islands District) as well as Christmas, Malden, Starbuck, Caroline, Vostok and Flint Islands (Line Islands District).

In the Gilbert Islands District the U.K. and U.S. exercise control in common over Canton and Enderbury Islands. In addition the U.S. claims McKean, Birnie, Phoenix, Gardner, Hull and Sydney Islands.

The names in this gazetteer supersede those in all previous Board lists for the areas concerned.

The entries in this gazetteer include standard names approved by the Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

Entries include the names of first-order administrative divisions, populated places of different sizes, various other cultural entities, and a variety of topographic and hydrographic features.

Several undersea features which lie wholly or partly outside territorial waters are also included in this gazetteer. The names of such features are spelled in the form approved by the U.S. Board on Geographic Names (BGN) and the Secretary of the Interior on the recommendation of the BGN Advisory Committee on Undersea Features.

The map scale of name coverage for the British Solomon Islands is 1:50,000 for the entire area except for the Russell Islands and the Santa Cruz Islands which are covered at the scale of 1:250,000. Coverage for the Gilbert and Ellice Islands varies with individual British Admiralty charts.

Most of the entities can be identified and located by the approved name or a recognizable variant of the approved name on one of the following sources:

1. *British Solomon Islands Protectorate*, Directorate of Overseas Surveys (DOS), Honiara, Guadalcanal, British Solomon Islands Protectorate (BSIP), 1969; scale 1:1,000,000.

2. *1:50,000 British Solomon Islands Protectorate, Santa Isabel*, DOS, Honiara, BSIP, or Tolworth, Surrey, England, 1969-70.
3. *1:50,000 British Solomon Islands Protectorate, New Georgia*, DOS, Honiara or Tolworth, 1968-70.
4. *Solomon Islands 1:50,000, Florida Group*, DOS, 1968.
5. *1:50,000 British Solomon Islands Protectorate, Shortland Islands*, DOS, Honiara or Tolworth, 1965-67.
6. *Malaita, 1:50,000, Sketch Map*, DOS, 1967.
7. *Solomon Islands Protectorate 1:50,000, Guadalcanal Island*, Director of Military Survey, Ministry of Defence, United Kingdom, 1968.
8. *British Solomon Islands, Choiseul, Sketch Map*, Director of Military Survey, Ministry of Defence, United Kingdom, 1968; scale 1:50,000.
9. *British Solomon Islands, San Cristoval, Sketch Map*, Director of Military Survey, Ministry of Defence, United Kingdom, 1968; scale 1:50,000.
10. British Admiralty charts, Hydrographic Department, Admiralty, London, various dates and scales.

The following sources were found to be particularly helpful in the preparation of this gazetteer:

1. *Solomon Islands Gazetteer*, Lands and Surveys Department, British Solomon Islands Protectorate, Government Printing Office, Honiara, 1969.
2. *A Guide to the Spelling and Pronunciation of Place Names in the British Solomon Islands Protectorate*, Lands and Surveys Department, produced under the Auspices of the Geographical Names Committee, Honiara, BSIP, 1968. (See especially: "A List of Principal Names in the British Solomon Islands Protectorate Spelt According to Rules Given in this Guide," pp. 15-18.)

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

Name.—Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see." Names containing generic elements preceding the specific term (except names of populated places) are alphabetized by the specific part; thus *Mount Austen*, the name of a mountain, is listed as *Austen, Mount*. Where part of a name is underlined, the use of the part not underlined is optional. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used.

Diacritical marks occurring in names in the Gilbert and Ellice Islands Colony are the grave accent (`), the dieresis (¨), and the apostrophe ('). Only the apostrophe (') occurs in names in the British Solomon Islands Protectorate section of the gazetteer where, because of printing limitations, it appears as a tick mark ('). The diacritical marks are to be used whether the names are written in capital or in a combination of capital and lowercase letters. The initial letter of each name element, whether separated by a hyphen or a space, should be capitalized.

Designation.—The second column contains designations or abbreviations of designations, as listed below. Because practically all geographic terms have varied meanings, the senses in which the designator terms are used and the range of features to which they are applied in *this gazetteer* are stated in the list to reduce ambiguity. The distinctions that can be made in a given gazetteer will vary with the quality of the maps of the area and with the nature of the entities that are named. Some of the features named in this gazetteer do not fit precisely into the categories used to designate them and others could be designated in two or more ways.

ADMD	first-order administrative division (district)	CRTR	crater (generally circular central depression in a volcanic cone)
ANCH	anchorage (place within a harbor or roadstead where ships may anchor)	ENTR	entrance (opening from the sea into a lagoon or bay, not necessarily important to navigation)
AREA	area (tract of land identified by a name, but without homogeneous character or established boundaries; may be identified and named for characteristics which no longer pertain to it)	ESTA	plantation (large, commercialized agricultural landholding with associated dwellings and other facilities, having unified ownership and management but requiring more than a one-family labor force, and specializing in a single tropical or subtropical cash crop)
ATOL	atoll ([1] ring of coral reef with low-lying islands substantially enclosing a lagoon; [2] non-elevated limestone structures with dry land, with or without a lagoon, and not exceeding 25-30 feet in height)	FLL	waterfall
BAR	bar (deposit of waterborne materials at or below the water level)	FLTT	tidal flat (coastal area alternately submerged and exposed by the tide)
BAY	bay (coastal indentation of a size intermediate between a gulf and a cove)	FRM	farm (small agricultural unit consisting of a farmstead and associated land, usually owned and operated by a single family)
BCH	beach (deposit of sand or other unconsolidated material along a shore)	GRGE	gorge (relatively narrow, steep-sided part of a streamcourse)
BDG	bridge	HBR	harbor (body of water providing shelter for ships)
BSNU	undersea basin (depression of the sea floor more or less equidimensional in form and of variable extent)	HLL	hill (landform of moderate relief, moderate elevation, and small summit area)
CAPE	cape (seaward end of a projection of land of such position and size as to affect the course of ships)	HLLS	hills
CAVE	cave(s) (underground cavity, usually in soluble rock)	HSPH	leprosarium
CHNM	marine channel (channel between coastal islands, reefs, or shoals; between an offshore feature and the mainland; or through a shallow marine water body)	INLT	inlet (small, narrow indentation in a coast)
CLF	cliff (high, steep rock face overlooking a lower area, such as a water body, coastal lowland, or valley)	ISL	island
COVE	cove (small bay)	ISLF	artificial island
CRKT	tidal creek (watercourse tidal in all or most of its length; usually short, without extensive tributary drainage areas, and located in coastal marsh or other wetland)	ISLS	islands
		ISLX	section of island
		KNLU	undersea knoll (an elevation rising less than 1,000 meters [or 500 fathoms] from the sea floor and of limited extent across the summit)
		LCTY	locality (minor area or place of unspecified or mixed character and indefinite boundaries)
		LGN	lagoon (water body along a coast wholly or largely cut off from the sea or other major water body)
		LGNS	lagoons
		LK	lake
		LKS	lakes

MLSW	sawmill	RF	reef(s) (offshore consolidated rock hazard to navigation with a least depth of twenty meters [or ten fathoms] or less)
MSSN	mission	RISU	undersea rise (a long, broad elevation that rises gently and generally smoothly from the sea floor)
MT	mountain (landform of conspicuous relief, moderate to high elevation, and small summit area)	RKL	rock on land (boulder, pinnacle, crag, or other rock or rock outcrop situated on land)
MTS	mountains; mountain range	RKSW	rocks in water
OCN	ocean	RKW	rock in water (individual rock of such character and importance as to be identified by name, situated either above or below the surface of a body of water; often associated with reefs but separately named)
PASS	pass; gap (way over or between mountains or other high land)	RUIN	ruin (structure in a state of ruin, but not necessarily of great antiquity or archeological interest)
PCLD	dependent political entity (protectorate: British Solomon Islands Protectorate) (colony: Gilbert and Ellice Islands Colony)	SCH	school
PEN	peninsula (area of land projecting into and largely, but not entirely, surrounded by water)	SD	sound (broad, open body of marine water more or less circumscribed by islands, rocks, shoals, and/or the mainland)
PIER	pier (long, narrow structure extending into the water to afford a berthing place for vessels)	SDL	saddle (moderately lower place between two summits or other high places on a ridge or mountain)
PK	peak (separately named summit on a more extensive elevation)	SEA	sea
PND	pond (small standing water body)	SHOL	shoal(s) (offshore hazard to navigation composed of unconsolidated material and having a least depth of twenty meters [or ten fathoms] or less)
PPL	populated place (town, village, settlement)	SITE	site (place of traditional or religious significance)
PPLL	populated locality (collective name for a group of villages)	SMT	seamount (undersea mountain, the top rising 1,000 meters [or 500 fathoms] or more from the sea floor, and of limited extent across the summit)
PPLQ	abandoned populated place	SMTS	seamounts
PPLX	section of populated place (a quarter, district, or other part of a city or town locally considered as an entity, whether or not it has administrative functions)	SPIT	spit (low tongue of land, or a relatively long, narrow shoal extending from the shore)
PRK	national park	SPNG	hot springs
PT	point (relatively minor projection of land, or its extremity, into a water body)	STM	stream (river or other running, fresh water body, perennial in all or a part of its course)
PTGE	portage (route over which boats are carried between navigable waters)		
RDGE	ridge (elongated, relatively narrow relief feature with a more or less continuous crest)		
RDGU	undersea ridge (long, narrow elevation of the sea floor with steep sides and irregular topography)		
RDJC	road junction		
RDST	roadstead (area of navigable water, less protected than a harbor, suitable for the passage and anchorage of ships)		

STMA anabranh (lesser stream that leaves the main stream and rejoins it after following a separate course for a considerable distance)

STMD distributary (secondary watercourse carrying part of the drainage of a larger stream into another water body; characteristic of deltas)

STNA agricultural station

STRT strait (relatively narrow water passage connecting large bodies of water)

SWMP swamp (wetland characterized by the presence of trees)

TMT tablemount (seamount having a comparatively smooth flat top)

TRGU undersea trough (long depression of the sea floor, normally wider and shallower than a trench)

TRNU undersea trench (long, narrow and deep depression of the sea floor, with relatively steep sides)

VLC volcano (submarine volcano)

92402 Central District
 92403 Malaita District
 92404 Eastern District

GILBERT AND ELLICE ISLANDS COLONY

93600 Gilbert and Ellice Islands (general)
 93601 Ellice Islands District
 93602 Gilbert Islands District
 93603 Line Islands District

The general numbers 92400 and 93600, above, are used for features of the high seas, and also for topographic and hydrographic features that lie within two or more first-order administrative divisions.

Glossary of generic terms

The following terms occur as the generic parts of standard names in the gazetteer. The English term or terms which correspond to each local term were applied after objective study of cartographic and other source materials, and do not necessarily reflect dictionary or other normalized usages. The parenthetical abbreviation (P) designates words of Polynesian origin; the remainder are Melanesian.

akau (P) reef, shoal
 ava (P) entrance
 bea stream
 ghahira island
 konggu bay
 logu bay
 marau island
 motu (P) island
 momolu island
 note cape
 nusa island

Latitude and longitude.—The third and fourth columns indicate geographic coordinates, with longitude based on Greenwich. Coordinates were generally read to the nearest minute and are for finding purposes only.

Coordinates were read at the map symbol for populated places and other entities occupying limited sites, at the mouths or lower ends of streams, at the summits of mountains and hills, at the extremities of capes and points, and near the centers or midpoints of other features.

Area number.—The number in the fifth column indicates the first-order administrative division (district) in which the place or feature is located as listed below:

BRITISH SOLOMON ISLANDS PROTECTORATE

92400 British Solomon Islands (general)
 92401 Western District

patu island, rock in water
piongo stream
rakai (P) reef
tömotu island
tugele mountain
tusu island
vuru stream

Reporting of errors

It is requested that all who use this gazetteer aid in its correction for future editions by reporting errors to the Board on Geographic Names, Department of the Interior, Washington, D.C. 20240. A statement of the source of the correct information will be helpful.

Geographic names or their spellings do not necessarily reflect recognition of the political status of an area by the United States Government.

APPROVED FOR RELEASE: 2007/02/09: CIA-RDP01-00707R000100150013-8

Created in 1849, the Department of the Interior – America's Department of Natural Resources – is concerned with the management, conservation, and development of the Nation's water, wildlife, mineral, forest, and park and recreational resources. It also has major responsibilities for Indian and Territorial affairs and for standardization of Federal usage of both domestic and foreign geographic names.

As the Nation's principal conservation agency, the Department works to assure that nonrenewable resources are developed and used wisely, that park and recreational resources are conserved for the future, and that renewable resources make their full contribution to the progress, prosperity, and security of the United States – now and in the future.
