APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200040003-0

FOREWORD

This gazetteer contains about 37,500 entries for places and features in Libya. The entries include standard names approved by the Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The names in this gazetteer supersede those in all previous Board lists for the area.

Entries include the names of first-, second-, and third-order administrative divisions, populated places of all sizes, various other cultural entities, and a variety of physical features.

Most of the entities can be identified and located by the approved name or a recognizable variant of the approved name on one or more of the following sources:

1. *Libya 1:50,000, Series P761, Army Map Service (now Defense Mapping Agency Topographic Center), 1961-1964.*
2. *Joint Operations Graphics (G) 1:250,000, Series 1501, Army Map Service/U.S. Army Topographic Command, 1966-1970.*

Evaluation

Names in this gazetteer were derived principally from 1:50,000 to 1:2M scale maps of the 1940-1970 period and from 1958-1964 bilingual field classification data. Complete map coverage was available only at the smallest scale. Northern Libya is in general well mapped at the large and medium scales; i.e., 1:50,000 to 1:400,000. The 1:50,000 and 1:250,000 series are based largely on aerial photography and field classification. The older 1:100,000 and 1:400,000 series, used for amplification and corroboration, employ the orthography of the Istituto Geografico Militare (IGM), and have associated gazetteers, each in Arabic and Italian.

Part of southwestern Libya is covered at the scales of 1:250,000 and 1:400,000; part of the southeastern section, at 1:400,000 and 1:2M.

For southern Libya 1:1M and 1:2M coverage of the 1958-1962 period was utilized; the most noteworthy source being the *Topographic Map of the United Kingdom of Libya*, 1:2M with Arabic and romanized forms of names, the latter spelled in terms of the 1956 BGN/PCGN System of Transliteration for Arabic. Arabic names, from whichever source derived, were subjected to review by staff linguists for determination of correct lexical and grammatical form and romanization.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in this gazetteer in order to accommodate it to machine tabulation.

Name.—Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see." Names containing generic elements preceding the specific term (except names of populated places) are alphabetized by the specific part; thus '*Ayn al 'Abd*, the name of a well, is listed as '*Abd*, '*Ayn al*. Where part of a name is underlined, the use of the part not underlined is optional. If two or more names are approved for a feature, each is identified in parentheses and any or all may be used.

Language labels are used to identify alternate local names of noninternational features. Local names of international features are identified by major-political-entity labels. Where only one country is identified parenthetically, no name is available for the feature in the other country.

As far as possible, Arabic names in this gazetteer have been romanized from Arabic script according to the transliteration system used jointly by the Board on Geographic Names and the

Permanent Committee on Geographical Names for British Official Use (the BGN/PCGN 1956 System), which follows on pages xi-xv. It is almost always necessary to add missing symbols for short vowels (vowel points) in Arabic script and to rewrite dialectal forms in standard written Arabic. Names found written only in roman letters but recognizable as Arabic have been reconstructed into Arabic script and then transliterated.

In a few cases, where it was not possible to determine complete BGN/PCGN Arabic forms, names have been given in the form found in romanized sources and marked with an asterisk (*) preceding the designation; however, individual Arabic words recognizable in these names have been rendered in the system.

The diacritical marks used in approved Arabic names in Libya are the macron (¯), the cedilla (¸), and the acute accent (´). These marks are to be used whether the names are written in capital or lowercase letters. In addition, the apostrophe (') and the inverted apostrophe (`), representing the letters *hamzah* and *'ayn* respectively, frequently occur in Arabic names.

In writing Arabic names in capital and lowercase letters, every word in a name should be initially capitalized except the following when they are not name-initial: *wa* (and) and the definite article *al*, *aḷ*, *adh*, *al*, *an*, *ar*, *as*, *aṣ*, *ash*, *at*, *aḥ*, *ath*, *az* and *az*. In Italian names the initial letter of each word is capitalized except for noninitial articles, prepositions and conjunctions.

Designation.—The second column contains designations or abbreviations of designations of the entities to which the names apply, as listed below. Because practically all geographic terms have varied meanings, the senses in which many of the designations are applied in *this gazetteer* are stated in the list to reduce ambiguity. It should be noted also that the differentiations of terms that can be made in any gazetteer will vary with the quality of the maps of the area and with the nature of the entities that are named. In Libya some of the features do not fit precisely into the categories used to designate them and others could be designated in two or more ways.

ADMD	first-order administrative division (<i>muḥāfazat</i>); second-order administrative division (<i>mutaṣarrifiyat</i>); third-order administrative division (<i>mudiriyyat</i>)
ANCH	anchorage (place within a harbor or roadstead where ships may anchor)
ARCH	arch
AREA	area (tract of land identified by a name, but without homogeneous character or established boundaries; may be identified and named for characteristics which no longer pertain to it)
BAY	bay (coastal indentation of a size intermediate between a gulf and a cove)
BCH	beach (deposit of sand or other unconsolidated material along a shore)
BGHT	bight (open body of water forming a slight recession in a coastline)
BLDG	building (function not identified)
BRKS	barracks
BSNP	petroleum basin (areally extensive structural basin containing subterranean deposits of petroleum)
BUSH	bushes
CARN	cairn (heap of stones erected as a landmark or for other purposes)
CAVE	cave(s) (underground cavity, usually in soluble rock; may be used as granaries)
CH	church
CLDA	caldera (large, more or less circular depression formed by the collapse of a volcanic dome)
CLF	cliff (high, steep rock face overlooking a lower area, such as a water body, coastal lowland, or valley)
CMP	campsite
CMTY	cemetery
CONF	confederation (body of independent states more or less permanently united for joint action)
COVE	cove (small bay)
CRRL	corral (pen or enclosure for confining animals)
CSWY	causeway (raised roadway across wet ground or shallow water; sabkha crossing)

CTN	cistern(s) (storage place for water, usually masonry-lined and below ground level; includes some destroyed cisterns)	HLLS	hills
CTRR	religious center (school and/or mosque)	HMCK	hummock(s) (slightly elevated area in a wetland; characterized by firm, well-drained ground and consequent associations of soil and vegetation; elevated ground in a sabkha)
CULT	cultivated area (may include one or more wells and buildings)	HMDA	hamada (stony plain or upland in a desert)
DAM	dam (barrier constructed across a stream to impound water)	HSE	isolated house(s)
DIKE	levee (embankment to prevent inundation)	HSP	hospital
DPR	depression(s) (lower area wholly or largely surrounded by higher land; ordinarily has interior drainage and does not conform to the valley of a single stream; includes inconspicuous, shallow basins into which surrounding surface drainage flows)	INLT	inlet (small, narrow indentation in a coast)
DSRT	desert (region characterized by arid climate, barren soil, and sparse xerophytic vegetation)	ISL	island
DUNE	dune(s) (hill or ridge of sand formed by the action of wind)	LAVA	lava field
ERG	erg (desert area of shifting sand)	LBED	lakebed (site of former lake)
FLT	mudflat(s) (extensive mud deposit on a section of a broad valley floor)	LCTY	locality (minor area or place of unspecified or mixed character)
FRM	farm (small agricultural unit consisting of a farmstead and associated land, usually owned and operated by a single family)	LGN	lagoon (water body along a coast, largely or wholly cut off from the sea by a barrier beach or other depositional feature)
FT	fort (defensive structure or works, generally of little or no present military significance; may be in a state of ruin)	LK	lake (may include some spring-fed pools in sinkholes)
FTQ	abandoned fort	LKI	intermittent lake (seasonal water body which becomes a lake during periods of rain but which dries up or becomes a marsh or waterhole during the dry season)
GASF	gasfield (area containing a subterranean store of natural gas of economic value)	LT	lighthouse
GRVO	olive grove	MESA	mesa (flat or nearly flat landform less extensive than a plateau with abrupt or steeply sloping side or sides)
GRVP	palm grove	MFBS	baling station
GULF	gulf (large, broad waterbody indenting a coast)	MFC	cannery
HBR	harbor (body of water providing shelter for ships)	MFCQ	abandoned cannery
HLL	hill (landform of moderate relief, moderate elevation, and small summit area)	MFLM	limekiln
		MKT	market
		MNMT	monument
		MNQR	quarry
		MOLE	mole (massive structure of masonry or large stones serving as a pier or breakwater, or both)
		MSQE	mosque (Islamic house of public worship)
		MSSF	massif (elevated, generally mountainous block of the earth's crust)
		MT	mountain (landform of conspicuous relief, moderate to high elevation, and small summit area)

MTS	mountains	RDGE	ridge (elongated, relatively narrow relief feature with a more or less continuous crest)
OAS	oasis, oases (watered area in a desert, usually with cultivation dependent on irrigation or a shallow ground water table)	RDJC	road junction
OILF	oilfield (area containing a subterranean store of petroleum of economic value)	REG	reg (desert area with a surface of loose stones or pebbles)
OILJ	oil pipeline junction	RF	reef (offshore consolidated rock hazard to navigation with a least depth of twenty meters [or ten fathoms] or less)
OILW	oil well	RGN	region (large area recognized as an entity by reasons of the unity of its history, people, landscape, or other condition or a combination of conditions)
PASS	pass (way over, through, or between mountains or other high land)	RH	resthouse (structure maintained for the rest and shelter of travelers)
PCLI	independent political entity (republic)	RKL	rock on land (boulder, pinnacle, crag, or other rock or rock outcrop situated on land)
PEN	peninsula (area of land projecting into and largely, but not entirely, surrounded by water)	RKSL	rocks on land
PK	peak (separately named summit on a more extensive elevation)	RKSW	rocks in water
PKS	peaks	RKW	rock in water (individual rock of such character and importance as to be identified by name, situated either above or below the surface of a body of water; often associated with reefs but separately named)
PLAT	plateau (extensive elevated area of flat to rolling surface; may exhibit considerable local relief due to dissection or the presence of hills or mountains rising above the general surface level)	ROAD	road
PLN	plain (landform of low relief, slope, and elevation); coastal plain	RSTQ	abandoned railroad station
PMFO	oil pumping station	RSV	tank; water tank
PND	pond (small standing water body; may include spring-fed pools in sinkholes)	RUIN	ruin(s) (structure in a state of ruin, but not necessarily of great antiquity or archeological interest)
PNDI	intermittent ponds	SALT	salina (salt-evaporation field, usually diked and ditched)
PP	police post	SAND	sand sea (includes large tracts of desert sand not in the form of dunes)
PPL	populated place (city, town, village, settlement)	SBKH	sabkha(s) (area of salt-impregnated ground without vegetation, intermittently wet from rainfall or seepage; slippery when wet, salt-encrusted when dry; occurs in depressions and other low-lying parts of deserts)
PPLQ	abandoned populated place	SCH	school
PPLX	section of populated place (part of a city or contiguous urbanized area named as an entity but having no known administrative status)	SCHC	college
PRN	prison		
PRNJ	reformatory for juveniles		
PROM	promotory (piece of an area of high, generally flat land jutting into surrounding lower land; similar to a headland except for its inland location)		
PT	point (relatively minor projection of land into a water body, or its extremity)		

SCRP escarpment (more or less continuous line of cliffs or steep slopes facing in one direction, caused by differential erosion or faulting or both)
 SEA sea
 SHOR shore
 SHRN shrine
 SINK sinkhole (hole, cavern, or funnel-shaped cavity made in the earth by the action of water on the soil, rock, or underlying strata)
 SPNG spring(s); hot spring
 SPUR spur(s) (sloping ridge extending laterally from a mountain or other elevation)
 SQR city square
 STM stream (river or other running fresh water body, perennial in all or a part of its course)
 STNA agricultural station
 STOR store(s)
 TMB tomb(s)
 TOWR tower
 TRB tribal area
 TREE tree (often used as a desert landmark)
 TRL trail
 TRMO oil pipeline terminal
 UPLD upland (broad elevated area with low to moderate surface relief)
 VAL valley (area drained by a stream, or a named segment of such an area)
 WAD wadi (watercourse or drainageway that carries only occasional flows of water)
 WADJ wadi junction
 WADS wadies
 WADX section of wadi
 WLL well (dug or drilled source of water; includes some destroyed wells)
 WLLS wells
 WTRH waterhole(s) (place, usually in the bed of a watercourse, where water stands or can be obtained by shallow digging during the dry season)

Latitude and longitude.—The third and fourth columns indicate geographic coordinates, with longitude based on Greenwich. Coordinates were generally read to the nearest minute and are for finding purposes only.

Coordinates were read at the map symbol for populated places and other entities occupying limited sites, at the mouths or lower ends of streams, at the summits of mountains and hills, at the extremities of points, and near the centers or midpoints of other features.

Area number.—The number in the fifth column indicates the first-order administrative division (*nuḥāfazat*) of Libya in which the place or feature is located, as listed below:

51900	Libya (general)	51906	Darnah
51901	Al Jabal al Akḥḍar	51907	Charyān
51902	Al Khalij	51908	Miṣrātah
51903	Al Khums	51909	Sabhā
51904	Az Zāwiyah	51910	Ṭarābulus
51905	Banghāzī		

The general number (51900) is used for international features and for features in two or more first-order administrative divisions.

Glossary of generic terms

The following terms occur as the generic parts of standard names in the gazetteer. The English term or terms which correspond to each local term were applied after objective study of cartographic and other source materials, and do not necessarily reflect dictionary or other normalized usages. The parenthetical abbreviations (B) and (It) designate Berber and Italian words, respectively; the remainder are Arabic.

ābār	wells
abyār	cistern(s), wells(s)

TRANSLITERATION SYSTEM FOR ARABIC GEOGRAPHIC NAMES

BGN/PCGN 1956 System (Revised in 1972)

The BGN/PCGN 1956 System for the Arabic alphabet is designed for use in transliterating standard written Arabic. It was adopted by the BGN in 1946 and by the PCGN in 1956 and has been applied by the Board, so far as practicable, to the systematic romanization of geographic names in Syria, Lebanon, Jordan, Iraq, the Arabian Peninsula, the United Arab Republic (Egypt), Libya, the Sudan, and Tunisia.

The system is designed to bring about uniformity in the spelling of geographic names in Arabic-language areas by eliminating deviations resulting from pronunciation differences in various dialects, except as stated in the special rules.

In contrast to several other languages, uniform results in the transliteration of Arabic are difficult to obtain, since vowel points and some of the diacritical marks necessary for the certain identification of the Arabic words are almost always omitted from both handwritten and printed Arabic. It follows that the transliterator must be able to identify the words used in the names and must know their standard written Arabic spelling, their proper vowel pointing, and how to eliminate peculiarities resulting from dialectical variation. The problem is complicated in most Arabic-language areas by the fact that a large proportion of the geographic names are not available in the Arabic alphabet. This applies to Arabic names as well as to those of non-Arabic origin. Even when Arabic script is available it is not always possible to determine the proper vowel pointing from dictionaries and other reference tools.

The transliteration of the Arabic consonants, vowels, and diphthongs, with examples of the application to geographic names, is given in the tables. Hamzah, often omitted in such tables, is included in its logical position before alif as a consonant in order to avoid any question as to its proper treatment.

The notes and special rules explain details of transliteration not stated in the tables.

TABLE I

TRANSLITERATION OF THE ARABIC CONSONANTS

(Only the isolated forms of the letters are given; see any Arabic grammar or standard reference work for the combining forms in initial, medial, and final positions and for consonant ligatures.)

ARABIC LETTER	NAME OF LETTER	TRANSLITERATION	EXAMPLES AND REMARKS
ء	hamzah	omit (initial) ' (medial) ' (final)	أبو كمال Abū Kamāl بئر زيت Bi'r Zayt. See note 1. صنعاء Ṣan'ā'
ا	alif	omit	أم العمد Umm al 'Amad. See note 2.
ب	bā'	b	البحرين Al Baḥrayn
ت	tā'	t	الكوت Al Kūt. The combination of tā' with bā' can be rendered as t/h for bibliographical purposes. See notes 3 and 4.
ث	thā'	th	الثليوث Ath Thulaythuwāt. See remarks on tā'.
ج	jīm	j	الجزيرة Al Jazīrah
ح	ḥā'	ḥ	المحمودية Al Maḥmūdīyah. See note 5.
خ	khā'	kh	خيبر Khaybar. See remark on kāf.
د	dāl	d	دمهور Damanhūr. The combination of dāl with bā' can be rendered as d/h for bibliographical purposes. See note 4.
ذ	dhāl	dh	وادي الذهب Wādī adh Dāḥab. See remark on dāl.
ر	rā'	r	الروضة Ar Rawḍah
ز	zāy	z	الزاوية Az Zāwīyah
س	sīn	s	سليمانية Sulaymānīyah. The combination of sīn with bā' can be rendered as s/h for bibliographical purposes. See note 4.

NOTES

1. *Hamzab* is written in Arabic over all initial *alifs* except those which belong to the definite article *al* or bear a *maddab* (see note 10). When the purpose is to indicate the presence of the sound described as a glottal stop, it is written over internal and final *alif*, *wāw*, and *yā'* (without dots). *Hamzab* following *i* is written *◌ِ* (almost always the *yā'* is in the *◌ِ* or *◌ِ* form) and the dots are omitted. Example: *بشر*. *Hamzab* following *u* is written *◌ُ*. *Hamzab* following a long vowel is written *◌* without anything under it ("without a bearer"). The transliteration of *hamzab* (') should always be carefully distinguished from that of *'ayn* (').
2. *Alif* as such is not transliterated when it is bearer of *hamzab*, but see *fatḥab alif* and *alif maddab* in Table II. See also note 1 above and note 10.
3. An original *ṣā'* in certain endings is written *◌ِ* (i.e., *bā'* with two dots) and is called *ṣā' marbūṭab*. It is transliterated *h* (silent), except when followed by another word in a unitary expression, when it is transliterated *t*, as in *hamzab* (isolated form) and *hamzab al waḥl*. A pronounced final *bā'* occurs and for bibliographical purposes may be transliterated /h when a *fatḥab* precedes it (Al Marā/h). Cf. also note 4.
4. The two-letter symbols *th*, *kh*, *dh*, *ah*, and *gh* are convenient for use and easily comprehensible. The infrequent sequences of *t*, *k*, *d*, or *s* followed by *h* can be unequivocally transliterated for bibliographical purposes by the use of a slant line ("shilling," "solidus") to separate true *h* from a preceding *t*, *k*, *d*, or *s*; that is, *th* represents *ṭhā'*, but *t/h* stands for *ṭhā'* followed by *bā'*. Cf. also note 3.
5. Where special considerations are paramount, the sub-dot (*ḥ*, *ṣ̣*, *ḍ*, *ṭ*, *ẓ*) may be used in place of the cedilla (*ḥ̣*, *ṣ̣̣*, *ḍ̣*, *ṭ̣*, *ẓ̣*).
6. The letter *yā'* is also used in writing *alif maqṣūrab* in which the dots are omitted. See Table II.

SPECIAL RULES

1. Initial definite articles and prepositions should be capitalized and hyphens should not be used to connect parts of names; e.g., Ash Shāriqah and Tall al Lahm.
2. If any evidence is found for the use of the definite article in a name, the article will be used in the name chosen.
3. The Arabic word for God will be written Allāh.
4. Phrase names, commonly transcribed as one word, will be written in separate words. The definite article within such names will be written al, not ul; e.g., 'Abd Allāh, 'Abd ar Raḥmān, Dhū al Faqr.
5. The word ibn will be transliterated Bin wherever written without *alif*, that is, between two proper nouns; e.g., 'Umar Bin al Khaṭṭāb.
6. The Turkish word Paşa will be transliterated directly from Arabic script as Bāshā; the Turkish word Bey will be romanized as Bey in Egyptian names, no matter how written in Arabic-language sources, but in other Arabic areas as Bak where written *bā'-kā/* and as Bayk where written *bā'-yā'-kā/*.
7. The modern colloquial word Sīdī will be given precedence over the classical form Sayyidī. (This does not preclude the spelling Sayyidī if the latter is indicated by the Arabic script or other evidence - for instance if the *yā'* is written with *tasbīd*.)
8. The colloquial word Bū will not be changed to the classical form Abū.
9. The colloquial word for water written *maym-yā'-iā'* on Arabic maps will be transliterated Māyyat.
10. In place names of Aramaic origin in Lebanon and Syria with an initial cluster beginning with b plus another consonant such as l or h, initial clusters such as bl and bh will be written.
11. In names containing the words for "back, ridge, hill" appearing as either *ḥā'-bā'-rā'* or *ḡā'-bā'-rā'* in Arabic sources, the spelling used in the sources will be followed.

Created in 1849, the Department of the Interior—America's Department of Natural Resources—is concerned with the management, conservation, and development of the Nation's water, wildlife, mineral, forest, and park and recreational resources. It also has major responsibilities for Indian and Territorial affairs and for standardization of Federal usage of both domestic and foreign geographic names.

As the Nation's principal conservation agency, the Department works to assure that nonrenewable resources are developed and used wisely, that park and recreational resources are conserved for the future, and that renewable resources make their full contribution to the progress, prosperity, and security of the United States—now and in the future.
