

OFFICIAL STANDARD NAMES
for
Communist China
Vol. I—A—L

approved by the
UNITED STATES BOARD ON GEOGRAPHIC NAMES

This Gazetteer is issued under the NIS maintenance program. It supersedes the material on Mainland China, Volumes I and II, dated March 1952, Volume III, dated September 1955, and the volume on Administrative Divisions, dated May 1963. Volumes I, II, and the volume on Administrative Divisions should be destroyed.

FOREWORD

This gazetteer contains about 108,000 entries for places and features in Mainland China, including Tibet, Sinkiang, Inner Mongolia, and other "autonomous regions." Names for Chin-men Tao (Quemoy) and other offshore islands under the administration of the Republic of China are also included for convenience of reference, but names in Hong Kong, Macao, and Taiwan are not included. The entries consist of standard names approved by the Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The density of names is variable, reflecting the uneven coverage of map sources at comparable scales. Entries include the names of all first- and second-order administrative divisions (in addition to numerous special groupings between these two levels), populated places of various sizes, various other cultural entities, and a variety of physical features.

An effort has been made to obtain Chinese characters for all Chinese standard names from recent authoritative Chinese sources. Names available in Chinese characters have been romanized according to the Modified Wade-Giles transcription system as authorized by the Board on Geographic Names. This applies to many names of Mongolian, Tibetan, Turkic, and other language origin as well as to strictly Chinese names. Names for which Chinese characters are not available were taken, with or without modification, from roman-alphabet sources. Most of these apply to minor features in Tibet, Sinkiang, and Inner Mongolia.

A wide variety of Chinese and roman-alphabet sources were used in compiling the gazetteer, including both maps and textual materials. Most of the places and features can be identified on map series published by the Army Map Service at 1:250,000 or other scales. The names of all administrative divisions and their seats were taken from the 1965 Chinese administrative list which has been translated by the Joint Publications Research Service, Department of Commerce, under the title *Handbook of Admin-*

istrative Divisions of the People's Republic of China, 1965 (JPRS: 32,223). Offshore coastal features can generally be located on charts issued by the Naval Oceanographic Office. The *Atlas of the Republic of China*, volumes I-IV, The National War College, Taipei, Taiwan, 1960-63, is a useful general, small-scale reference for names in both romanized and Chinese form. Due to the Chinese practice of applying specific names of administrative divisions to the corresponding administrative seats, especially at the second-order or *hsien* level, coupled with the not uncommon shifting of administrative functions from village to village, the accurate location of villages by name is sometimes difficult. Also, difficulty may be encountered in the identification and location of other named entities as a result of the dissimilarity of various Chinese maps of the same area.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

Name.—Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see." Where part of a name is underlined, the use of the part not underlined is optional. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used. All names are listed by the specific element; thus Gulf of Tonkin is listed as Tonkin, Gulf of.

The diacritical marks used in approved names in Mainland China are, in names romanized by the Modified Wade-Giles system, the apostrophe (') and the dieresis (¨) and, in other approved names, the dieresis and the macron (˘). These marks are to be used whether the names are written in capital or in a combination of capital and lowercase letters.

In writing Chinese names in capital and lowercase letters the initial letter in each word, except those following hyphens, should be capitalized.

Designation.—The second column contains designations or abbreviations of designations, as listed below. Since practically all geographic terms have varied meanings, the senses in which the designator terms are used and the range of features to which they are applied in *this gazetteer* are stated in the list to reduce ambiguity. The distinctions that can be made in a given gazetteer will vary with the quality of the maps of the area and with the nature of the entities that are named. In Mainland China some of the features do not fit precisely into the categories used to designate them and others could be designated in two or more ways.

ADMD administrative division (first-order, second-order, or intermediate level)
 AGRA agricultural reclamation area
 ANCH anchorage (place within a harbor or roadstead where ships anchor)
 AREA area (tract of land identified by a name, but without homogeneous character or established boundaries; may be identified and named for characteristics which no longer pertain to it)
 BAR bar (deposit of water-borne materials at or below the water level)
 BAY bay
 BDG bridge
 BNKM marine bank (elevation of the sea floor over which the depth of water is more than ten fathoms, or twenty meters)
 BSN basin (more or less saucer-shaped region delimited by a drainage system, physical relief, and/or geologic structure)
 CAPE cape (seaward end of a projection of land of such position and size as to affect the course of ships)
 CARN cairn (heap of stones erected as a landmark or for other purposes; often has religious significance)
 CHNM marine channel (channel between coastal islands, reefs, or shoals, between an offshore feature and the mainland, or through a shallow marine water-body)

CHNS stream channel (separately named lesser channel around an island or bar in a stream)
 CNL canal (multipurpose or function undifferentiated)
 CNLD drainage canal
 CNLI irrigation canal
 CNLN navigation canal
 CNLX section of canal
 COVE cove
 CRKT tidal creek (watercourse tidal in all or most of its length, usually short, without extensive tributary drainage areas, and located in coastal marsh or other wetland)
 CTY country
 CTYX section of country
 DPR depression (lower area wholly or largely surrounded by higher land; ordinarily has interior drainage and does not conform to the valley of a single stream)
 DSRT desert
 ENTR entrance (opening from the sea into a lagoon, bay, or harbor)
 ESTY estuary (drowned lower part of a stream)
 FLTT tidal flat(s) (coastal area alternately submerged and exposed by tide)
 FT fort (defensive structure or works, generally of little or no present military significance; may be in a state of ruin); military post
 GATE city gate
 GLCR glacier
 GRGE gorge(s) (relatively narrow, steep-sided segment of a streamcourse)
 GULF gulf
 HBR harbor (body of water providing shelter for ships)
 HBRX section of harbor
 HDLD headland (conspicuously high piece of land jutting out into or fronting the sea)
 HLL hill (landform of moderate relief, moderate elevation, and small summit area)
 HLLS hills

HLT	halting place (on a caravan route)	PPL	populated place (city, town, village, or other agglomeration of buildings where people live and work; includes a variety of minor settlements symbolized on maps as having population)
INLT	inlet (small, narrow indentation in a coast)	PPLS	villages
ISL	island	PPLX	section of populated place (part of a city or contiguous urbanized area named as an entity but having no known administrative status; one of two or more minor settlements having a collective name)
ISLS	islands	PT	point (relatively minor projection of land into a waterbody, or its extremity)
ISLX	section of island	RCR	reach (relatively straight, low-gradient segment of a river)
ISTH	isthmus (narrow strip of land joining two wider land areas and separating two waterbodies)	RDGE	ridge (elongated, relatively narrow relief feature with a more or less continuous crest)
LCTY	locality (minor area or place of unspecified or mixed character)	RDST	roadstead (area of navigable water, less protected than a harbor, suitable for the passage and anchorage of ships)
LGN	lagoon (waterbody along a coast, largely or wholly cut off from the sea by a barrier beach or other depositional feature)	RF	reef (offshore consolidated-rock hazard to navigation with a least depth of ten fathoms or less)
LK	lake	RGN	region (large area recognized as an entity by reason of the unity of its history, people, landscape, or other condition or a combination of conditions)
LKN	salt lake(s)	RKSW	rocks in water
LKS	lakes	RKW	rock in water
LKX	section of lake	RPDS	rapids
MRSH	marsh (wetland characterized by grasses or bush vegetation and few or no trees); salt marsh	RSRT	resort (seashore recreational area)
MSTY	monastery	RSTN	railroad station
MT	mountain (landform of conspicuous relief, moderate to high elevation, and small summit area)	RSV	reservoir (large artificially impounded body of water)
MTS	mountains, mountain range, mountain system	RUIN	ruins
PAL	palace (summer residence of former royalty)	RVN	ravine (short, steep, V-shaped watercourse)
PASS	pass (way over or between mountains or other high land)	SAND	sand area (tract of sand not in the form of dunes or a beach)
PEN	peninsula	SD	sound (broad, open body of marine water more or less circumscribed by islands, rocks, shoals, and/or the mainland)
PGDA	pagoda (religious or other memorial, usually multi-storied and of tower-like design)	SEA	sea
PK	peak (separately named summit on a more extensive elevation)		
PLAT	plateau (extensive elevated area of flat to rolling surface; may exhibit considerable local relief due to dissection or the presence of hills or mountains rising above the general surface level)		
PLN	plain (landform of low relief, slope, and elevation)		
PLTX	section of plateau		
PND	pond		
POOL	pool		

SHOL shoal(s) (offshore hazard to navigation composed of unconsolidated material and having a least depth of ten fathoms or less)

SHRN shrine (object or place, with or without a building, memorializing a person, deity, or religious concept)

SITE archeological site (place containing the remains of prehistoric or ancient human life and culture); historical site

SPIT spit (projecting tongue of beach material deposited by a coastal current)

SPNG spring

STM stream

STMD distributary (lesser watercourse by which part of the drainage of a primary stream is dispersed on an alluvial fan; in China, neither deltaic nor coastal)

STMM stream mouth

STMX section of stream (part of a continuous stream to which a separate name is applied)

STRT strait (relatively narrow water passage connecting large bodies of water)

TMB tomb(s)

TMPL temple (edifice dedicated to religious worship)

TRR terrace (broad more or less level surface of intermediate elevation between higher and lower adjacent surfaces)

VAL valley (area drained by a stream, or a named segment of such an area)

WALL wall

WLL well

WTLD wetland (marsh, swamp, or other poorly drained area with a mixture of tree and grass vegetation or with unspecified vegetation)

Latitude and longitude.—The third and fourth columns indicate geographic coordinates, with longitude based on Greenwich. Coordinates were generally read to the nearest minute and are for finding purposes only.

Coordinates were read at the map symbol for populated places and other entities occupying limited sites, at the mouth or lower

ends of streams, at the summits of mountains and hills, at the extremities of capes and points, and near the centers or midpoints of other features. The positioning of features often differs widely on Chinese maps, and the coordinates for a given place may vary with the source.

Area number.—The number in the fifth column indicates the first-order administrative division in which the place or feature is located, as listed below:

44000	China (general)	44042	Tsinghai
44011	Shantung	44043	Tibetan Autonomous Region
44012	Kiangsu	44044	Sinkiang Uighur Autonomous Region
44013	Shanghai Municipality	44051	Kansu
44014	Anhwei	44052	Ningsia Hui Autonomous Region
44015	Chekiang	44053	Shensi
44016	Kiangsi	44054	Shansi
44017	Fukien	44055	Hopeh
44021	Kwangtung	44056	Peking Municipality
44022	Kwangsi Chuang Autonomous Region	44057	Inner Mongolian Autonomous Region
44023	Yunnan	44061	Heilungkiang
44024	Kweichow	44062	Kirin
44031	Hunan	44063	Liaoning
44032	Hupeh		
44033	Honan		
44041	Szechwan		

The general number (44000) is used for international features and for features in two or more first-order administrative divisions.

Glossary of generic terms

The following terms occur as the generic parts of standard names listed in the gazetteer. The meanings given include those supported by application to features named in the gazetteer, whether or not these meanings are given in dictionaries. (All terms not otherwise identified are Chinese.)
