July 1961

This Gazetteer is issued as a standard component of the National Intelligence Survey for the Arabian Peninsula and lists official standard names approved by the United States Board on Geographic Names. These names supersede all previous decisions on geographic names in this area. This Gazetteer also lists the variants of official standard names for reference purposes. These variants are not approved as standard names.

This Gazetteer will be adequately maintained by published revision.

Distribution of this publication is made by the Central Intelligence Agency and is for official use only.

FOREWORD

The gazetteer contains about 35,000 entries for places and features in the Arabian Peninsula and associated islands and waters. The entries include standard names approved by the Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The names in this gazetteer supersede those in all previous Board lists for the area.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

Name. — Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see." Where part of a name is underlined, the use of the part not underlined is optional. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used. Names that include specific and other elements (except names of populated places) are alphabetized by specific part; thus Al Jabal al Akhḡar is listed as Akhḡar, Al Jabal al, and Jabal ar Rish is listed as Rish, Jabal ar. Names beginning with a definite article are alphabetized under the article unless they contain a generic term.

The diacritical marks used in the approved names are the macron (ˉ) as in *bāb*, the acute accent (´) as in *marsá*, and the cedilla (¸) under certain *d*'s, *h*'s, *s*'s, *t*'s, and *z*'s, as in *rawḡat*, *ḡazm*, *ṣayhad*, *ḡawil*, and *ḡahr*. In addition there are letters (hamzah) and (ʿayn).

In writing Arabic names in upper- and lowercase letters, every word in a name should be capitalized except the following when they are not name-initial: *bil*, *wa*, and the definite article (*al*, *al*, *an*, *ar*, *as*, *as*, *ash*, *at*, *at*, *ath*, *az*, *az*; see Note 8 of the transliteration table).

So far as possible, and with the exception of conventional names such as those for major administrative entities and certain international features, names in the gazetteer have been romanized according to the system used jointly by the Board on Geographic Names and the Permanent Committee on Geographical Names for British Official Use (the BGN/PCGN System). This system requires that names be transliterated as though they were written in Arabic and that no concessions be made to dialectical forms except as explained in the notes accompanying the system.

Where it was not possible to determine complete BGN/PCGN forms because of disagreement among sources or where source material allowing transliteration or reconstruction in terms of the system was lacking, names have been given in the forms found in existing romanized sources and marked with an asterisk preceding the designation; however, individual words, where recognizable in such names, have been rendered in the system.

Designation. — The second column contains designations or abbreviations of designations, as listed below. Since practically all geographic terms have varied meanings, the senses in which the designator terms are used and the range of features to which they are applied in this gazetteer are stated for many terms in the list to reduce ambiguity. The distinctions that can be made by the designations in a given gazetteer will vary with the quality of the maps of the area and with the nature of the entities that have names.

ADMD	administrative division (amirate, district, municipality, principality, province, state, township, zone)
AERO	airfield, landing field, landing ground
ANCH	anchorage
AREA	area (named area without identifiable homogeneous characteristics)
BAY	bay

BCH	beach	FT	fort (includes some walled settlements)
BGHT	bight (broad body of water forming a slight recession in a coastline)	FTQ	abandoned fort
BNKM	marine bank	GRGE	gorge (narrow steep-sided part of a stream course); defile (narrow passageway)
BSN	basin (extensive depressed area without surface outlet into which the adjacent land drains; not clearly differentiated from a depression)	GRVP	palm grove
BSNH	headwater basin (area drained by the headwaters of several converging watercourses)	GULF	gulf
CAPE	cape	HBR	harbor
CARN	cairn (heap of stones erected as a landmark or for other purposes)	HDLL	headland (conspicuously high piece of land jutting out into or fronting the sea)
CAVE	cave(s)	HLL	hill
CHNM	marine channel	HLLS	hills, hill range
CLF	cliff(s) (high, steep rock face); bluff(s)	INLT	inlet (elongated indentation in a coast); tidal inlet
CMPN	nomadic camp site	ISL	island
CMPO	oil camp	ISLS	islands
CMTY	cemetery	ISTH	isthmus (narrow strip of land joining two wider land areas)
CONE	volcanic cone	LAVA	lava field(s)
COVE	cove	LCTY	locality (minor area of unspecified or mixed character)
CRTM	meteor craters	LDNG	landing place
CRTR	volcanic crater	LGN	lagoon (water body along a coast, wholly or largely cut off from the sea by a barrier beach)
CSTL	castle (includes residences of sultans or other rulers, sometimes fortified)	LKC	crater lake (lake in the crater of a volcanic cone)
CTN	cistern(s) (man-made place of water storage, sometimes hollowed out of rock; smaller than a reservoir)	LKN	salt lake
DAMQ	ruined dam	MESA	mesa(s) (flat or nearly flat area less extensive than a plateau and considerably higher than surrounding land from which it is separated by abrupt slopes)
DPR	depression(s) (area partially or wholly surrounded by higher land; often similar to a basin)	MN	mine
DSRT	desert	MND	mound (low hill of earth, natural or artificial)
DUNE	sand dune(s) (includes extensive areas of dune formation occurring as hills, ridges, and a wide range of other forms)	MNN	salt mine
FLT	salt flat (area of natural salt accumulation resulting from evaporation of interior drainage; similar to a salt pan)	MRSH	marsh, salt marsh
FLTT	tidal flat (coastal area alternately submerged and exposed by tide)	MT	mountain
		MTS	mountains, mountain range
		OAS	oasis
		OILF	oilfield
		PAL	palace
		PAN	salt pan(s) (area of natural salt accumulation; similar to a salt flat)

PASS	pass (way over or through an area of mountainous or high land); gap (low place in the relatively even crestline of a ridge or other elongated relief feature, apparently not used as a pass)	PT	point
PCLD	dependent political entity (colony)	QCKS	quicksands
PCLI	independent political entity (independent kingdom, independent sheikhdom, independent sultanate)	RDGE	ridge(s)
PCLQ	ancient country, ancient kingdom, former sultanate	RF	reef(s)
PCLS	semi-independent political entity(-ies) (semi-independent amirate, semi-independent protectorate, semi-independent sheikhdom, semi-independent sultanate)	RGN	region (large area recognized as an entity by reason of the unity of its history, people, or landscape)
PEN	peninsula	RKL	rock on land (applied to a variety of features, including those on coasts but not actually in the water, characterized by exposed rock surfaces, from boulders large enough to be named to isolated pinnacles or crags)
PK	peak	RKSL	rocks on land
PKS	peaks	RKW	rock in water
PLAT	plateau	RLG	religious site, shrine
PLN	plain(s)	ROAD	road, ancient road
PLTX	section of plateau	RSTN	railroad station
PMPO	oil pumping station (operated by remote control without permanent population)	RSTQ	disused railroad station (on discontinued line)
PND	pond (usually ephemeral, dependent on infrequent rainfall)	RSV	reservoir
PNDS	ponds	RUIN	ruin (ancient or more recent village or structure in a state of ruin)
POOL	pool(s)	RVN	ravine(s) (short, steep, V-shaped watercourse)
PPL	populated place (city, town, village, settlement, hamlet)	SAND	arid area
PPLQ	abandoned populated place	SBKH	sabkha (salt-impregnated ground without vegetation, intermittently wet from rainfall or seepage; slippery when wet, salt-encrusted when dry; occurs in depressions and along low coastlines)
PPLS	populated places (group of villages or other settlements)	SCRP	escarpment
PROM	inland promontory (a piece of an area of high land of generally low surface relief jutting out above surrounding lower land; used in this gazetteer only for inland features, similar features along coasts being designated headland)	SDL	saddle (a low place between two summits or conspicuously high places on a ridge or mountain, apparently not used as a pass, q.v.)
PRT	port (place, including facilities, for discharging or receiving water-borne cargo)	SEA	sea
		SHOL	shoal
		SITE	site (location of a former village or structure indicating human occupancy with scant remains of the original structure)
		SNK	sinkhole(s)
		SPNG	spring(s)

SPUR	spur (sloping ridge extending laterally from a mountain or other elevation)
STM	stream (perennial)
STNC	coast guard station
STRT	strait (large, relatively narrow, navigable passage connecting larger bodies of water)
TMB	tomb(s), necropolis
TOWR	tower
TRB	tribal area
TRIG	trigonometrical point
TRMO	oil pipeline terminal
UPLD	upland (elevated area of low to moderate relief)
VAL	valley
WAD	wadi (valley of an intermittent watercourse)
WADS	wadies
WADX	section of wadi
WLL	well, rainwell
WLLS	wells, rainwells
WTRH	waterhole(s), rainpool(s)

Latitude and longitude. — Coordinates, in the third and fourth columns, are for finding purposes only. They were generally read to the nearest minute. For precise location, large-scale maps should be used.

Coordinates were read at the map symbol for populated places and other entitles occupying limited sites, at the mouths or lower ends of streams, at one end of canals, at the summits of mountains and hills, at the extremities of capes, near the centers of areas, and at the midpoints of most other features.

Area number. — The number in the fifth column indicates the administrative or geographic unit in which the place or feature is located, as listed below:

- 41500 Arabia (General)
- 41502 Neutral Zone (Iraq-Saudi Arabia)
- 41503 Kuwait
- 41504 Neutral Zone (Kuwait-Saudi Arabia)
- 41505 Bahrain
- 41511 Colony of Aden, including Kamarân, Perim, and the Kuria Muria Islands.

The general number 41500 is used for features in major administrative units having indefinite boundaries and for international features.

Locational reference. — The number in the last column indicates a map, chart, or other source on which the feature may be located by its standard name or a recognizable variant of its standard name.

NOTES

1. *Hamzah* is written in Arabic over all initial *ali/s* except those which belong to the definite article *al* or bear a *maddab* (see note 10). When the purpose is to indicate the presence of the sound described as a glottal stop, it is written over internal and final *alif*, *wāw*, and *yā'* (without dots). *Hamzah* following *i* is written *ئ* (almost always the *yā'* is in the *ي* or *ج* form) and the dots are omitted. Example: *بشر*. *Hamzah* following *u* is written *ؤ*. *Hamzah* following a long vowel is written *ء* without anything under it ("without a bearer"). The transliteration of *hamzah* (') should always be carefully distinguished from that of *ayn* (ʿ).
2. *Alif* as such is not transliterated when it is bearer of *hamzah*, but see *fatḥab alif* and *alif maddab* in Table II. See also note 1 above and note 10.
3. An original *tā'* in certain endings is written *ت* (i.e., *\bā'* with two dots) and is called *tā' marbūḥab*. It is transliterated h (silent), except when followed by another word in a unitary expression, when it is transliterated t, as in *hamzah* (isolated form) and *hamzat al waṣl*. A pronounced final *bā'* occurs and for bibliographical purposes may be transliterated /h when a *fatḥab* precedes it (Al Marāḥ). Cf. also note 4.
4. The two-letter symbols th, kh, dh, sh, and gh are convenient for use and easily comprehensible. The infrequent sequences of t, k, d, or s (followed by h) can be unequivocally transliterated for bibliographical purposes by the use of a slant line ("shilling," "solidus") to separate true h from a preceding t, k, d, or s; that is, th represents *thā'*, but t/h stands for *tā'* followed by *bā'*. Cf. also note 3.

5. Where special considerations are paramount, the sub-dot (ḥ, ṣ, ḍ, ṭ, ḏ) may be used in place of the cedilla (ḥ, ṣ, ḍ, ṭ, ḏ).
6. The letter yā' is also used in writing *alif maqṣūrah* in which the dots are omitted. See Table II.

NOTES

7. The classical Arabic grammatical endings written with the so-called nunation symbols (Arabic *tanwīn*) may be transliterated when necessary by aⁿ, iⁿ, uⁿ. In modern Arabic these endings have become silent and are omitted in transliteration: classical *ali/uⁿ*, modern *alif*.
8. Doubled consonant sounds are written in Arabic by placing the *tashdīd* over the consonant letter written once. In transliteration the letter should be doubled. When the definite article *al* precedes a word beginning with t, th, d, dh, r, s, sh, ṣ, ḍ, ḥ, ḫ, l, n (the so-called "sun letters"), the l is assimilated in pronunciation, giving tt, thth, etc.

In transliteration this l should be omitted and the following letter written twice, once after the a of the article and secondly at the beginning of the next word. Example: An NIL, not Al Nīl.

9. *Hamzat al waṣl* is transliterated ' in classical forms, as illustrated in its classical name *hamzatu 'l waṣli*, but ignored in modern forms, as in *hamzat al waṣl*.
10. *Maddab* is a horizontal wavy line over *alif*. Since *maddab* nearly always occurs in word-initial position, no confusion results from the use of ā for *alif maddab* as well as for *fatḥab alif*.

SPECIAL RULES

The following notes explain details of transliteration not stated above.

1. Initial definite articles and prepositions should be capitalized and hyphens should not be used to connect parts of names; e.g., Ash Shāriqah and Tall al Lahm.
2. If any evidence is found for the use of the definite article in a name, the article will be used in the name chosen.
3. The Arabic word for God will be written Allāh.
4. Phrase names, commonly transcribed as one word, will be written in separate words. The definite article within such names will be written al, not ul; e.g., 'Abd Allāh, 'Abd ar Raḥmān, Dhū al Faḳār.
5. The word Ibn will be transliterated Bin wherever written, without *alif*, that is, between two proper nouns; e.g., 'Umar Bin al Khaṭṭāb.
6. The Turkish word Paṣa will be transliterated directly from Arabic script as Bāshā; the Turkish word Bey will be romanized as Bey in Egyptian names, no matter how written in Arabic-language sources, but in other Arabic areas as Bak where

written *bā'-kāf* and as Bayk where written *bā'-yā'-kāf*.

7. The modern colloquial word Sīdī will be given precedence over the classical form Sayyidī. (This does not preclude the spelling Sayyidī if the latter is indicated by the Arabic script or other evidence - for instance if the *yā'* is written with *tashdīd*.)
8. The colloquial word Bū will not be changed to the classical form Abū.
9. The colloquial word for water written *mīm-yā'-tā'* on Arabic maps will be transliterated Mayyat.
10. In place names of Aramaic origin in Lebanon and Syria with an initial cluster beginning with b plus another consonant such as l or h, initial clusters such as bl and bh will be written.
11. In names containing the words for "back, ridge, hill" appearing as either *ḫā'-hā'-rā'* or *ḡā'-hā'-rā'* in Arabic sources, the spelling used in the sources will be followed.
