UNITED STATES BOARD ON GEOGRAPHIC NAMES

Prepared by the

Defense Mapping Agency Topographic Center

Washington, D. C. 20315, May 1974

FOREWORD

This gazetteer contains about 3,200 entries for places and features in French Guiana, an overseas *département* of the French Republic.

French Guiana's southwest boundary with Surinam is in dispute; however, the issue is dormant at the time of this writing.

The sovereignty over islands in the bordering streams is often uncertain because of the indefinite nature of existing boundary agreements and available maps. In some cases the boundary is defined as the median line of the stream at "ordinary height of water", with islands following the nationality of that side of such line in which they are wholly or for their greater part situated. The line in Fleuve Oyapock, on the other hand, follows the thalweg or main channel which is ill-defined on existing maps. It was therefore necessary to make arbitrary decisions on the sovereignty of islands where neither cartographic nor textual evidence clearly established any sovereignty.

The names in this gazetteer supersede those in all previous Board lists for the area. The entries include standard names approved by the Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The basic name coverage corresponds generally to that of maps at the scale of 1:200,000. Entries include the names of first-order administrative divisions, populated places of all sizes, various other cultural entities, and a variety of physical features.

Many of the entities can be identified and located by the

approved name or a recognizable variant of the approved name on one of the following sources:

1. *Guyane Française*, Institut Géographique National (IGN), Paris, 1954-58; scale 1:200,000.
2. *Carte de la Guyane au 1/50,000 (Type Outre-Mer)*, IGN, Paris, 1946-62.
3. *Carte de la Guyane Française au 1:500,000*, IGN, Paris, 1950-63.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in this gazetteer in order to accommodate it to machine tabulation.

Name.—Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by the use of the word "see." Names containing generic and other elements preceding the specific term (except names of populated places) are transposed and alphabetized by the specific part; thus *Pic du Croissant* and *Petit Saut Ceïde* are listed as *Croissant*, *Pic du* and *Ceïde*, *Petit Saut*, respectively.

Where part of the name is underlined, the use of the part not underlined is optional. If two or more names are approved for a feature, each is identified in parentheses and any or all may be used.

Language labels are used to identify alternate local names of noninternational features. Local names of international features are identified by major-political-entity labels. If only

one country is identified parenthetically, no name is available for the feature in the other country.

French orthographic rules are followed in approved names insofar as particular name elements are clearly identifiable as French. Of necessity, the large number of Amerindian, African, and Creole names and name elements have not been normalized in terms of French orthography. The standard French diacritical marks, acute (´), grave (`), circumflex (^), dieresis (¨), and cedilla (¸) appear in names of the various types, and should appear on both capital and lowercase letters. Œ appears in this gazetteer as two separate letters with a tie bar because of limitations inherent in the process of machine tabulation. Wherever possible, the graphic combination œ should be printed as a single symbol, œ; e.g., *Deux Sœurs, Crique*. The apostrophe is followed immediately by the following letter without an intervening space; e.g., *Meit'hou, Saut*. All name elements should begin with a capital letter except non-initial articles, prepositions, and conjunctions; e.g., *Mouches sans Raison, Crique: Pas Trop Tôt, Crique*.

Designation.—The second column contains designations or abbreviations of designations, as listed below. Because practically all geographic terms have varied meanings, the senses in which the designator terms are used and the range of features to which they are applied in this gazetteer are stated in the list to reduce ambiguity. The distinctions that can be made in a given gazetteer will vary with the quality of the maps of the area and with the nature of the entities that are named. In French Guiana some of the features do not fit precisely into the categories used to designate them and others could be designated in two or more ways.

ADMD first-order administrative division (*commune*)
 AREA area (non-political designation applied collectively to French Guiana, Guyana, and Surinam)
 ASTR astronomical station (point on the earth whose

position has been determined by observations on celestial bodies)
 BCH beach (deposit of sand or other unconsolidated material along a shore)
 BGHT bight (open body of water forming a slight recession in a coastline)
 BND stream bend
 CHNS stream channel (separately named lesser channel around an island or bar in a stream)
 CMP camp
 CNL canal
 CNLD drainage canal
 CNLN navigation canal
 CRKT tidal creek (watercourse tidal in all or most of its length; usually short, without extensive tributary drainage areas, and located in coastal marsh or other wetland)
 CSWY causeway (raised roadway across wet ground or shallow water)
 CTRS space center
 CUTF cutoff (new and relatively short channel formed when a stream cuts through the neck of an oxbow or horseshoe bend)
 DAM dam (barrier constructed across a stream to impound water)
 ESTY estuary (drowned lower part of a stream in which there is a marked tidal action)
 FLL waterfall
 FLLS cascade (limited to features international with Brazil); waterfalls
 FRST forest
 FT fort (defensive structure or works, generally of little or no present military significance; may be in a state of ruin)
 HDLD headland (conspicuously high piece of land jutting out into or fronting the sea)
 HLL hill (landform with moderate relief, moderate to low elevation, and small summit area)

HLLS	hills	PRNQ	abandoned prison
HLND	highlands (extensive landform region characterized by a combination of mountains, hills, plateaus, or similar features)	PSTC	customs post
HMCK	hummock (slightly elevated area in a wetland; characterized by firm, well-drained ground and consequent associations of soil and vegetation)	PT	point (relatively minor projection of land, or its extremity, into a water body)
ISL	island	RCH	reach (relatively straight, low gradient segment of a stream)
ISLS	islands	RF	reef (offshore consolidated rock hazard to navigation with a least depth of twenty meters [or ten fathoms] or less)
LCTY	locality (minor area or place of unspecified or mixed character and indefinite boundaries)	RGN	region (the region between the Río Orinoco, the Río Negro/Rio Negro, the Amazon and the Atlantic Ocean, including French Guiana, Guyana, Surinam, southeastern Venezuela and northern Brazil)
LDNG	landing (place where small boats are tied up or beached; place where boats touch land for the purpose of taking on or discharging people or cargo)	RKL	rock on land (boulder, pinnacle, crag, or other rock or rock outcrop situated on land)
LK	oxbow lake (lake in the channel of a former stream meander)	RKSW	rocks in water
MESA	mesa (flat or nearly flat landform less extensive than a plateau with abrupt or steeply sloping side or sides)	RKW	rock in water (individual rock of such character and importance as to be identified by name, situated either above or below the surface of a body of water; often associated with reefs but separately named)
MGV	mangrove swamp (wetland with predominant mangrove vegetation)	RPDS	rapids
MN	mine	RSV	reservoir (large artificially impounded body of water)
MNQ	abandoned mine	RUIN	ruins (structure in a state of ruin, but not necessarily of great antiquity or archeological interest)
MNS	mines	SHOL	shoal (offshore hazard to navigation composed of unconsolidated material and having a least depth of twenty meters [or ten fathoms] or less)
MRS	marsh (wetland characterized by grasses or bush vegetation and few or no trees)	SPNG	spring
MT	mountain (landform with conspicuous relief, moderate to high elevation, and small summit area)	STM	stream (river or other running fresh water body, perennial in all or a part of its course)
MTS	mountains	STMD	distributary (secondary watercourse carrying part of the drainage of a larger stream into another water body; characteristic of deltas)
PCLX	overseas <i>département</i>	STMH	headwaters (two or more collectively named minor
PK	peak (separately named summit on a more extensive elevation)		
PPL	populated place (city, town, village, settlement)		
PPLQ	abandoned populated place		
PPLX	section of populated place (part of a city or contiguous urbanized area named as an entity but having no known administrative status)		

tributaries at the source of a larger stream)
 SVN savanna (grassland with scattered trees; generally a plain)

Latitude and longitude.—The third and fourth columns indicate geographic coordinates, with longitude based on Greenwich. Coordinates were generally read to the nearest minute and are for finding purposes only.

Coordinates were read at the map symbol for populated places and other entities occupying limited sites, at the mouths or lower ends of streams, at the summits of mountains and hills, at the extremities of points, and near the centers or midpoints of other features.

Area number.—The number in the fifth column (757) identifies the political entity, French Guiana. The communes are regarded as the first-order administrative divisions of the country and all commune names will be found in the listing. Because of the inadequacy of available maps in respect to the delineation of internal administrative boundaries, particular code numbers for the communes and features within the communes have not been utilized.

Glossary of generic terms

The following terms appear in the generic parts of standard names in the gazetteer. The English term or terms which correspond to each local term were applied after objective study of cartographic and other source materials, and do not necessarily reflect dictionary or other normalized usages. Generic terms designated (A) are Amerindian, African, or Creole; (P) designates Portuguese; the remainder are French.

anse bight
 baie estuary
 banc shoal
 battures rocks in water

bistouri (A) cutoff, stream
 bois forest
 branche stream
 cachoeira (P) cascade
 canal drainage canal, irrigation canal, navigation canal
 côte beach
 crique stream, tributary, stream channel, tidal creek
 dégrad landing
 digue causeway
 fleuve stream
 formateurs headwaters
 fort fort
 fourca (A) stream
 île(s), îlet(s) island(s), hummock
 itou (A) rapids, waterfall
 lac lake, oxbow lake, reservoir
 marais mangrove swamp
 marécages marsh
 massif mountains
 mont(s) mountain(s), hill(s), headland
 montagne(s) mountain, hill(s)
 mornes hills
 petit saut rapids
 pic peak
 placer mine
 plateau mesa
 pointe point, stream bend, reach
 prispris (A) marsh
 rapide(s) rapids
 rivière stream, tributary
 roche(s) rock(s) in water, rock on land
 rochers rocks in water
 saut(s) rapids, waterfall, cascade
 savane(s) savanna, marsh
 soula (A) rapids
 source spring

tabiki (A) island
trou marsh

Reporting of errors

It is requested that all who use this gazetteer aid in its

correction for future printings by reporting errors and name changes to the Board on Geographic Names, Department of the Interior, Washington, D.C. 20240. A statement of the source of the correct information will be helpful.

Geographic names or their spellings do not necessarily reflect recognition of the political status of an area by the United States Government.

Malta; 1971; 2,350	Laos, Second Edition; 1973; 21,000
Nigeria; 1971; 42,000	Libya, Second Edition; 1973; 37,500
South Vietnam, Second Edition; 1971; 24,000	Southern Rhodesia; 1973; 22,000

Created in 1849, the Department of the Interior — America's Department of Natural Resources — is concerned with the management, conservation, and development of the Nation's water, wildlife, mineral, forest, and park and recreational resources. It also has major responsibilities for Indian and Territorial affairs and for standardization of Federal usage of both domestic and foreign geographic names.

As the Nation's principal conservation agency, the Department works to assure that nonrenewable resources are developed and used wisely, that park and recreational resources are conserved for the future, and that renewable resources make their full contribution to the progress, prosperity, and security of the United States — now and in the future.
