MEMORANDUM FOR : Project Security Officer
SUBJECT : Clearance of Dept. of Defense Representatives
on Rainbow Ad Hoc Study Group

1. It is requested that the persons listed below be cleared to receive Aquatone information. These individuals have been selected by the Department of Defense to act as an ad hoc group to study the effects of Project Rainbow on the national defense. This action was taken as a result of a recent meeting held between Mr. Bissell and other members of the group responsible for the initiation of Project Rainbow.

2. A meeting was held on 15 January with the individuals in question at which time Rainbow was thoroughly discussed. They were not fully briefed on Aquatone although they were given a brief understanding that the Agency is engaged in a special project involving overflight conducted with a special airplane having long-range, high altitude capability. Due to the shortness of time between our receiving the names of this group and the time of the scheduled meeting, their Aquatone clearance could not be arranged, however all these individuals were certified as TS cleared by their individual organizations. It is hoped that the information presented below will enable their early clearance.
