Questions for IOC Exhibit

1. The following questions are submitted for use in the Geographic Research Area portion of the exhibit:

- a. How will geographic elements influence the success or failure of Communist redevelopment programs?
- b. What should an aircrew member know about the terrain, vegetation, climate, population, and economy of an area to evade capture in case he is forced down?
- c. Prepare a map showing the precise location of administrative boundaries, transportation routes, and key installations in Area X.
- d. Analyze from air photography the status of transportation and industrial construction in Area Y.
- e. Select and procure the best foreign and domestic maps on Area Z.
- f. Describe in map form the portion of the U. S. that can be reached by a Soviet bomber with a given range and point of origin.
- g. What are the best border entry points for covert travel in the Sino-Soviet Bloc?
- h. Collate all available information on mapping and aerial survey programs related to the Middle East.
