

Table II

## Allocation of Economic Intelligence Effort in the Sino-Soviet Bloc, 1957

| Area Coverage                              | Basic Research and Analysis | MIS | NIE's | Economic Defense <sup>1/</sup> | Policy Groups <sup>2/</sup> | Special Committees <sup>3/</sup> | Target Analysis | Departmental <sup>4/</sup> | Other <sup>5/</sup> |
|--------------------------------------------|-----------------------------|-----|-------|--------------------------------|-----------------------------|----------------------------------|-----------------|----------------------------|---------------------|
| Sino-Soviet Bloc                           |                             |     |       |                                |                             |                                  |                 |                            |                     |
| USSR                                       |                             |     |       |                                |                             |                                  |                 |                            |                     |
| Eastern Europe                             |                             |     |       |                                |                             |                                  |                 |                            |                     |
| Communist China and Far Eastern Satellites |                             |     |       |                                |                             |                                  |                 |                            |                     |

1. Table I calls for a list of only those personnel directly assigned to economic defense support. In this column, however, both direct and indirect support should be included.
2. Include NSC, NSC Planning Board, OCB, OCB Senior Advisors, CFEF (Specify any others included).
3. Interagency Groups: Killian Committee, Gaither Committee (Specify any others included).
4. Other than specified in other columns.
5. Specify.
