Evaluation of Economic Reporting from Yugoslavia during the
Period 1 September 1955-31 July 1956

Page 11 - Economic Relations with the Soviet Bloc

On the whole, CERP reporting on Bloc economic activities, specifically the conclusion of commodity and credit agreements, establishment of cooperation committees and the provision of technical assistance, has been good. However, it would be helpful if more specific details could be provided on the progress of these agreements. Such information as the utilization of Bloc credits, repayments (in goods or currency), number, type and location of Bloc technicians, delivery of Bloc equipment, and progress on construction projects would be extremely valuable. If possible, an evaluation of these activities and their significance in Yugoslavia's economic plan is desirable.
