MEMORANDUM FOR: Project Director

SUBJECT : Use of TALENT Materials in OSI Research

1. In connection with my discussion with OSI of their functional use of TALENT billets I inquired as to the correlation between their research program and the use of TALENT materials.

2. While the following statement is superficial to a certain extent I think you would be interested:

- a. Projects with very high correlation with TALENT --24
- b. Direct though moderate correlation -----17
- c. Marginal correlation -----37
- d. No correlation -----62

This comment, of course, has no relationship to the importance of the projects which OSI is now conducting in research.
