1. Thank you for sending me Lt. Comdr. Rundall's trip report on his stay at [REDACTED] which I have read carefully. I have the impression that my memorandum on the status of the [REDACTED] of 7 November 1958 (TCS-4028-58), copy of which has been sent to you, discusses and I hope deals with some of the problems noted in Rundall's paper. At least it is my belief and hope that things should be markedly improved over the days when Rundall was at [REDACTED]

2. It is also my impression that arrangements now improved for electrical communication between [REDACTED] and COMNAVFORJAPAN for the transmission of the [REDACTED] should obviate the necessity for courier time spent between those points.

3. As you know, it is the view of this Agency that the [REDACTED] should be well-established and competently manned to serve the needs of all participating agencies with the strong support of each, and I consider it my responsibility on behalf of the Agency and the community to watch this closely. Naturally, I invite ONI and any agency to call to my attention inadequacies in the hope that together we can make improvements.
