CHINA COMMITTEE

*39 items*

DRAFT REORGANIZED CHINA SPECIAL LIST

References: Documents CH Sub-C(53)5; CH/125; CH/138;  
CH/141.

Attached is a draft reorganization of the China Special List, intended to bring the form of the List into closer correspondence with the form of the International Lists.

The principle of such a reorganization was agreed by the Committee on June 29, 1953 (Document CH/138), after which the matter was referred to the Sub-Committee on Lists for examination. This resulted in the suggestions contained in the Sub-Committee's report (Doc. CH Sub-C(53)5) and in the attached working draft, based on the contents of the List being issued as Document CH/125.

After considering the draft on July 2, 1953, the Committee thought it desirable that it should be examined in the capitals before adoption. Therefore, it was concluded (Document CH/141), that the working draft be referred for such examination and that, in the meantime, the List as set out in Document CH/125 should be issued now subject to later reorganization.

Accordingly, Document CH/125 is being issued separately and the working draft is attached hereto for examination and subsequent discussion in the Committee.

This draft is being issued only in the English text, but in its final form it is planned to incorporate also the French definitions.

Doc. CH/139

July 7, 1953

DRAFT REORGANIZED CHINA SPECIAL LISTCHINA COMMITTEECHINA SPECIAL LIST (1st Revision)LISTE SPECIALE POUR LA CHINE  
(1ere Rev.)

1. Attached hereto is the "China Special List (1st Revision)", which supersedes original list issued on January 30, 1953 as Document CH/32 and includes all items agreed by the Committee, as of the date above, for embargo to China and North Korea, in addition to the items on International Lists I, II, and III. In an Annex A to the List, agreed Interpretative Notes are set out.

2. The "Source" column in the List shows, for each item, the Document recording agreement on the definition as listed (subject to any subsequent editorial changes). In addition, for items originating from the proposals in COCOM Document #509 (and Addendum), the numbers subsequently assigned to them by COCOM Document 782 (Annex) are shown in parentheses. A complete cumulative list of reference documents concerning list items is set out in CHINCOM Document #125.

3. All definitions in the attached List (whether or not marked "n.e.s.") should be construed as exclusive of all types and varieties covered by the International Lists.

4. The attached List includes a number of items on which the waiting period for any Government reservations has not elapsed. Each of these items is marked with an asterisk (\*) and the date of the end of the waiting period is shown. Eventually, a supplementary notice reflecting the final status of those items will be issued.

INTERPRETATIVE NOTES

Agreed Interpretative Notes  
of various items on the List  
are set out in CH Document 125.

Note 1 - Measuring Instruments  
(C-563)

The following is an illustrative  
list of the kinds of instruments  
covered by Item C563:

(Schedule attached to Document  
CH/106, reproduced in Document  
CH/125.)

Note 2- Precision Instruments  
(C571)

The following is an illustrative  
list of the kinds of instruments  
covered by Item C571:

(Schedule attached to Document  
CH/107, reproduced in Document  
CH/125.)
