Copy 7 of 9

26 March 1963

MEMORANDUM FOR : Chief, Materiel Division, Office of Special Activities
25X1A SUBJECT : Status of [redacted]
REFERENCE : Memo for the Record from C/MD/OSA, Dated
20 March 1963; Subject: "Deliveries of System 9A
Equipment" (IDEA-1133)

25X1A

1. Although the subject matter of the reference is not directly related to my present levy upon you, it did remind me to ask you to look into the question of where we stand with regard to the installation of the [redacted] systems on the SAC aircraft.

25X1A

25X1A

2. [redacted] told me early last week in response to my query that his office had a copy of a letter from General Power, presumably dated 23 January 1963, reaffirming his stand of 10 November 1962, endorsed by General Taylor, that [redacted] should not be committed over Cuba. Not having the text in front of me and getting precious little detail from Honeywell, I asked him how he determined that there was no desire on SAC's part to move ahead with the installation of these systems in view of Colonel Geary's interest earlier in March on the same subject.

25X1A

3. At this point I received a constant stream of gobbledygook from Honeywell, which I believe was directed toward leading me to the inference that AFIGO-S did not really have a copy of the message at all, but had merely had its content reported to them.

25X1A

4. I mentioned this subject to Dr. Scoville after having talked to [redacted] since [redacted] as you know, is moving ahead on an overtime basis to complete the full order of fourteen sets. Pate and I felt that if what Honeywell said had any substance, we would be advised to tell [redacted] to slow down in order to permit not only better quality control on the

25X1A
manufactured item, but also to cut the cost of producing it. Dr. Scoville then said that he was under the impression that he had seen a directive from the Secretary of Defense, telling SAC to proceed forthwith to install these systems on their U-2's. Dr. Scoville was not sure where he had seen this paper, but he did associate it with the D/NRO. In the meantime he asked that we not do anything to dete[redacted] from moving ahead on deliveries as fast as possible.

25X1A
5. I would like to ask you if you would undertake to throw some light on this matter by going direct to Colonel Geary and explaining to him that in the interest of economy, if nothing else, we are anxious to find out what the DOD intends to do about the installation schedule on these equipments. I think we can do this quite easily in view of our contractual and security responsibilities with [redacted] on this gear.

6. Finally, I wonder if you should not also link the System IXA question to this alleged stand of SAC's. I do not want to make a giant project of this, but I would like to be able to know where we are going in this area so that Dr. Scoville can be properly informed.

JAMES A. CUNNINGHAM, JR.
Deputy Assistant Director
(Special Activities)
