24 May 1963

MEMORANDUM FOR: Chief, Engineering Analysis Division, OSA

SUBJECT :

1. During the preliminary briefing of the Purcell Panel, Dr. James Baker suggested to Eastman Kodak representatives that they contact [redacted] who has done considerable work with diode tubes and image intensifiers.

2. As a superfluous note, Dr. Baker informed the group that [redacted] has also done some work with a 50,000 volt electronic gun. This tidbit of information aroused my curiosity as to whether or not [redacted] has done any work which would be applicable to your Komstar/Marald projects. I pass this information on to you for whatever investigative action you deem appropriate.

(Signed)

Chief, Programs Staff  
(Special Activities)

Dist:

- Cy 1 - G/EAD/OSA
- 2 - EXO/OSA
- 3 - D/TECH/OSA
- 4&5 - PS/OSA
- 6 - NE/OSA

C/PS/OSA: [redacted] (24 May 63)
