

Austria

In the office of the High Commissioner for Austria (Verkhovnyy Apparat) there was a chief of the cipher byuro and two or three clerks, one of whom was an MVD agent for SK work. The latter was instructed merely to report all missing documents and to watch the activities of the other clerks, where they went on their time off, whom they saw, etc. There were no regular meetings between agent and case officer. The cipher clerks of the Apparat and the rezidentura had separate officer, and the USIA had their own cipher clerks.
