30 August 63

Dr. A. N. Whelon
2430 "E" Street, N. W.
Washington, D. C.

Dear Bud

It was just last Sunday evening that I found out that you were no longer with STL but were occupying a key position in CIA. Congratulations!

Today is my last working day with the Air Force, as I am retiring and leaving WPAFB tomorrow morning. There are many, many reasons for my decision which I will be happy to give to you face to face when you have the time.

Starting the first of September I will be working for Kip Siegel, President of Conductron Corporation, 343 So. Main St., Ann Arbor, Michigan. Today I am also being debriefed in the SSO and SPO areas. If you ever have need for advice or consultation in these areas, and I believe the attached resume will refresh your memory as to my experience, I can be reindoctrinated. However, if there is a greater lapse of time than 90 days a new investigation has to be run which considerably delays things. I am anxious to continue to be of whatever service I can to my country.

Looking forward to seeing you in Washington.

Sincerely

BARTON S. PULLING
Colonel, USAF
Deputy Commander
Research & Engineering
