Daily Diary, O/RR, 11 April 1951 (AD/RR information unless otherwise stated)

D/M: [redacted] Mr. Bernard Bramson, NEWLY-APPOINTED MINERALS ATTACHE TO PERU, CHILE, COLOMBIA AND BOLIVIA. (10 Apr)

25X1A

25X1A

D/I:

[redacted] particular interest in this project is the relation of power or petroleum consumption used in the manufacture of some 32 items which he had listed. These items included amongst others: abrasives, tanks and self-propelled guns, railroad cars, anti-friction bearings, tractors, aero engines, guns, and torpedoes, etc. Specifically, he WOULD LIKE TO KNOW THE RELATIONSHIP BETWEEN THE CONSUMPTION OF POWER (ELECTRIC POWER) AND PETROLEUM AND THE PRODUCTION OF THE VARIOUS ITEMS either on a tonnage basis or by unit production. [redacted] of D/M, who was in attendance at this meeting FELT that THEY WOULD BE ABLE TO GIVE A QUICK ESTIMATE on the various materials that were included on the list and Mr. [redacted] plans on returning to D/I on Wednesday, 11 April 1951 to get what estimates we can provide on the various industrial items. (10 Apr)
