GLE ROCK, Calif., Feb.

Have you wondered why so many big shots have become apologists for Communism? Here's the answer. Allen W. Dulles, director of the Intelligence Agency, last week that the Soviet Union spends TWO HUNDRED MILLION DOLLARS annually on front organizations to promote soft thinking that will pave the way for a Red triumph. Think of that! Two hundred million dollars will buy a lot of soft thinking. The guys that are for Communism aren't against capitalism. They just think Communism will get them the rough sooner. But when the Com'mies take over, they never get to keep it.

JONATHAN YANK.
