

ARO Meetings

9 November 1965

ALL ARO's INVITED TO THE FOLLOWING MEETING via Telephone by [REDACTED]
[REDACTED]

STAT
STAT

You are inviged to a Movie at 9:30 (and 10:30 respectively),
Monday, 15 November 1965 in Room 1E-78, Headquarters.

This movie describes a revolutionary idea in Filing and Finding
Conventional File Folders- SCAN). Briefly by electronic means file
folders can be scanned at the rate of 100 feet per second).

This system also eliminates the need for refiling under conventional
methods.

A Representative (Mr. Herbert Groth) from the Mosler Company will
be present to answer any questions.

I recommend that you see this movie and bring with you your Supervisor
and any other officials you wish. (Top level-type management jobs).

This equipment was introduced for the FIRST TIME at the Manufacturers
Exhibit in New York on 25 October 1965 [REDACTED]
