ditional research with my Staff and visited in his Office. We discussed the May 1960 study that created the CRS Repositories separate from the Agency Vital Records Program 2. I find the them Agency Records Officer objected to the 1960 CRS established plan for the protection of selected intelligence documents on the card size microforms. Originally, the plan by called for eleven dispersed storage sites for these files. By 1962 he established one file of the microforms and another ganizations each provided two safe drawers and the periodic filing of newly received material. This past summer certain plans required CRS to remove that file and arranged with Office of Legistics to transfer that file and arranged with Office of Legistics to transfer that file same file storage and maintenance procedures 3. Those emergency file collections each consist of some 2,000 3x7 inch plastic microfiche-type cards in one metal tray about two feet long. All the documents reproduced on those cards are on hand in the Agency Archives or in the Vital Records at the Agency's Emergency Reliccation Site in their original hard copy form. The existence or discontinuance of the CRS Emergency Repository Program does not influence the collections 4. Since 1961 the CRS also established a collection of these microforms in Records Officer is obliged to service and update that collection. Further, the OCI/IDII through its operation room responsibilities has arranged with White House representatives to establish a set of these microforms at five White House mergency sites (White House underground room, Camp David,	MEMORANDUM	FORS			
1. Following our meeting Monday morning, 8 September, and my review of draft proposal dated 3 September 1969 I did additional research with my Staff and visited in his Office. In his Office. We discussed the May 1960 study that created the CRS Repositories separate from the Agency Vital Records Program 2. I find the then Agency Records Officer objected to the 1960 CRS established plan for the protection of selected intelligence documents on the card size microforms. Originally, the plan by called for eleven dispersed storage sites for these files. By 1962 he established one file of the microforms and another called for eleven dispersed storage sites for these files. By 1962 he established one file of the microforms and another required another that file are remove that file and arranged with Office of Logistics to transfer that file arranged with Office of Logistics They agreed to use the same file storage and maintenance procedures 3. Those emergency file collections each consist of some 2,000 3x7 inch plastic microfiche-type cards in one metal tray; about two feet long. All the documents reproduced on those cards are on hand in the Agency Archives or in the Vital Records at the Agency's Emergency Relocation Site in their original hard copy form. The existence or discontinuance of the CRS Emergency Repository Program does not influence the collections in Records Officer is obliged to service and update that collection. Further, the OCI/IDII through its operation room responsibilities has arranged with White House emergency sites (White House underground room, Camp David,	THROUGH	*	Chief, 888
