

SECRET

SUBJECT: Contract Review Board - 16 July 1969

Aside from routine activities [] indicated 25X1
considerable anxiety about identifying useful work for
the Board. He suggested that the Board take on a review of:
(a) patent policy in procurement [] 25X1
(b) review security/sterility practices and problems
[] (c) determine the effect that
might be anticipated in contracting due to rising R&D costs
(Buzz ?). [] was also interested in having someone look
at what could be done about overruns. [] indicated he was 25X1
too busy to take this task on, and further, there was a
general consensus that the Agency record is excellent. However,
it was agreed that a statistical summary of the Agency over-
run experience would be informative and useful. I suggested
to [] that he contact [] about prior work 25X1
which had been performed in drafting a security addition for
the Project Officers Manual.

[] 25X1
