In ~~his~~ ^{the} US. edition of his memoirs the founder of the BND, GEHLEN, revealed hitherto unknown details ~~about~~ ^{about} the inner sanctum of the Bonn intelligence service. At the last moment he ~~exposed~~ ^{deleted} the most high ^{ly} explosive parts.

A bunch of English language galley-proofs have alarmed West Germany's leading government spies. The Federal Intelligence Service (BND) finds itself ^{un-} ~~masked~~ ^{statement} by a man who up to now has branded almost every ~~publication~~ about the BND as treason --, the founder of the BND and ex-General Reinhard GEHLEN.

"An intelligence service needs a certain amount of cover if it is to be successful, and this will never change," GEHLEN postulates in the German edition of his memoirs. "The secret foreign intelligence service cannot and must not be visible to the general public."

However, the galley-proofs for the British-American
