UNITED STATES GOVERNMENT

Memorandum

25X1A

TO : Director, DCS
25X1A: Exec Officer

DATE: 17 May 1967

FROM :

SUBJECT: Peter R. Brooke
25X1A

Ref :

1. In furtherance of his desire to help the Agency in whatever way he can, Subject proposed on 12 May 1967 to suggest to the Armed Forces Radio Services Los Angeles director, for whom he continues to do some work, the production of a series on U.S. intelligence. Although the series, as contemplated, would ostensibly be meant for consumption by the Armed Forces, they might still find their way, as many others already have, into the public notice. The series would begin with story treatment of Army, Navy, Air Force, etc., intelligence, subject's real objective being the treatment of CIA. For the military, the purpose would be an information series to acquaint the informed man on the ground, afloat and in the air with the activities of his own and the associated intelligence services prior to his own participation.

2. Brooke feels that AFRS will be very interested in a series of this type, particularly since other series, but none on this subject, have been produced in the past. He was advised, however, that we had no way of knowing what the Agency's reaction might be, but that we would pass his idea on for information.
