**'We of the Informed'
Fear Communists**

To the Editor:

Miss Grabenhorst is surely misinformed as to the part the Communists are playing in the Civil Rights Bill and other phases of our government. Following is a small part of an article from a reliable paper that will prove my point — "About five years ago Lt. Col. Goleniewski an officer of the KCB (the Soviet Secret Police), turned against his Soviet masters but was told by our government to stay in the Soviet Secret Police as our agent. In 1961 he broke away completely. The CIA has been keeping him under wraps ever since." The following is from a series of articles by Guy Richards of the New York Journal-American. "According to Mr. Richards, Goleniewski has given details to certain government agencies of Communist infiltration in strategic departments of our government but these agencies have been setting on the details and prevented a congressional committee from hearing Mr. Goleniewski's evidence. He says (in bare outline) that three American scientists with access to our defense secrets are working for the Soviet sec-

ret police. That the Soviet secret police had agents in the American state department and the CIA. That the Soviet secret police have infiltrated

all American embassies in important cities around the world, and every U.S. agency except the FBI. That more than a million dollars of CIA funds (tax money) got into the hands of the Reds and was divided among the Soviet secret police, the Italian Communist Party and the American Communist Party. A thorough investigation of this should be made by the appropriate committee in Congress and the truth brought out.

There is much more but this should show how much our government and State department needs a thorough house cleaning. Naturally, with conditions such as this, the Communists are going to keep the race riots going by playing on the ignorance of whites and colored alike who do not know the truth. We of the informed wish to enjoy our freedoms without interference of the Federal government, especially one as soft toward Communism as ours.
