Polls Can Mislead You

It's not only a shame but a crime, the way Mr. Johnson and our Senators and House of Representatives are conducting themselves, putting the interest of selfish groups instead of all Americans, for fear they should hurt some of these grafters' feelings and lose out on the coming elections. What has become of honest and honorable representation? With elections coming up, polls are beginning to show up, who the voters are for and whom they are against. We should never be misled by false polls, as I learned a little how these are conducted. All they amount to is to make the public believe that such a man, whoever he may be, is way out ahead. This is done only through the use of electric computers so they can steal and run the elections to suit themselves, so don't be alarmed if we don't have to put up with the same old gang unless we who love our country can get some honest men in charge of the C.I.A., our magazines, newspapers, TV and radio, all this graft and corruption can go on with no end.

I know personally how this computer works. Like a check out counter in a super market, a machine produces just when the human brain feeds into it, so with computers. If you feed it lies, corruption from minds of liars and corrupt people, this is what the machine puts out. Same as a record recorder. So, it is high time we start in deep search for men of decency and of good character to take on the running of the government.

We must have men to lead this nation who know right from wrong instead of our political grafters and bureaucrats who are leading this country down the road to what ever one may call it, Communism, or anything else that has turned every legitimate

decency of our way of American life into silliness and stupidity, that the Communist glorify themselves in. Whether we like it or not, the don't come to our senses, one of the highest priced tags will be over our heads and I am not referring to material things in life—M. J. HALL, Lockridge.
