LONDON — "Obviously you cannot tell of operations that go along well," wrote Allen Dulles, former director of the Central Intelligence Agency. "Those that go badly generally speak for themselves." There is reason to think that in the case of Col. Oleg Penkovsky, who was tried in Moscow last week along with British "business man" Greville Wynne, the West had a high-level intelligence operation that worked very well indeed until the Soviet Union disrupted it.

It is not necessary to accept as valid all the allegations in the trial about the roles of the respective governments. The British Government under the Labour has been very quiet about Myanmar activities as the supposed contact with Bentinck and the United States has not confirmed charges that Americans also were involved. In this both countries might benefit from experience in the U.S. although the two cases are somewhat different.

Penkovsky's contribution, for one, was unquestionably very significant. His contributions are described here as "valuable." It is unnecessary to make any connection he may have had with big names in the Soviet hierarchy; he occupied an important position in his own right, and he was able to provide information that helped the West against Soviet intentions.

WHETHER Penkovsky was motivated primarily by money or by disillusionment with the Soviet system we are left to guess. Perhaps it was a combination of personal reasons. In any event, the principal mistake of Western intelligence seems to have been leaving him in his assignment too long. That is one of the hazards of this kind of operation. The long life of Soviet counterintelligence reached through the Comintern later to Hungary to ambush Varga.

If departing Poles were perceived as a threat to Soviet authority, it is not surprising that Soviet authorities expected them to try to soften the impact as well as to emphasize the dangers of a return to Poland. Doubtless Wynn's activities were chosen up to as to discourage Soviet citizens from fleeing with their foreigners. There had been a policy of non-honoring of such citizens, and it was not the

Nothing else, and after the fact, though the fact is, has been able to get into the picture. The only way to get into the picture is to get into the picture. The only way to get into the picture is to get into the picture.

"The greater military success in this
 country has not meant that Western
 nations themselves are invulnerable
 to the same kind of invasion. British
 Foreign Office officials acknowledge
 that to Pakistan, the other day, is
 a serious consideration of the Vassell
 and note that there might be much
 more to be learned from time to time.
 The British and American, Bonifade and
 others as well as the case of Colonel
 in the United States are all in
 that a foreign works both

The Soviet-BITR system can be completely and profitably used in all countries. Free countries can benefit much through reasonable proposals, but if they are to be true to their own values, they also must avoid serious errors under every kind of guise. The Soviet personnel in constructing their own factories.

One reason the risk is tolerable is that the West has less to conceal. Britain and the United States are for the most part open societies. Although foreigners may be confused in evaluating policies — a confusion natives occasionally share — basically intelligence is a matter of putting together readily available information.

There would be far less impetus for the West to export its democratic methods of rational intelligence if the Soviet Union were not a closed system. It is one of the prices the Communists pay for the secret state. It also is an answer to those who regard covert intelligence as an unnecessary, as a dirty business.

[illegible]

The following table shows the number of
 persons in the United States who are
 employed in the various occupations
 in the year 1900. The total number
 of persons employed is 10,000,000.
 The number of persons employed in
 each occupation is as follows:

the 1990s, the number of people in the United States who are 65 years of age or older has increased by 50 percent, and the number of people 75 years of age or older has increased by 100 percent. The number of people 85 years of age or older has increased by 200 percent. The number of people 95 years of age or older has increased by 400 percent. The number of people 100 years of age or older has increased by 1,000 percent. The number of people 105 years of age or older has increased by 2,000 percent. The number of people 110 years of age or older has increased by 4,000 percent. The number of people 115 years of age or older has increased by 8,000 percent. The number of people 120 years of age or older has increased by 16,000 percent. The number of people 125 years of age or older has increased by 32,000 percent. The number of people 130 years of age or older has increased by 64,000 percent. The number of people 135 years of age or older has increased by 128,000 percent. The number of people 140 years of age or older has increased by 256,000 percent. The number of people 145 years of age or older has increased by 512,000 percent. The number of people 150 years of age or older has increased by 1,024,000 percent. The number of people 155 years of age or older has increased by 2,048,000 percent. The number of people 160 years of age or older has increased by 4,096,000 percent. The number of people 165 years of age or older has increased by 8,192,000 percent. The number of people 170 years of age or older has increased by 16,384,000 percent. The number of people 175 years of age or older has increased by 32,768,000 percent. The number of people 180 years of age or older has increased by 65,536,000 percent. The number of people 185 years of age or older has increased by 131,072,000 percent. The number of people 190 years of age or older has increased by 262,144,000 percent. The number of people 195 years of age or older has increased by 524,288,000 percent. The number of people 200 years of age or older has increased by 1,048,576,000 percent. The number of people 205 years of age or older has increased by 2,097,152,000 percent. The number of people 210 years of age or older has increased by 4,194,304,000 percent. The number of people 215 years of age or older has increased by 8,388,608,000 percent. The number of people 220 years of age or older has increased by 16,777,216,000 percent. The number of people 225 years of age or older has increased by 33,554,432,000 percent. The number of people 230 years of age or older has increased by 67,108,864,000 percent. The number of people 235 years of age or older has increased by 134,217,728,000 percent. The number of people 240 years of age or older has increased by 268,435,456,000 percent. The number of people 245 years of age or older has increased by 536,870,912,000 percent. The number of people 250 years of age or older has increased by 1,073,741,824,000 percent. The number of people 255 years of age or older has increased by 2,147,483,648,000 percent. The number of people 260 years of age or older has increased by 4,294,967,296,000 percent. The number of people 265 years of age or older has increased by 8,589,934,592,000 percent. The number of people 270 years of age or older has increased by 17,179,869,184,000 percent. The number of people 275 years of age or older has increased by 34,359,738,368,000 percent. The number of people 280 years of age or older has increased by 68,719,476,736,000 percent. The number of people 285 years of age or older has increased by 137,438,953,472,000 percent. The number of people 290 years of age or older has increased by 274,877,906,944,000 percent. The number of people 295 years of age or older has increased by 549,755,813,888,000 percent. The number of people 300 years of age or older has increased by 1,099,511,627,776,000 percent. The number of people 305 years of age or older has increased by 2,199,023,255,552,000 percent. The number of people 310 years of age or older has increased by 4,398,046,511,104,000 percent. The number of people 315 years of age or older has increased by 8,796,093,022,208,000 percent. The number of people 320 years of age or older has increased by 17,592,186,044,416,000 percent. The number of people 325 years of age or older has increased by 35,184,372,088,832,000 percent. The number of people 330 years of age or older has increased by 70,368,744,177,664,000 percent. The number of people 335 years of age or older has increased by 140,737,488,355,328,000 percent. The number of people 340 years of age or older has increased by 281,474,976,710,656,000 percent. The number of people 345 years of age or older has increased by 562,949,953,421,312,000 percent. The number of people 350 years of age or older has increased by 1,125,899,906,842,624,000 percent. The number of people 355 years of age or older has increased by 2,251,799,813,685,248,000 percent. The number of people 360 years of age or older has increased by 4,503,599,627,370,496,000 percent. The number of people 365 years of age or older has increased by 9,007,199,254,740,992,000 percent. The number of people 370 years of age or older has increased by 18,014,398,509,481,984,000 percent. The number of people 375 years of age or older has increased by 36,028,797,018,963,968,000 percent. The number of people 380 years of age or older has increased by 72,057,594,037,927,936,000 percent.
