DIARY NOTES

DD/S

L

27 March 1962

25X1A

25X1A9A

1. I have designated  to consult with the Defense Intelligence Agency Committee to study DIA Career Development.

2. At the Deputies' Meeting this morning:

a. I advised the Director of a request from GSA to bring a writer to the new building. The Director disapproved, and I advised Charlie Palmer of the Public Buildings Service immediately after the meeting.

b. Bob Amory announced that this would be his last week in the Agency and that he would be assuming duties as the Chief, International Organizations, Bureau of the Budget, next week. The Director expressed his regret at Bob's departure.

c. Mr. Kirkpatrick announced that the Reorganization Committee expected to have its final report in final draft today and to meet with the Director on Wednesday, 28 March, to consider it. The Director asked him not to finalize the report until he had a chance to discuss it with the Committee. He also said that he thought each Deputy should have an opportunity to see and read the entire report.

d. Bob Amory announced that Dr. Wheelon, now with Scientific Technical Laboratories, had been hired as the new Assistant Director for Scientific Intelligence. He will be coming aboard the end of May.

e. The Director asked me to have some braces put on the conference tables in his Conference Room and the USIB Conference Room. (This request has been passed on to Jim Garrison.)

3. Shef Edwards and several of his Staff were in to talk with me about the increased workload which may be placed upon them by the agreement which the Director appears about to make with  of the National Reconnaissance Office. Apparently, the Director feels that CIA should control the security ~~and~~ all of these fancy new sensitive projects. However, I talked to Dr. Scoville who said that he thought the Director merely felt we should control security ~~and~~ those projects for which CIA had primary responsibility. This may well throw a substantial increased workload on the Office of Security; however, I told Shef that there was nothing we could do about this until we knew what the requirements were.
