Journal - Office of Legislative Counsel Monday - 22 December 1975 4. ADMINISTRATIVE DELIVERIES I dropped off a copy of a transcript of William Nelson's, DDO, testimony at Pat M. Holt's, Chief of Staff, Senate Committee on Foreign Relations, office. I also dropped a blind memo on Multi- Spectral Scanning at the office of George R. Berdes, on the staff of the Subcommittee on International Security & Scientific Affairs, House Committee on International Relations. 5. INTEL BRIEFING - ANGOLA Charles Snodgrass, House Appropriations Committee staff, referred to a New York Times article indicating that the United States Government might have raised the ante prior to H.S. S. R. major intervention. He said this conflicted with Agency testimony before his committee. He wanted an explanation and I said I would check. He also hoped to come out to the Agency (27, 28 or 29 December) for a day with the NIO's. He wanted to start with George Carver and then chat with each NIO available He was more interested in substance than how the NIO system works. He wanted a bit more time with the NIO's convening Thailand Ladonesia With George Carver, we untermined that the timing was bad. I called Snodgrass back and he agreed to fit in the briefing sometime after he got back from his EA trip in late January 1976.	25X1	Approved For Release 2004/10/27: CIA-RER77-W00144R0005001	00005-4 2 (**
