Memorandum

TO : The Files

EP 64-278
DATE: 20 November 1964

25X1A9a FROM : Mr. [REDACTED]

SUBJECT: Trip Report - HG-100 with [REDACTED]

25X1A5a1

25X1A5a1

1. On 23 October 1964, a meeting was held at [REDACTED] for the purpose of discussing and clarifying the specifications for the HG-100 handcranked generator. Present

25X1A5a1

25X1A5a1

2. Since the HG-100 is basically a modification of the GN-54 which [REDACTED] has had under development for three years, many of the specifications for the two models are the same and up till now the HG-100 has not had a formal written specification beyond the general power requirements presented to [REDACTED] last May 1964. A complete specification has been prepared by [REDACTED] and was submitted at this meeting for our edification and approval. Every item of the specification was discussed and several changes and additions were made. The only question left unanswered was the maximum acceptable generator ripple when powering the RS-100 in the receiver mode. Mr. [REDACTED] will supply this information after he has rechecked the RS-100 tactical radio set. This data should be available within ten days and made a part of the specs at that time.

25X1A5a1

3. A completely revised specification for the HG-100 will be provided in approximately two weeks. Contract initiation will follow shortly thereafter.
