AERIAL PHOTOGRAPHIC FLIGHT AND INDUSTRIAL TOUR
NEW FEATURES OF MAP AND PHOTO INTERPRETATION COURSE

Photographic reconnaissance of the Soviet Union and other denied areas is a high priority intelligence requirement. This priority will continue for the foreseeable future.

There are a number of feasible, different ways to conduct this reconnaissance. The high-flying U-2 planes were an example of a highly imaginative, successful, and extremely valuable system of accomplishing this reconnaissance; conducting photographic espionage. Presently, the U. S. has in the development stage a satellite reconnaissance system, the so-called "spy-in-the-sky" satellite, which should be able to perform a number of reconnaissance tasks and produce useful information on the great majority of intelligence targets. Other aerial and ground photography collection exploitation programs demonstrate still different ways of conducting photographic espionage.

Recognition of the importance to intelligence of effective exploitation of all types of photography as a source of foreign intelligence and the intelligence potentialities inherent in new reconnaissance systems being developed led to the establishment of a National Photographic Interpretation Center (NPIC) on 18 January 1961.

It is not enough, however, to have successful systems in existence and on the planning boards. A photograph, no matter how fine or how difficult or costly to acquire, is of no value until someone extracts and interprets the information contained in the photograph. The degree to which this is effectively accomplished

CONFIDENTIAL

~~SECRET~~
CIA INTERNAL USE ONLY

~~SECRET~~
CIA INTERNAL USE ONLY

AERIAL PHOTOGRAPHIC FLIGHT AND INDUSTRIAL TOUR (cont'd)

determines the intelligence value of any photograph. This value can be enhanced greatly if the effective use of photography is more widely understood in the Agency. This understanding is one of the objectives of the photo interpretation phase of the Intelligence Research (Map and Photo Interpretation Course).

The grounding of U. S. high-altitude reconnaissance aircraft in May 1960 caused the intelligence community to become even more dependent on the exploitation of photography from other functioning sources. However, the intelligence value of photographic espionage can be increased greatly if there is a more widespread knowledge of the type of photography and the methods and procedures needed to maximize the intelligence potential and exploitation of the photography acquired by the Clandestine Services, OO, and OCR.

The people most qualified to determine what is needed for good intelligence photography are the photo interpreters whose profession is the extraction of information from photography and its interpretation. These "glass-eyed spies," so-called because one of their key tools is a stereoscope, can squeeze amazing amounts of information from photographs which would appear uninteresting and harmless to the uninitiated. Nevertheless, a great deal of intelligence value can be lost in the taking of the photographs, in the processing and handling of the film, and equally as much in the method of exploitation or the lack of it. Therefore, to guide the procurement and exploitation of photography more effectively, Agency people engaged in these programs should thoroughly know and understand the needs and techniques of photo interpretation. No amount of reading material, book-dispatches, or lectures in training programs will spread the know-how of taking and using intelligence photography as much as practical training experience. You learn by doing!

The aerial photographic flight in a commercial airliner is designed to provide practical training experience in the taking of good intelligence photography under operational conditions, the acquiring and recording during the flight of essential data necessary for the photo interpreters to fully exploit the photography, and the interpreting of the photographs acquired by this means. Another objective of the aerial flight is to provide the student with the opportunity for aerial study of a variety of installations and surface features from the 'photo interpreter's viewpoint.'

Before the flight, students receive training in the techniques of photo interpretation with emphasis on the problems of exploiting the types of photography acquired through the Clandestine Services,

CONFIDENTIAL

~~SECRET~~
CIA INTERNAL USE ONLY

~~CONFIDENTIAL~~

~~SECRET~~
CIA INTERNAL USE ONLY

AERIAL PHOTOGRAPHIC FLIGHT AND INDUSTRIAL TOUR (cont'd)

OO, and OCR programs. Instruction is given in the use of cameras, films, and the methods and procedures for taking photographs through the windows of a commercial airliner. The problems of recording essential trip and exposure data are also covered. The instruction before the flight places emphasis on what the photo interpreter and the photogrammetrist need to obtain as much intelligence information from the photography as possible and on what the problems are in taking photography under operational conditions.

Cameras and film are provided, although students owning 35-mm cameras are encouraged to use their own. Each student is assigned a particular installation or area for which photo coverage is desired, and in addition, each student is to take photographs of targets of opportunity that may have intelligence significance. He must also maintain a trip and exposure log so that at the end of the flight he can accurately locate and identify each of his exposures.

The aircraft leaves Washington National Airport at approximately 1000 and flies a route planned to cover a great variety of industrial and military targets, transportation facilities, and terrain features. Several large installations are circled by the aircraft to give a complete 360-degree aerial view of the installation. The students are given ample opportunity to practice different methods and procedures in taking photographs. Future flights will include a lunch stopover at an airport in Ohio, providing the students with the opportunity to gain experience in taking photographs over a large city while landing, on the ground, and during take-off. All of the assigned targets will be covered before the lunch stop. The flight back to Washington will be under conditions simulating as nearly as possible an actual flight between two Soviet cities.

The photography taken during the flight is processed for the students. This film processing is done to exemplify the type and quality of processing needed to extract the maximum information and to enable photogrammetric measurements. The students are then given the opportunity to locate, identify, and interpret their photographs.

As part of the aerial flight, the Bethlehem Steel Company's Sparrows Point Plant near Baltimore is circled while the students view and photograph it from the air. Later in the course, they do a detailed photo interpretation analysis of the plant, using this photography in conjunction with regular vertical aerial photography. Upon completion of the exercise, the class goes on a tour of the Sparrows Point Plant. On the tour a power plant, ore unloading facilities, blast furnaces, coke ovens, a coke by-products plant, open-hearth furnaces, soaking pits, a slab and plate mill, a continuous hot-rolling

~~SECRET~~

~~CONFIDENTIAL~~

SECRET
CIA INTERNAL USE ONLY

AERIAL PHOTOGRAPHIC FLIGHT AND INDUSTRIAL TOUR (cont'd)

mill, and a tinplate mill are visited and their operations are explained. The tour gives each student an opportunity to compare his photo interpretation analysis made from aerial photography with the actual installations on the ground. The aerial appearance and size of buildings and equipment in the plant can be compared with their actual ground appearance, size, and functions. After the tour the students have a better understanding of the relationships between surface features as they appear on aerial photographs and as they actually exist on the ground and of the use of key recognition features to deduce the functions of various structures.

Photo intelligence accounted for 80 to 90 percent of all Allied intelligence during World War II and the Korean conflict. Today, our cameras, film, and processing equipment are many times better. In addition, tremendous advances have been and are being made in new photo interpretation techniques and equipment. The limits of photography in its application to the intelligence field cannot be foretold. However, the extent to which these limits are exploited will depend upon the training and understanding acquired of the effective procurement, use, and application of all types of photography.

NOTE: The next Intelligence Research-Map and Photo Interpretation Course will be conducted from 2 October through 3 November (part-time, 50 hours). For additional information, call the Chief Instructor, [REDACTED] on extension 4168.

"GUIDELINES FOR EFFECTIVE TRAINING"

As forecast in the March-April 1961 Bulletin, a revised, "sanitized" version of the "Guidelines for Effective Teaching" is now available. The new manual, "Guidelines for Effective Training," dated April 1961, is non-attributable, and all references to the Office of Training and other Agency components and activities have been removed. It is unclassified. The format has been changed slightly to a 6" x 9" "paperbound" size, the layout revised to permit easier reading, and more space allowed for notes at the end of each major section.

Copies for Headquarters use can be requested from the Educational Specialist, OTR, 1365 R&S, extension 8017. Copies for release overseas are obtained from the component in the Operations School which is concerned with field dissemination (extension 8861).

RECREATION ASSOCIATION PUBLISHES NEWSLETTER

The Recreation Association Newsletter has been published by the Agency for the past nine years and has undergone many changes in an effort to make it a more interesting paper. In the beginning it dealt primarily with sports and club news. However, it is now being expanded to inform people of Government employee services available to them in addition to telling them about items of interest and events going on in Washington and surrounding areas. The ultimate aim is to be of service to Agency employees in some way and to try to have something of interest for everyone in its monthly issues. If anyone has an item he would like explained or discussed in the paper, or something he would like to tell others, any and all suggestions are welcome. Please call extension 4077 for additional information or extra copies of the Newsletter.

FIVE CLERICAL COURSES OFFERED IN REFRESHER PROGRAM

Although information on clerical testing is regularly included in the Bulletin, an explanation of the entire Clerical Refresher Train-in Program (CRTP) at this time might be of assistance to some of our readers.

CRTP was originally started with three objectives: to assist clerical employees to meet Agency standards in typing and shorthand, to reactivate dormant knowledges or skills, and to prepare clerical personnel for special or overseas assignments. Five separate courses make up this "package" of refresher training: Shorthand Theory

SECRET

SECRET
CIA INTERNAL USE ONLY

FIVE CLERICAL COURSES OFFERED IN REFRESHER PROGRAM (cont 'd)

Review, Intermediate Shorthand Dictation, Advanced Shorthand Dictation, Typing Techniques Review, and English Usage Review. Employees can take them singly or in combination. All classes are conducted on the fifth floor, 1016 16th Street and are scheduled so that students spend as little time as possible in transit.

Each Program runs four weeks. Classes in shorthand and English meet 1½ hours a day; typing, one hour. A pretest is required for shorthand so that students can be placed at the correct level of instruction. This test is given at 16th Street on the Thursday before CRTP begins. Training Officers are notified by CTF/TR as to which of their students should report for the test.

Shorthand Theory Review develops the student's ability to construct appropriate Gregg characters and to transcribe dictation at 50 words a minute or faster with 98% accuracy. In the Intermediate course students are taught to transcribe with 98% accuracy material dictated at 70 words a minute, and in the Advanced course the objective is to transcribe with the same accuracy material dictated at 80 words a minute or faster. In Intermediate and Advanced Dictation, those who transcribe an official test dictated at 80 words a minute and have no more than five errors, meet the Agency's standards for this skill.

Speed and accuracy are developed in Typing Techniques Review for those who have a basic knowledge of the keyboard. Individuals who type an official time-test for ten minutes and have a net score of forty correct words a minute meet the Agency's requirements.

Rules of grammar, punctuation and capitalization as well as sentence structure and word usage are covered in English Usage Review. It is directed to typists and stenographers but it has proved helpful to non-clerical employees who need to review the basic mechanics of grammar.

25X1A

██████████ of the Clerical Training Faculty will discuss any elements of CRTP in greater detail. They can be reached on extension 2100.

SECRET
CIA INTERNAL USE ONLY

FILL OUT TRAINING REQUESTS CAREFULLY!

Once again we want to remind Training Officers that an explanation of an employee's present or projected job assignment should be included on each training request. Terms such as "Intelligence Assistant" or "Case Officer" should be accompanied by additional information.

CURRENT INTELLIGENCE BRIEFINGS

The Office of Current Intelligence will conduct three briefings in June in conjunction with OTR's Intelligence Orientation Course. These will be presented in the R&S Auditorium on 9 June, 16 June and 23 June from 12:30 to 1:00 p.m. Agency employees are invited. There is no formal registration.

AGENCY TRAINING RECORDS DISTRIBUTED

Agency Training Records for individual components have been distributed by the Registrar's Office. Included are accredited courses given by the Office of Training, those given by DDP's Technical Services Division, the Logistics Support Course given by the Office of Logistics, and selected external programs. These listings are based on Table-of-Organization information received by the Machine Records Division and show the record of staff employees only through 31 December 1960.

Recorded external training now includes Senior Officer Courses (National War College, Army War College, Industrial College of the Armed Forces, Armed Forces Staff College, Air War College, Naval War College, Dept. of State's Senior Seminar); Management Courses at Army Mgt. School, Fort Belvoir; Harvard University; Universities of Chicago and Pittsburgh; Brookings Institution; and the American Management Association; language training sponsored by OTR; and Missile and Weapons Orientations. Other external courses will be added in subsequent editions.

For information on training completed since 31 December, or to report any corrections or additions to the Training Record, please contact [REDACTED] in the Admissions and Information Branch/TR, extensions 8272 or 8273.

CALL ON RECORDS MANAGEMENT STAFF FOR ASSISTANCE

The Agency's Records Management Staff stands ready to assist offices in all components and will offer guidance and training in all phases of paperwork control. Examples are:

- Forms design, preparation, and control
- Correspondence methods and improvement
- Reports analysis and management
- Filing systems and procedures
- File equipment and supplies
- Office equipment and related procedures
- Record keeping surveys and analysis
- Record retention and disposal schedules
- Vital Materials selection and storage
- Records Center storage and service
- Archives preservation

For further information or to request specific assistance in any of the above fields, contact the Records Management Staff on extension 2468 or the Records Officer assigned to your area.

CHINA FAMILIARIZATION COURSE

The Language and Area School is opening the China Familiarization Course to interested Agency personnel, beginning with the fourth offering, 19 June 1961. The program was originally developed by the Language and Area School last February in collaboration with the Clandestine Services' Far East Division as part of a training program for both professional and clerical personnel. The success of the course has prompted both the FE Division and the Language and Area School to make the one-week, full-time program available to other offices in the Agency.

The course is divided between language familiarization and area familiarization, with emphasis on the former. Language familiarization includes training in the pronunciation of Chinese names, use of the Wade-Giles system of recording Chinese syllables, and use of the "telecode" book of Chinese characters. Area familiarization stresses the contemporary factors of the People's Republic of China, its political-governmental structure, geography, the economic aspects of the regime's administration, and the personalities of both the Peking and Taipei governments.

The course will be offered six times a year, approximately once every two months. A number of the slots are reserved for the Far East Division and all other registrations will be accepted in order

SECRET
CIA INTERNAL USE ONLY

SECRET

CIA INTERNAL USE ONLY

CHINA FAMILIARIZATION COURSE

of their receipt with a maximum enrollment of ten. Registrations are now open for 19 June and all instruction is given in the Washington Building Annex (Arlington Towers).

AN EXPERIMENTAL SELF-TEACHING COURSE IN BEGINNING RUSSIAN

Articles in recent issues of the Bulletin have commented on a new method of instruction called programmed learning. The essence of this method, which is the one used with teaching machines, lies in the careful sequencing of small steps of instruction called a "program." Such a program tries to lead the student to a mastery of course materials in much the same way that a tutor would do it--presenting only as much as the student can absorb at one time, getting him to demonstrate his understanding, correcting his mistakes immediately, and allowing him to proceed just as fast as he can comfortably go.

Only limited materials of this type are now available to teach foreign languages. Among these is a series of so-called "instant" language training materials. These have been published so far in Russian, German, French, Spanish, and Italian.

The Language and Area School, in an effort to explore the usefulness of the "instant" language materials, is prepared to offer sets of "Instant Russian" to a limited number of volunteer students for home study. "Instant Russian" consists of two long-play records, student manuals, and a dictionary. The materials are designed so that by the end of his training, the student is expected to have a vocabulary of about 1000 phrases and 3500 words. He will not speak like a native, but he is expected to have enough command of the language to be able to ask his way about town, to order meals, or to buy railway tickets. And, according to statements by the publisher, he should be able to accomplish this in about half the time required by older methods.

Each student will be required to take the Foreign Language Aptitude Test Battery, to keep track of the time he studies, and to take a brief test at the end of his training. The program is expected to take about two or three months to complete.

Anyone who has the necessary long-playing phonograph is eligible to apply. For further details, call [REDACTED] x2873 or x2874.

25X1A

SECRET

SECRET
CIA INTERNAL USE ONLY

VOLUNTARY LANGUAGE TRAINING PROGRAM

The Voluntary Language Training Program (off-duty hours) began its Spring-Summer Semester 1961 with 207 students enrolled in 28 classes. Languages were: Chinese, French, German, Italian, Japanese, Russian, Spanish, and Swedish. The increased enrollment of 67 additional students this semester is largely because courses at the elementary level in French, German, Italian and Spanish were reinstated. This semester began with three sections each in French 101 (Elementary), German 101, and Spanish 101 and two sections in Italian 101. In addition, renewed interest in the Group III languages is evidenced by the fact that Chinese 101 and Japanese 101 are also being given.

Enrollment at the 200 (Intermediate) level held steady, with classes in Chinese 203, French 202, German 201, and Spanish 202. This semester, for the first time, four Seminars (advanced) are being given, in French, German, Russian and Spanish. These Seminars, intended to help students maintain Intermediate or High proficiency in a language, meet for three hours per week.

Registrations are now being accepted for the VLTP Fall-Winter Semester 1961-1962, beginning on 11 September 1961. The new semester will end on 16 February 1962. There will be a two-week break for the Christmas-New Year holiday season. Training Officers and prospective students should note that the deadline for registrations for the Fall is 14 August 1961.

Based on sufficient enrollment, the following courses will probably be offered next semester:

Chinese 101, 102 and 204
French 101, 102, 201 and Seminar
German 101, 102, 202 and Seminar
Italian 101 and 102
Japanese 101 and 102
Russian 101, 102, 103 and Seminar
Spanish 101, 102, 201 and Seminar

In addition, any course for which a minimum of five students is registered for a given level and in a language for which an instructor is available will also be given.

Reminders:

1. Be sure all copies of the Request for Internal Training (Form 73) are properly completed.
2. If applicant has never taken internal or sponsored external language training before, the Foreign Language Aptitude Test (FLATB)

SECRET

SECRET
CIA INTERNAL USE ONLY

VOLUNTARY LANGUAGE TRAINING PROGRAM (cont'd)

is required. In this case, TOs should make arrangements for the applicant to be scheduled for the test.

3. If applicant had language training before entering on duty and has not yet taken the Agency Proficiency Test in the language in which he is applying, this test should be scheduled as soon as possible. This is a requirement for acceptance in all 200 level and Seminar classes. No one who is not Intermediate or High in Reading and in all aspects of Speaking will be admitted to the Seminars.

4. All applications should be in the Registrar's Office by 14 August 1961.

5. Each student will be notified by phone of time and location of his class a few days before 11 September.

6. Training Officers will receive lists of students in their components, indicating which classes they are attending, as soon after 11 September as these can be compiled.

All questions concerning registration should be addressed to the Admissions and Information Branch/RS/TR, extension 8272 or 8273. Questions on requirements and placement in all classes above the 101 level should be referred to the Voluntary Language Training Office, Language and Area School, extensions 2470 or 2873.

CLERICAL TESTING

Clerical Skills Qualification Tests for employees who have to meet the Agency's requirements in typing and shorthand are scheduled to be given on 26 June, 10 July, 31 July in Room 508, 1016 16th Street. Typing is at 1:15 and shorthand at 2:00. Supervisors or Placement Officers can register employees directly, by calling Clerical Training, extension 2100.

Results of the tests are sent by CT/TR to Placement Officers. Individuals who fail to meet the required standards must wait five weeks before they may be retested.

SECRET

SECRET
CIA INTERNAL USE ONLY

REMINDER TO THOSE IN EXTERNAL TRAINING

Employees who have been sponsored for external training programs are reminded of the requirement to submit three copies of "Report of Training at Government Expense (Form 1049)" to the Chief, External Training Branch/RS at the completion of training. In the case of a full-time program, extending for a semester or longer, a narrative report covering essentially the same points which appear on Form 1049 is preferred. Students are urged to be especially objective in their evaluations. C/ETB sends a copy of the report to the Office of Personnel for inclusion in the employee's 201 file and retains the other two copies in his office. These reports are of particular benefit to OTR in its planning for future use of particular external facilities.

INTELLIGENCE REVIEW COURSE WILL BE GIVEN AGAIN IN OCTOBER

A third 80-hour Intelligence Review course has been scheduled by the Intelligence School for the two weeks of 2 to 13 October. It will again be a full-time instruction and classes will meet in the R & S Auditorium.

This course presents an opportunity for experienced personnel to examine the current status of the intelligence profession and to discuss future trends as well as organizational changes and relationships affecting their duties and responsibilities to the Agency. Current status of the intelligence process, the development and interrelationships of the intelligence community, intelligence objectives and requirements, and the problems of coordination are reviewed. In addition, the support structure of the Agency is discussed and final sessions are devoted to a review of the current status of International Communism and a comparison of the Sino-Soviet Bloc and the U. S. as a World Power.

Completion of the Intelligence Orientation course and five years' experience with the Agency or the equivalent in experience are prerequisites. It is recommended especially, that nominees to Senior Officer Courses (National War College, Armed Forces Staff College, Industrial College of the Armed Forces, Air War College, Army War College, Naval War College, Dept. of State's Senior Seminar) take either the Intelligence Review course or the Clandestine Services Review course before going to an SOC.

SECRET
CIA INTERNAL USE ONLY

SECRET

CIA INTERNAL USE ONLY

COMMUNIST PARTY ORGANIZATION AND OPERATIONS COURSE

The Communist Party--its organization, development, and structure-- is examined in detail in Communist Party Organization and Operations, an eighty-hour course conducted by OTR's School of International Communism. It runs for three weeks and classes meet from 8:30 to 12:30 each day. Completion of Phase II of the Intelligence Orientation Course (Introduction to Communism) or equivalent training is a prerequisite for this instruction.

Basic principles of Communist Party organization are covered in the introduction as well as the application and development of these principles through the history of the movement. An intensive analysis is made of the structure, functions and day-to-day operations of open and underground Parties and front organizations. Emphasis is placed on cadre, agitprop, front, mass action, underground, and espionage activities as illustrations of how the Communists exploit organizational assets to accomplish their long-range aims. Finally, there is an examination of inter-Party relations, as an aspect of the larger problem: coordination of the International Communist movement.

25X1A

For a discussion of course content or for further information, the Chief Instructor, [REDACTED] should be contacted on extension 3529.

The next CPO&O Course will be given on 2 October.

SURVEY OF BUDGETING COURSE SCHEDULED FOR OCTOBER

The Office of the Comptroller has scheduled a twenty-hour Survey of Budgeting Course from 5 September through 5 October. Classes will meet from 1:00 to 3:00 p.m. on Tuesdays and Fridays in Room 2103 Alcott Hall.

Three major budgetary processes--preparation, approval and execution--are covered in the course, with special emphasis on application and adaptations to the Agency. Basic principles of the current Government budgetary system, executive-legislative relationships, and political-economic relationships are also included. The course is open to those staff employees who need a non-technical survey of budgeting and is especially helpful to administrative officers and program planners.

To register or obtain additional information on course coverage, the Comptroller Training Officer, [REDACTED] should be contacted on extension 4454.

25X1A

ORIENTATION FOR TRAINING ASSISTANTS

Since July 1959, members of the Registrar Staff have been giving one-day orientations to Training Assistants and to other individuals who are responsible for supporting plans and arrangements for training Agency personnel. The orientations were conducted on a non-scheduled basis until recently. Now the plan is to give one on the second Thursday of every month--and for no less than five people.

An orientation covers the policies and procedures that apply to admitting personnel to internal and external courses. It also includes an explanation of information on Agency courses and external programs that are available in the Registrar's Office and the ways and means the Admissions and Information Branch especially uses to bring this information to OTR's customers.

Training Officers, Personnel Officers, and supervisors are invited to send their personnel to one of these orientations. Registration is handled informally, through Training Officers who can register the names directly with [REDACTED] extension 8271.

25X1A

THIS SHOULD HELP--

As an aid to Training Officers, these are the individuals in the Admissions and Information Branch who are concerned with registrations in OTR's courses.

External PROGRAMS

In this section are summaries of selected external training programs and course offerings which we believe are of professional interest.

Information on curricula, requirements, tuition and other facts about a course can be obtained from the Admissions and Information Branch, extension 8271, where a collection of catalogs, brochures, directories, and similar publications of major academic, commercial, and Government institutions is maintained.

The programs may be attended under Agency sponsorship, depending on budget considerations, benefit of the training to the Agency, and suitability of the training with respect to the individual's career development plan. Enrollment of employees in Agency-sponsored programs is arranged by the Chief, External Training Branch, extension 8908. Prospective trainees, supervisors, and Training Officers are asked not to communicate directly with the institution unless instructed by the Chief, External Training Branch to deal personally with the institution and make arrangements for his own enrollment.

For the person who takes a course of instruction at his own expense, and independent of the Agency's direction, interest, or sponsorship, enrollment is governed only by the Agency's security policy.

NATIONAL RADIO INSTITUTE

The National Radio Institute (NRI), 3939 Wisconsin Avenue, Washington 16, D. C., has full-time correspondence programs of training for careers in the field of electronics. They offer courses in:

Radio and TV Servicing
Radio and TV Communications
Electronics--Principles, Practices, Maintenance
Servicing Electrical Appliances

NRI has prepared its courses for those with an aptitude for mechanical and electrical subjects. A high school education is desirable but not required. Successful completion of a basic course in algebra is a prerequisite for Radio and TV Communications, and the Electronics courses.

The Institute is accredited by the Accrediting Commission of the National Home Study Council. A diploma is awarded upon completion of a course.

PH.D. PROGRAM IN LINGUISTICS AND LANGUAGE - GEORGETOWN UNIVERSITY

Georgetown University has announced a new program leading to the Ph.D. in Linguistics and Languages with majors in (1) Theoretical Linguistics, (2) Linguistics Applied to English as a Second Language, and (3) Foreign Languages, starting September 1961.

Foreign Language concentrations are offered in French, German, Russian and Spanish. Arabic, Chinese, Japanese, Italian, and Portuguese will be added later. A limited number of three-year fellowships covering tuition and maintenance will be awarded annually.

SOUTH ASIAN LANGUAGES - THE UNIVERSITY OF CHICAGO

Until recently the University of Chicago and several other universities in this country limited their teaching and research of South Asian languages to the classical ones--Arabic, Pali, Persian, and Sanskrit. As a result of the programs begun under Section 602 of Title VI of the National Defense Education Act of 1958, the University of Chicago has enlarged its South Asian language program to include five of the modern languages--Bengali, Hindi, Urdu, Tamil and Munda.

SECRET

SECRET
CIA INTERNAL USE ONLY

SOUTH ASIAN LANGUAGES - THE UNIVERSITY OF CHICAGO (cont'd)

The 1960-61 schedule included Introductory Bengali, Intermediate Bengali, Advanced Bengali, Introductory Hindi, Intermediate Hindi, Introductory Urdu and the Cultural and Literary History of Bengal.

Research projects were also begun in these languages. Most of the projects involved the preparation of teaching materials or a study of some linguistic problem. As these projects are completed, additional courses will be offered. Plans are to begin language instruction in Tamil in the Fall 1961.

AUTOMATIC DATA PROCESSING COURSES - WASHINGTON AREA

Issue No. 3 of the Directory of Automatic Data Processing Courses prepared by the Bureau of the Budget (See OTR Bulletin, January-February 1961) was distributed in April 1961. In this issue ADP-Oriented Systems Analysis and Design training courses are identified in addition to those designated as Executive Orientation courses. Courses to be held in the Washington area include:

The American University

Fourth Institute on Information Storage and Retrieval, 12-16 February 1962

Eighth Institute on Electronics in Management, 30 October-3 November 1961

Automatic Data Processing Systems. A 3-semester hour credit course to be offered in the Summer and Fall 1961 (evenings)

Systems Analysis. A 3-semester hour credit course to be offered in the Fall 1961 (evenings)

Management of Documentation. A 3-semester hour credit course to be offered in the Fall 1961 (evenings)

George Washington University

Data Processing. A 3-semester hour credit course to be offered in the Fall 1961 (evenings)

Case Studies of Automatic Data Processing Systems. A 2-semester course (6 credit hours) to be offered Fall and Winter 1961-62 (evenings)

Seminar on Data Processing for Federal Executives. Schedule: Thirteen two-hour sessions on Tuesdays and Thursdays, 9:30-11:30 a.m., beginning on 26 September 1961

Thirteen two-hour sessions on Wednesdays and Fridays, 9:30-11:30 a.m., beginning 1 November 1961

TRAINING IN MANAGEMENT ANALYSIS - BUREAU OF THE BUDGET

The Bureau of the Budget, in agreement with the Civil Service Commission, is undertaking central leadership in providing training programs in management analysis and certain other management subjects. As part of this program, the following courses in management analysis have been scheduled:

| | |
|---|--------------------|
| Automatic Data Processing for the Systems Analyst | 24 Jul - 4 Aug 61 |
| Work Methods and Standards | 7 Aug - 1 Sep 61 |
| Work Planning and Control | 7 Aug - 25 Aug 61 |
| Management Statistics | 11 Sep - 22 Sep 61 |
| Statistical Quality Control | 2 Oct - 20 Oct 61 |

The courses will be conducted by the Ordnance Management Engineering Training Agency (OMETA). Classes will be held daily from 9 a.m. to 4:30 p.m. in or near the Executive Office Building, 17th and Pennsylvania Avenue, N. W.

Participation is limited to Federal employees in the Washington area who are serving in management analyst positions or in positions requiring a substantial amount of work in, or a good understanding of, the subject matter of the course. A grade of GS-9 or above is also required for admission to all courses except Statistical Quality Control.

Training requests must be submitted to the External Training Branch six weeks prior to the beginning date of each course.

TRANSPORTATION MANAGEMENT INSTITUTES - AMERICAN UNIVERSITY

American University's School of Business Administration has announced its management development program of transportation institutes for the Academic Year 1961-62. These full-time institutes are for middle management-level executives, present and prospective, and they emphasize current problems in management and government, regulation of transportation, and training in management procedures and problem-solving techniques. Institutes and dates:

Air Transportation Institute, 6-17 November 1961

Institute on Railroad Management, 8-19 January 1962

Institute of Industrial Transportation and Traffic Management,
5-22 March 1962

Motor Transportation Management Institute, 9-13 April 1962

Ocean Shipping Management Institute, Unit I: 30 April - 4 May
1962, Unit II: 7-11 May 1962

(Unit I is devoted to problems of management, traffic and operations; Unit II, to broad problems of administration and government shipping relations. Enrollment may be for either one or both units.

Details about each institute will be announced as they are made available by A. U.

U. S. POWER SQUADRONS OFFER CLASSES IN PILOTING

United States Power Squadrons is a nationwide association of boatmen dedicated to the promotion of safety afloat. It conducts a program of free instruction in boating subjects. Elementary Piloting is the basic course and it is open to men and women. Lectures are on:

- Equipment and Government Regulations
- Aids to Navigation
- Charts and Piloting
- Rules of the Road Afloat
- Seamanship
- The Mariner's Compass
- Safety Afloat
- Manners and Customs on Shipboard

The Washington Squadron conducts its Piloting course from the middle of September to the last of January, each year. During the spring,

courses in Seamanship, Advanced Piloting and others are offered to those who qualify as members of the Squadron.

Further information may be obtained by writing USPS Headquarters, Box 510, Englewood, New Jersey.

CAPITOL RADIO ENGINEERING INSTITUTE

The Capitol Radio Engineering Institute (CREI) at 3224 Sixteenth Street, N. W., Washington, D. C., offers both residence and correspondence courses in engineering technology. CREI's curricula are accredited by the Engineers' Council for Professional Development and the National Council of Technical Schools. All applicants must be high school graduates or have equivalent educational background.

Residence. CREI is authorized by the Board of Education of the District of Columbia to confer the Degree of Associate in Applied Science to students in the residence school who complete courses leading to a major in Control Systems Engineering Technology or Communications Engineering Technology. The curricula, which require 160 quarter credit hours, can be completed in nine quarters. Classes are offered day and evening.

Registration and starting dates for new students:

Summer Quarter 1961 - 26 June
Fall Quarter 1961 - 20 September
Winter Quarter 1961 - 18 December

Registration of former students will be held on the two days preceding the dates for new registrants.

Correspondence. Through its Extension Division, CREI offers programs leading to a diploma in Electronic Engineering Technology or Nuclear Engineering Technology. Certificates are awarded upon completion of Specialized Communications Engineering Technology, Specialized Aeronautical and Navigational Engineering Technology, Specialized Television Engineering Technology, Specialized Servomechanisms and Computer Engineering Technology, and Specialized Engineering Mathematics. One may enroll at any time.

LECTURES AT NATIONAL WAR COLLEGE
AND INDUSTRIAL COLLEGE OF THE ARMED FORCES

The National War College and Industrial College of the Armed Forces, both located at Ft. McNair, invite leading authorities from the Department of Defense, Department of State, and other Government agencies and from universities and industrial firms to lecture in their Senior Officer Courses. Both colleges send announcements of these lectures, and the Agency has an established quota for attendance. When a schedule is received in OTR, it is prepared for publication as a Special Bulletin and distributed to Training Officers of the DDS, DDI and the DDP and to the Offices of the DCI.

To attend a lecture an Agency employee must have a Top Secret clearance, be in the grade of GS-14 or above, or have the rank of Colonel. The NWC requires a guest to be registered five days in advance of a lecture. Registration is done through Training Officers, and the External Training Branch makes the final security and administrative arrangements for attendance.

Military Reservist ACTIVITIES

Although it was stated in the last Bulletin that the list of military training courses available to reservists for the remainder of 1961 would be published in this issue, we find as we go to press that we still do not have complete catalog information from the military departments. As catalogs are received the Mobilization and Reserve Branch/MMPD will screen them and distribute pertinent extracts directly to reservists.

In line with the objective of assisting Agency military reservists to obtain active duty training tours which will enable them to maintain their proficiency and to achieve additional skills for performance of wartime duties, the following external and internal training courses have been or are being arranged:

External

Navy Orientation Course - By special arrangement with CINCLANT and the Commander, Amphibious Training Command, U. S. Atlantic Fleet, the Agency has been authorized to send Army and Air Force Reservists to the U. S. Naval Amphibious Base, Little Creek, Norfolk, Virginia for orientation courses. The first group of twenty-five (25) reservists, to participate in the 5 June 1961 running, has already been selected. Applications for enrollment in a similar course commencing 17 July 1961 are now being accepted.

Reservists attending these courses will receive an orientation at Headquarters CINCLANT on the first day of training, after which they will enter the Amphibious Warfare Indoctrination (S.1) Course. During the second week of the S.1 Courses conducted in June and July reservists will have an opportunity to witness a practical training exercise in amphibious assault which will show the effective coordination existing today between the Army, Navy, Marine Corps, and Air Force.

SECRET

SECRET
CIA INTERNAL USE ONLY

Special Warfare Courses - The proposed courses in Special Warfare which were announced in the March-April Bulletin have been approved by the Special Warfare Center, Ft. Bragg, N. C., the Continental Army Command, and the Office of Special Warfare. The courses will be conducted at Ft. Bragg in August and September--one in each month. The content is now being worked out by the Agency's Liaison Officer at Ft. Bragg, and exact dates, quotas, and other details will be announced by MMPD.

Internal

Special courses in Counter Guerrilla Warfare and Strategic Intelligence are now being prepared for internal presentation by the Reserve Active Duty Training Committee, which is composed of representatives from each of the military reserve units in the Agency. The Counter Guerrilla Course is being developed in coordination with the Special Warfare Center at Ft. Bragg. Personnel from the Department of State and the International Cooperation Administration are assisting CIA and the Center in organizing the pilot presentation. In developing the Strategic Intelligence Course, material from the Army's Strategic Intelligence School is being used as is selected material from Agency sources. Guest speakers will give portions of both courses, but much of the material will be presented by selected reservists attending the courses. Counter Guerrilla Warfare and Strategic Intelligence will be conducted at a training site away from Headquarters, with starting dates scheduled as follows:

| | |
|---------------------------|-------------|
| Counter Guerrilla Warfare | 17 Jul 1961 |
| Strategic Intelligence | 7 Aug 1961 |

Applications for schools and active duty tours for training must be submitted to the Mobilization and Reserve Branch/MMPD. Reservists are reminded that inasmuch as varying amounts of lead time, with four weeks as a minimum, are required by the sponsoring armed service, MMPD should be consulted as early as possible before a course begins. Additional information on programs for reservists may be obtained by calling extension 8128.

"NO ROOM ON CAMPUS FOR UNDER-ACHIEVERS"

In the hysteria caused by the tidal wave push for college entrance, admission to college has taken ways followed by the words "and they lived happily ever after." It is one of the obligations of the counselor to point out that getting in is not enough. One must stay in and graduate.

Many young people and their parents have no realization that one can be denied a college degree without ever having failed a course-- just by getting too low a grade point average to be permitted to continue at college. A student may miss the diploma by getting too many D's and C's and not enough A and B grades.

A policy which is being tried out or has been used during recent years is warning and then dropping or suspending the under-achiever. This is not a student who has flunked anything necessarily. It is the young man or woman with high potential who despite no signs of intense personal problems, social maladjustment or emotional instability, is satisfied with mediocre scholastic achievement.

Several colleges have gone back to a very early American college policy of "rustication" or withdrawal from the campus to think things over. Readmission is granted usually only after a year and if the student can convince college authorities that he is ready to put forth maximum effort.

Amherst tried this as a formal policy for two years and will continue counseling under-achievers on an informal plan. At Williams College there is a regular program of "counseling students out" who are not doing their best.

The latest college to announce a formal program to weed out under-achievers is Hamilton College where ten students have been warned that if they do not work up to their potential they face a year away from the halls of learning.
