

To General Counsel

2 July 1948

All the necessary mechanical instruments for the operations of the station, the purpose of which is as stated above, to receive secret radio and wireless signals, broadcast by foreign radio stations, will be sent from America and will be installed and put in operation by the American technical personnel stationed in Cyprus.'

"It is not known how this paper secured the information contained in the article, although it may have originated with one of the contractors who submitted bids on the construction project. No contractors were contacted who were not previously cleared by the Defense Security Officer. This is the first press item concerning FBIS project which has come to our attention since those reported in the Progress Report of 28 February."
