It was pleasant meeting with you during your recent trip and I do hope that any variations that we have introduced into your planned procedures have not complicated matters at 

50X1

In response to your several questions I can now provide some answers.

a. The use of the  and its associated address is still satisfactory.

c. Any assignment wherein a contractor desires to acquire safe files, approval and procedure as far as acquiring the safes, is to be worked out between the contractor and the contracting officer or his representative. Accordingly, I would suggest that you address your request for safes directly to our contracting officer.

d. For your information and also for  information, the paper work of Task V of your contract, covering the repair of auto-collimators, will leave here shortly and it will be followed by the delivery of 115 units for your consideration.

e. Action was initiated on 27 January 1953, to setup the new Task Contract "Physics" to include three tasks as proposed. For inclusion in this contract, I would also be very interested in receiving a fourth proposal on a matter of a telephone dial pulse recorder of small dimensions, which  and I discussed previously. It was anticipated that such a unit could be housed in a box approximately 5"x5"x5" and incorporate a miniature flame to ultimately record letters and/or numbers as dialed and accumulated. This item is of prime importance and should operate across a 500 ohm impedance line with minimum coupling.

I am looking forward to hearing from you or  soon. Anything further that I can do to assist you or expedite our common interests, I will be pleased to do.

50X1

Very truly yours,

50X1
