RACISM - AN IDEOLOGICAL TOOL OF THE WARMONGERS

By A. Demidenko

...The propaganda of American racism is waged under the flag of superiority of the American way of life, of American bourgeois democracy, of superiority of the English language, etc. Anglo-American reactionary ideologues have created a myth about an Anglo-Saxon "super-nation", about the Anglo-American type as the bearer of a "super culture". Thus, for example, E. Carr in his book "Twenty-Year Crisis" writes: "The English-speaking race is chosen by God as an agent to improve the fate of mankind".

The ideologues of Anglo-American imperialism preach the racist theory of the superiority of the English-speaking peoples by no means from platonic love for all types of theories. They place before themselves definite practical aims and tasks. Slandering other peoples of the world, declaring them incapable of development without the help of Anglo-Saxons, the American and British ideological servants of imperialism are trying to cultivate in their peoples the spirit of zoological hate for the population of those countries which are designated as objects of imperialist aggression...

The reactionary American philosopher, Dewey, having declared other peoples lower races, impudently said that the American imperialists are the "natural leaders" of mankind. The warmonger, John Foster Dulles, in his book "War or Peace" writes that the Americans are a "higher race", designated to lead the whole world. The former employee of the British military mission in Moscow, Edward Crankshaw, in a book published in 1948 in New York, calling for a new world war, wrote: "This war would make the USA and Britain joint masters of the world. If we went along this road, we could put the world in our pocket and live in luxury on the plundered".

Trying ideologically to underpin the aggressive policy of American imperialism, which has placed as its goal the creation of an American world slave-holding empire, in which free peoples would be placed in a condition of colonial slaves lacking rights, the servants of American imperialism disseminate monstrous slander about other peoples. Thus, for example, the former US President, Herbert Hoover, in his speech on the radio, declared the peoples who belong in the democratic camp "hordes of Asiatics" in the treatment of whom any brutalities, any atrocities are permissible...

And since, according to the affirmation of the racists, our planet is already "over-populated" and there is not enough space on the earth for all people, then the "higher" races have the "right" to exterminate the "lower" races, who must disappear from the face of the earth.

Thus the modern-day civilised cannibals "scientifically" underpin and justify the unheard of evil deeds and atrocities committed in Korea, Malaya, Vietnam and other countries by the imperialist colonisers with the purpose of plundering and enslaving the peoples of these countries...

The devastation of Korea, the destruction of its towns and villages, art memorials, the mass killing of women, children and old people - all this is considered by the Anglo-American ideologues and military only as a "dress rehearsal" on the road to a new world war, with the help of which predatory American imperialism counts on establishing its supremacy over the world.

A Chicago atom-monger, a certain James Arnold, reckoned that destruction of mankind with the help of hydrogen bombs will cost American imperialism from 2 to 40 billion dollars. Leo Scillard, a doctor of Chicago University, said on a radio broadcast on February 26, 1950: "I figured out how many neutrons or how much heavy hydrogen it would be necessary to explode in order to remove all people from the earth in this manner. And I figured that for this about 52 tons of neutrons or 500 tons of heavy hydrogen is completely sufficient."

However, the American imperialists are grossly miscalculating. The peoples of the world do not want to be slaves of the Anglo-American "master race". They are more and more closely rallying under the banner of struggle for maintenance and consolidation of peace, against the imperialist warmongers...

American racism is directed not only against other peoples, but also against the peoples of the USA, particularly against the national minorities who live in the USA.

In the USA the so-called theory of "100%" Americans has been widely disseminated. According to this "theory", "100%" Americans are considered only people of Anglo-Saxon origin. The rest of the inhabitants of the country are declared inferior.

From the point of view of the American obscurantists, only the ruling classes, the "imperialist elite", is valuable. The American racists consider as "lower" and "inferior" not only the peoples of other countries, but also the working people of the USA, whom they declare biologically inferior...

In the USA there is a whole system of racist laws, directed against national minorities. The racists treat negroes, Indians, Mulattoes, Chinese and other non-Anglo-Saxons as lower races...

Now the Anglo-American imperialists, occupied with preparation of a new world war have extracted from Goebbels propaganda arsenal the weapon of racism, having readapted it somewhat in the Anglo-Saxon style. But if the lessons of

history didn't teach anything to the new aspirants to world supremacy, these lessons taught a great deal to peace-loving peoples. People of good will are more and more forcefully opposing the aggressive policy of the Anglo-American imperialists, working for maintenance and consolidation of peace, against the cannibalistic racist theory, for strengthening friendship and cooperation between peoples.

The common people of the whole world, with deep love and hope, turn their eyes to the USSR, where racial and national strife has been liquidated, and in relations between peoples there has been for ever confirmed comradely cooperation and mutual help; there has been established friendship of peoples - the great moving force of the development of Soviet security on the road to communism.
