PROPOSAL FOR THE MANUFACTURE

OF ONE PLASTIC ITEM

It is proposed that the contractor negotiate a subcontract for the manufacture of one plastic item. The costs include the temporary molds, the casting, and the transportation of the item to its point of destination, but do not include the manufacturing cost for a clay model used in the performance of the subcontract.

It is expected that the task will be performed within less than sixty (60) days from receipt of the contract, but it is suggested that ninety (90) days be allowed for the finalization.
