Dear Mr. [REDACTED] :

Reference is made to your letter of 21 January 1954, regarding resubmittal of heating coil specified under Par. 36.09(b) of the mechanical specifications.

The Aerofin Type "R" heating coil designed for 125 lb. working pressure as indicated on manufacturer's drawing No. CA-152-R is satisfactory and is approved with steel header in lieu of cast iron as a minor modification of the contract specifications without change in contract price.

Very truly yours,

25X1A9a
