GRAPHICS REGISTER STATISTICAL REVIEW—FY-65
PHOTO BRANCH
COLLECTION ACTIVITY——BY PRINCIPAL SOURCE

1. DD/P

Subject, Area, and Principal Users -- Photography submitted covers
all areas, but principal coverage is on the USSR, China, Cuba, and
the European Satellites. Subjectwise, there is a preponderance of
photography on missile activity with associated radar and check
points, military equipment, submarines, and communication equip-
ment. Principal users are NPIC, OCI, ORR, OSI, FTD, DIA.

25X1 2. [____]

Subject, Area, and Principal Users - World-wide coverage on
practically all intelligence subjects. 25X1 [____] exploitation of
25X1 [_____] continues to provide new
and valuable information on Soviet science, industry, and
25X1 agriculture. Most receipts from [__] are in response to col-
lection requirements served by Graphics Register and other
USIB offices. Principal users are ORR, NPIC, DIA/AMS, [____]
OCI.

3. GRAPHICS COORDINATOR PROGRAM

Subject, Area, and Principal Users - This program is controlled and directed by Graphics Register and complements the other Agency and Community collection activities. It is particularly productive for providing economic and sociological reporting on newly emerging areas. Geographic and mapping interests are also served by this program. Valuable photography has been sent in during the past year by several posts in Southeast Asia, Latin America, and Africa. Principal users are ORR, NPIC, ☐ OCI, OSI, and NIS contributors, and DIA/AMS.

6. [   ]

Subject, Area, and Principal Users - All of the [ ] material has proved to be unique and valuable coverage. We have received excellent quality photography on China, the USSR, and Near East, which could not have been obtained from other sources and is non-duplicative of CIA and DIA holdings. Principal users are NPIC, [ ] SAC, ACIC, ORR, DIA/AMS, and OCI.

7. OTHERS

Subject, Area, and Principal Users - Agency travelers from the DD/I and the Office of Security have contributed some excellent photography. Travelers who are not restricted to the beaten path are of most interest to Graphics Register. For many years USIA has been a good source of personality photographs. AID photography of U.S. projects in underdeveloped areas always includes valuable material for intelligence users. Principal users are NPIC, ORR, OSI, DIA.

6. PERSONALITIES DESK [ ]

Statistics are kept by the number of personalities received rather than by
the number of photographs. This is done to insure a more accurate reflection
of workload since the photograph of each individual must be processed as a
single accession. Emphasis is placed on the USSR, Satellites, and key
personalities in free world areas. All Foreign Service Posts have a respon-
sibility for biographic reporting and for submitting photographs of key
personalities. Personality collection guidance and specific requests are
sent to the field through the respective area desks of Graphics Register.
Personality requirements are incorporated into other subject and area guide-
lines.

The Personality Unit supplies photography for most publications concerning
biographics published in the Intelligence Community including the NIS and
Briefing Books for the White House, Department of State, and the Department
of Defense. Support is also provided for briefing departmental officials
who will be meeting leaders of other governments in this country or abroad.
Military Attaches familiarize themselves with the personality files on their
particular country before taking an assignment. The Clandestine Services
are supported by identification of personalities; many photographs are
processed for DD/P operations.

4. Commercial Feature Films

Feature length motion picture films are procured primarily for DD/P
and are used to increase morale, for training of indigenous personnel,
for agent recruitment, and the development of selected, highly placed
foreign government officials.
