MEMORANDUM FOR: [REDACTED]

25X1A9a

SUBJECT: [REDACTED]

25X1A2d1

1. Subject was under consideration for employment on a covert project [REDACTED]. He was medically examined by one of our cleared physicians and some type of infection discovered which caused the physician to suggest that he return to his private doctor for additional treatment. He did so and his physician furnished information to the effect that the case of gonorrhea was now completely cured. As best we can determine, the Division (WH) at this stage decided that, inasmuch as he had failed to reveal such information at the time of his initial application, they did not desire to go through with his employment.
