b. Memorandum, dated 15 June 1953, to ADD/A from [redacted], subject "Survey of Electric Power Facilities, [redacted]"

25X1A6d

25X1A

1. A sum of \$33,000.00 has been allotted to the [redacted] based upon references a. and b.

25X1A

25X1A6d

2. A resurvey of the situation indicates that additional funds, in the amount of \$10,000.00, are required to accomplish fully the necessary changes. Attached is a detailed report prepared by the Real Estate and Construction Division which outlines the power situation at both stations and recommends electrical work costing an estimated amount of \$41,300.97. This figure is only \$8,300.97 above the \$33,000.00 already allotted. However, it is felt that an estimated additional \$1,700.00 will be required for extension of the power service to the new Records Center Building which will be constructed [redacted]. It is therefore recommended that the additional \$10,000.00 be made available for this work.

25X1A

3. The technical features of the work recommended in the report are the same as previously recommended in reference b.
