

DEC 29 1969

MEMORANDUM FOR: Chairman, Information Processing Board
DD/I Information Processing Coordinator
DD/P Information Processing Coordinator
DD/S&T Information Processing Coordinator

SUBJECT : Excess EAM Tabulating Cards

1. The Office of Logistics has about 3.5 million EAM cards in stock which are excess to any known requirements and therefore available for issue at no cost. An informal canvass of several of the normal customer components has not developed a requirement for any of this stock.

2. The total value of this stock is about \$3,500. While this is not a staggering sum, it would seem that we should make an effort to use them internally before offering them to the General Services Administration for issue or disposal.

3. I would appreciate your notifying me before the end of January whether or not you have a requirement for any of this stock in order that the Director of Logistics can take appropriate disposal action.

STATINTL

DD/S Information Processing Coordinator
