Bob:

As discussed by phone, we are in complete agreement that we participate in the review of such requests prior to your approval. This action would give you the benefit of information available to O/PPB which may not otherwise be readily available to your office.

The vehicle to put this requirement into being is the proposed revision of [redacted] and the companion handbook which is now being circulated for coordination. This revision is a result of the IG Study Group's work on proprietary projects.
