██████████ called on me this morning to talk about his response to my "Dear Bob" letter of 6 July asking what we could expect for production in FY 65, since they had twice as many holdovers this year as they did in FY 63. Karem showed me an elaborate work schedule to show how they would during the course of the present fiscal year submit to us the 6 carryovers from last year and produce 3 or 4 new sections due us in FY 65. The carryover for the current fiscal year is anticipated as two sections. He said that FY 66 should end with no shortfall.
